Partly cloudy Sunday; local howers Monday.

"IF YE LOVE ME_"

It is the morning of the one day out of seven that many of us set aside as a day of idleness from our own little cares that send us spinning around within our own little spheres like so. many little tops for six days in the who day, toiling, fretting, scheming, cursing, cheating, abusing one another, oppressing those whom we could oppress, doing obcisance to those who have it in their power to oppress us, planning, hoping, lowing a little, praying a bit, perhaps when we had nothing to do, and a lot of other things just like other men have been doing through countless years. But the big-

"The Store with a Conscience"

Review of First Year Of European Conflict

(By the Associated Press.) The second year of the European war opens today. On August 1, 1914, Germany declared war against Russia and the last chance vanished of localizing the Austro-Serbian war, declared three days previously by Austria-Hungary. All the great powers of Europe

were drawn into a struggle the like of which history has not heretofore recorded. Eleven nations are at war and almost all lands are affected, diyear was very successful, but Mr. rectly or indirectly. Millions of men Ford says that owing to the un ettled have been killed, wounded on carried to captivity in hostile countries. Bil-lions of dollars have been expended. Thousands of square miles of terri-tory mays been devastated and hundreds of cities and towns laid waste

Half the world is in mourning for the dead. And although the war, has been in progress with unexampled cead. And although the war, has been in progress with unexampled fury for a year, the result may be summarized in one brief sentence: No decisive results have been achieved and the end is not in sight. Determination to pursue the war to a decisive ending has been expressed by high officials of all the belligerent

nations, preparations are being made for next water's campaign, and, in for next water's campaign, and, in fact, indications from Europe are that it is more likely to increase in size rather than decrease. It is still an

past it has been calculated that the proportion of killed to total casualties runs 1 to 8 or 1 to 10, the pro-portion in trench warfere, as indicated by official British statistics, is about 1 to 5. The battles on the plains of Flanders, on the Warsaw front, in the Austro-German advance through Ga-

tributed to this end. Whereas in the

licia and in the Carpathians were at-tended by frightful slaughter. Rus-sian losses in the Carpathians alone were estimated unofficially at 500,000. Along the battlefields from Arras, in northwestern France, to the Belgian coast whole fields have been covered with corpses, and at the time of the German attempt to reach the English

Channel the Yser Canal was choked with the dead. According to official British statistics, the British army alone has been losing of late, in kill-ed, wounded and missing 2,000 a day. Ced, would see and missing 2,000 a day. On June 9 Premier Asquith announ-ced that British casualties since the beginning of the war (excluding naval losses of 13,549 up to May 31) amounted to 258,069, of which the to-tal killed was 50,342 tal killed was 50,342. Later, however, on July 27, Mr. As-

truction of property on land and sea has run high into the millions. Great losses are being occasioned by the cessation or curtailment of many forms of productive industry. The energies of the world have been largely diverted to making war. Factories of all sorts have been turned over to the making of war munitions, men taken from mill and field, to, be replaced by women, old men and child-ren. Economists assert that or generations to come the world will feel the effect of the huge losses, in the burden of taxation and otherwise, and sociologists make conflicting predictions as to its moral, physical and psychological effect on generations living and to come

Neutrals as well as belligerents have been affected. The financial stringency which followed the out-break of war was world-wide. The United States, in common with other neutrals have been conferenced with neutrals, have been confronted .with the threatened abridgement of its rights, particularly at sea, and has sent notes of remonstrance to Eng-land and Germany, the complications with the latter country following the sinking of the Lusitania giving especial concern.

The war has been attended with many unexpected features, one of which is its protraction. It had been one of which is its protraction. It had been believed that such a struggle would be of comparatively short duration, on account of the cost and loss of life it would entail. At the outset it was commonly said that within less than

a year the nations involved would be

on by the company during the past

year was very successful, but Mr.

has been that all-important, all-absorbing and preeminently important business of "looking out for Number One," and by "Number One" we mean "me and mine" or myself and those in who I am directly and vitally interested.

And on this morning of the seventh day most of us will repair to rome church, and there we will go through a certain ritual-the mumuring of prayers, the singing of hymns, the repeating of passages of Scripture which have been collected and printed all together on one page of a phamplet, and listen to a discourse by the minister. Yes, that is as much as some of we see in this divinely ordered date of worship; and there are some of us who believe that that is all tauqua came to a close on Friday and there is to this business of living the from all account it was successful christian lfe. open question whether Buigaria, Ru-mania or Greece will be drawn in. In view of the immensity of the struggle, previous standards count for little in considering the price the world is paying. The figures involved are so vast as to convey little mean-ing. The nations at war have poured out their treasures of men and gold

without limit. The usual standards of life have been subordinated or disregarded, and in some cases social, in-dustrial and political activities have cr, said Germany's potential man-hood for actual fighting probably had been vrtually reorganized on a mili-taristic basis, to make all contribute diminished from all causes by nearly one half in the first year of the war, to the supreme necessities of war. It is impossible to obtain accurate one half in the first year of the war, and asserted a conservative estimate was that Germany had much nearer 4,000,000 than 3,000,000 men perma-nently out of the field. Estimates of the total casualties run from 5,000,000 to 8,000,000 with the former figur; probably conservative. statistics of the number of men engaged, the casualties and the cost. For obvious reasons the size of the various armies is kept secret. of the nations do not consider it expedient to reveal the number of cas-ualties; in fact, Great Britain is the

The cost in money runs to a simi-larly huge total. Great Britain is only one which has given out official totals. As to the money expended, larly huge total. Great Britain is now spending about \$15,000,000 a day on the war, according to Premier As-quith. Albert Metin, general budget reporter of the French Chamber of Deputies, calculates the war is cost-in France \$10,000 a minute, or \$14,-400,000 a day. William Michaelis re-cently estimated the daily cost to Germany at 38,250,000, saying forty days of this war cost as much as the whole Franco Prussian war of 1870-1.-- In March Dr. Karl Heiffer-ich, Socretary of the Imperial Treas-nry of Germany, said the war was costing all beiligerouts \$375,000,000 a week. On the basis of Dr. Heifferich's there are available only artial statis-More than half the population -

the world lives in the countries" the world lives in the countries et war. The population of the warring countries is estimated roughly at 947,000,000, and of the countries at peace at 797,000,000. The population of the Entente nations is perhaps five times as great as that of their oppo-nents. The number of men under arms has been estimated variously, usually in the neighborhood of 30, 000,000. William Michaelis, writing vacanity in a Berlin margine, put recently in a Berlin magazine, put the number of soldiers at war at 21,-770,000; for the Allies, 12,820,000 for

Germany, Austria-Hungary and Tur-key 8,950,000. No previous war has approached

On the basis of Dr. Helfferich's estimate, the first year of the war cost the stapendous sum of \$11,500,000,-600. Mr. Michaelis puts the figure at 15 billion dollars, not including Italy's expenditures a sum more than the present one in wholesale destruc-tion of life. This is due not only to the number of men involved, but to the terrible efficiency of modern wea-50 per cent. greater than the gold production of the world during the last 500 years. Other estimates run still higher, to 20 billion dollars or pons. Trench warfare on a great scale, with its deadly charges, mining operations and extensive use of ar-tillery and hand greasden, has con-

nore. In addition to the money expended directly on the car, the loss in des-

reason. While each side has won its first statement was based on misinvictories, no final results have been reached in an yof the campaigns, with formation which he has subsequent-

Russia, by reason of their larger arm-ies, have been far greater. The Her Und Politik of Berlin early in Junc estimated that more than 5,000,000 Germany, and the countries at way with facing, each other in the same posit-lons as last September. Movements on the eastern front have been wider, Germany and her allies have been killed, wounded or captured. Hall-aire Belloc, the English military writbut with no signs of an approaching

decision. The Gorman plan is generally assumed to have been to deal first with France, in the early weeks o fibe war before the Fussian arms, slower to mobolize, was able to present a ser-lous menace; and then to turn on Russia. The flerce resistance of Bel-gum and the unexpected quick mobi-lization of both the French and Russian ization of both the strench and stus-sian armies prevented the full full-ion of this plan. Nevertheless Ger-many has been able to hold her own on both the castern and western

fronts. In reality the struggle of the elever

In reality the atruggle of the blown nations is divided into a number of separate wars, related to flack other in only a general way. The whole field of military operations may be summarized as follows: In France and Belgium Germany is

In Prance and Belgium Germany is batting with Great Britain. France and Belgium. In August Germany invaded Belgium and France, pushing southward almost to the gates of Paris. Following the battle of the Marne, perhaps the most important contest of the war thus far, the Ger-mans were compelled to retreat and have since held an entrenched line from the Belgian coast to Alsace, re-taining possession of northwestern France and most of Belgium. In this treatre the war has been so even that the capture of group of houses or a few yards of trenches has been con-sidured a victory worthy of mention in the official resorts. The German attempt to break through the English channel; the British victory at Neuvo Chappelle, the German triumph at On the basis of Dr. Heifferich's
