ALLEN'S PAIN DOCTOR.

A SPEEDY RELIEF AND CURE, for Lumbago, Pain in the Side, Back, Rheumatism, Neuralgia, Sore Throat, Diptheria, Toothache, Burns, Bruises and Sprains, Nervous Headache, Stiffness of the Joints, and pains of any art of the body.

This compound has been but a short time before the public, and has already grown into great favor and repute, in nearly every instance, where it has been tried. There are cases so chronic and deep seated as to baffle all human remedies, and the inventor of this compound does does not claim for it any such infallibility as to cure every disease under the sun. Such assertions of any human remedy, bear their own construction, even to the most simple-minded; but when pain can be cured and relieved by liniments and embrocations this preparation will do it.

The Pain Doctor is not made up of root or Indian remedies, but is a "happy compound of standard medicines, and, therefore, can be no humbug. The testimony of those who have given it a fair trial, will substantiate all its claims. It will keep any length of time, is easily applied, not at all disagreeable to the smell, and is sold at such a price as to be with in the reach of all.

It should be kept in every family. It is worth double the price, to cure the ailments of children.

Give it a fair trial, and you will always keep it on hand, among the family medicines.

DIRECTIONS.

☞ Always shake well before using. As a general rule, apply the liniment with the palm of the hand, or a piece of cloth, rubbing briskly, until relief is afforded.

In cases of violent pain, the liniment may be warmed, and after rubbing freely, lay on a piece of flannel saturated with the compound over the seat of pain. For Sore Throat or Diptheria, apply a bandage saturated with the Pain Doctor. Should the burning be too severe, as in the case of children, a little sweet oil may be added. For Colds or Bronchia, pare gently with a sharp knife, and rub well morning and evening.

For Pains in the Bowels, rub freely the Abdomen.

For Toothache, apply into or next to the teeth, a piece of cotton saturated with the compound, and rub the part of the face opposite.
