GUEST PAINT CO.

THE BAR REARRANGES THE ROSTER OF CASES

SEVERAL CASES TO BE CONTINUED AND NEW ROSTER NECESSARY.

LEAVES FEWER

All of Time of Either Week Will Not Be Taken Up, Which Will Please Jurors.

The local bar association held a meeting yesterday for the purpose of rearranging the roster of cases for the summer term of court of common pleas, several of the cases which were to have been heard, having been continued.

As the roster now stands it will not take up all of either week to try the cases arranged for the two weeks. Judge Sease of Spartanburg, who is to preside has stated that he can come and go any of the days and the fact that it will not consume all the time will also be better for the jurors since many of them are very busy with their crops at present.

The rearranged roster stands as follows:

Monday, June 21st.

Jenkins against Telegraph company. Peoples Grocery Co., against Breedin.

Wakefield against Spoon.

Burden against railway company.

Tuesday, June 22nd.

Southern railway against Broadway Oil Company.

Southern railway against Wilmont Oil Mill.

Wednesday, June 23rd.

Mitchell against Mitchell.

Anderson against Blue Ridge railway.

McKinney against Blue Ridge railway.

Humphreys against Blue Ridge railway.

Bleckley against Blue Ridge railway.

Thursday and Friday.

Thursday and Friday and probably Saturday will be given over to hearing appeals and equity cases.

The roster for the second week, is as follows:

Monday, June 28th.

Clarke against Monroe.

Case company against Watson.

Tuesday, June 29th.

Summy against Anderson county.

Will Entertain Judge Sease.

The bar association plans to entertain Judge Sease. A committee consisting of T. F. Watkins, Leon L. Fice and T. P. Dickson was appointed to make necessary arrangements and to determine the time and place. It is highly probable that McKinney's spring will be the place selected and that a supper will be served for the judge.

MR. W. W. LONG IN ANDERSON SATURDAY

INSPECTING GRAIN MARKET FACILITIES AND THE GRAIN ELEVATOR.

WHEAT MUST BE DRY

Says That Farmers Need Not Expect to Get Good Market Price If Wheat is Wet

Mr. W. W. Long, state agricultural agent, spent yesterday in Anderson inspecting the marketing facilities here for the handling of the grain crop.

Yesterday morning, accompanied by members of the local chamber of commerce, he inspected the plant of the Carolina Grain & Elevator company and the Burriss Milling company, and also a large amount of wheat stored in a private warehouse. He also held a conference with Furman Smith, the seedsman.

He expressed it as his opinion that the South Carolina oat crop would not begin to move until 10 days or two weeks, and that from that time the movement would be swift and rapid and would not last over 50 days. He seemed to think that the Texas oat crop which is competing with the Carolina product strongly at present in the upper city markets, would have probably spent itself within the next 10 days and by the time the Carolina grain got on the market strongly, would give the Carolina grain a preeminence.

Mr. Long stated, however, that a party in Batesburg last week sold 1,500 bushels of grain on the Augusta market, f. o. b., Batesburg for \$1,800 cash and that a great deal of wheat is moving from that section of the state, but that the mills in the upper section of South Carolina, particularly in Greenwood, Spartanburg, Greenville and Anderson, ought to be able to take up at least 50 per cent, and probably 100 per cent of the wheat.

Mr. Long stated that he wished to impress upon the people the fact that the wheat must be dry else there will be no market for it.

ROLEY CATHARTIC TABLETS

TWO SCHOLARSHIPS TO CLEMSON COLLEGE

DATE OF EXAMINATION JULY 9—AGE LIMIT IS 18 YEARS.

MANY INTERESTED

Supt. Felton Will Distribute Papers Telling All About Subjects and Course.

The examinations for the scholarships at Clemson College this year will be held July 9. The following letter, received by Mr. J. B. Felton, county superintendent of education, tells all about the scholarships and is self-explanatory.

"The date fixed by the state law for holding the scholarship examinations for Clemson College is Friday, July 9, 1915. All the necessary papers will be sent you at least ten days before that time.

"The one year scholarship in the one year agricultural course will be open to your county as usual this summer. This particular scholarship is open only to young farmers 18 years of age and over. There are 51 of these scholarships—one from each county and one from each congressional district. The boys in your county will therefore have a chance at two scholarships in the one year agricultural course. The one year agricultural course begins October 1st and ends June 1st.

"Each county has as many four year scholarships as it has representatives in the general assembly. Vacancies in these scholarships occur in the various counties when a beneficiary graduates or drops out of school for some other cause. It is impossible to tell for another week yet the exact number of these four year vacancies. It may be that some scholarship student from your county will fall in his class work and in this event he will lose his scholarship. It seems now that there will be two vacancies in your county.

"We are sending you some scholarship application blanks and ask that you please hand these to any boy in your county who might ask for them. It is our desire to make the holding of the scholarship and entrance examinations a little trouble to you as possible."

ANDERSON COUNTY MAN'S INVENTION

SAMPLES BEING CAST AT ANDERSON FOUNDRY FOR DISPLAY.

NUT AND BOLT LOCK

Will Prove Invaluable to Machinists and Very Useful in Preventing Accidents.

What may prove to be one of the most remarkable inventions since the origination of the patent office may be that perfected by an Anderson county man, Mr. Odelle King, of Sandy Springs, who seems to have invented a safety nut and bolt lock. Mr. King has associated with him Mr. T. H. Fox, a patent expert formerly of Atlanta but now of Greenville, and showed the new device at the rooms of the local chamber of commerce yesterday. The first patent papers have been received together with drawings of the invention.

The purpose of the invention is to forever do away with the old nuisance of losing the tap of a bolt and, if successful, will prove of inestimable value to machinists and will also probably be the means of preventing numerous accidents which are sometimes traced to the loosening of a tap.

Mr. King is spending a few days in the city and is having a few samples of his invention cast at the Anderson Foundry company. When finished he will place these on display in different sections of the country. The device, or bolt, is so made that it is impossible for the nut to work loose, this being so because of the way the threads inside the tap are made. Mr. King states that he is considering the offers of several manufacturers and before long will make a contract with some of them for the making of the bolts.

Mr. King is the son of Mr. H. R. A. King and is a young man of about 24 years of age. While in the city he is stopping at the Bellevue hotel.

Running the Pipes Bores Building is Framed.

Waiting for the plumber to get out of the way is one of the most common causes of delay in house building, as carpenter work often has to stop while pipes are being run, or be done over after the plumber is through. In California, where many bungalows are built without basements, an enterprising plumber has devised a way of avoiding these troubles and of getting his own end of the job done quickly. Working from the blueprints, he erects all the piping before even the frame of the building is up, leaving nothing to do but place the fixtures, which can be done after the carpenters are all through.—From the July Popular Mechanics Magazine.

SUMMER SCHOOL WILL BE LARGELY ATTENDED

ABOUT 100 TEACHERS HAVE SIGNIFIED THEIR INTENTION OF COMING.

BEGINS ON JULY 5

And Will Be Conducted in West Market Street School Building—List of Teachers.

Mr. J. B. Felton stated yesterday that everything was being put in readiness for the teacher's summer school which will begin on July 5. He stated that he had received letters from approximately 100 teachers in the county who had signified their intention of attending. Many more are expected to be heard from.

As was stated some days ago, the West Market street school building has been selected for the school as the desks there are more suited to the comforts of the teachers. Many of these who will attend have already secured their boarding places but to those who have not, Supt. Felton says he will be glad to assist them if they will write to him. Many teachers of the county will make the trip to and from the school from their homes every day.

The teachers in the school are as follows:

Professor J. B. Watkins, principal. Professor M. E. Bradley, agriculture, civics and modeling.

Miss Nell Summerett, English, grammar and composition.

Miss Lenora Hubbard, primary methods and drawing.

D. GEISBERG STORE IS BEING REMODELED

New Ceilings and Partitions Being Put in—Cases to Keep Clothes In.

D. Geisberg, the wide-awake ready to wear concern, are making arrangements to remodel the second floor, in order to better serve their customers this fall.

They are having a new ceiling put in and a partition half way the length of the building is to be put in separating the front part of the room from the rear where surplus stock will be kept. In the front room, handsome wall cases will be installed, taking the places of the old style racks. This will give them more room for display and at the same time afford room for taking perfect care of their ready-to-wear garments, keeping them in perfect condition at all times, easily pulled out and shown, and then pushed back out of the just and dirt that is always flying from the busy street below.

In every way the remodeling will be quite an improvement, not only to D. Geisberg, but to Anderson.

DEATHS

MR. E. T. BRAY

Died in Hospital Yesterday—Was 67.

Mr. E. T. Bray, aged 67, died yesterday morning at 9:30 at the Anderson hospital where he had been for the past month. An operation was performed as an effort to save his life but death followed soon after.

Mr. Bray is survived by nine children, one of which is Mr. W. E. Bray of this city. The other children live in Georgia. The body will be taken to Gainesville, Ga., today for interment.

Marcus L. Campbell.

Mr. Marcus L. Campbell, aged 64 years, died last night at 7 o'clock at his home near Prospect church, west of Anderson. He had been ill for four weeks, the immediate cause of his death being paralysis.

Funeral services will be held this afternoon at 1 o'clock at Prospect church, conducted by the Rev. W. B. Hawkins.

Mr. Campbell was a son of Mr. and

Mrs. George Campbell. He is survived by his wife, who was Miss Julia Snipes, and three children: P. W. Campbell, M. M. Campbell and S. O. Campbell. He was a member of Prospect church.

John Henry King

John Henry, four months old child of Mr. and Mrs. J. H. King, died yesterday afternoon at 4:30 o'clock at the hospital. The family lives on Q street, Brogan mill village.

Interment will be made in Silver Brook cemetery this afternoon at 3 o'clock.

Mrs. Belle Rowland Thompson.

Waltham, June 19.—News reached here this morning of the sudden death of Mrs. Belle Thompson Rowland, at her home in Taylorville, N. C. Mrs. Rowland was a daughter of the late Col. Robert A. Thompson, and a sister of Miss Hadie Thompson, who resides at the Thompson home in Waltham. It has not been announced where the remains will be interred at Waltham or in Charlotte, N. C. Mrs. Rowland was born and reared in Waltham, but since her marriage has resided in North Carolina. She has been a frequent visitor to her old home, and the news of the death was a distinct shock to relatives and many friends here.

FLIES At the HEAD of the DEATH RATE

KILL THEM—wage the war of extermination relentlessly and thus protect your home and family from the ravages of these disease and filth bearing pests.

SHEPARD'S HOUSE FLY DRIVER AND INSECT EXTERMINATOR

will positively kill all flies, mosquitos, moths, gnats, ants, roaches, bed bugs, fleas and other insects. Harmless to human beings, but sure death to insects and vermin.

PROMINENT HEALTH OFFICIALS ENDORSE AND RECOMMEND IT.

At a recent test at Washington 500 flies were liberated in a room 12 x 20 feet and fumes from a bottle of Shepard's House Fly Driver and Insect Exterminator were sprayed in the air. After a few minutes every fly in the room was dead. The room was then occupied by A. L. Murray, M. D., Supt. of Health, Washington, D. C., and O. H. Poppe, U. S. Dept. of Agriculture.

Test your own self and family protection against disease carrying insects. Don't wait until it is too late. If your dealer cannot supply you write
