WILL PROBABLY PAVE MANNING STREET TOO

MATTER DISCUSSED BEFORE MEETING COMMISSION YESTERDAY

MAY HAVE MONEY

To Do This Work After Other is Finished--Petition Was Filed Several Weeks Ago.

At the meeting of the paving commission held yesterday afternoon at 5 o'clock it was decided to pave Manning street after the work already mapped out was finished, provided there was money enough left.

Some time ago the property owners on Manning street signed and filed with the commission a petition asking that the street be paved. Finances were discussed yesterday afternoon and it was decided that in all probability there would be enough money to do this work. The property owners will of course be assessed and the bonds will be sold in regular order. Several days ago Sidney Spitzer company of Toledo, O., who bought the first batch of certificates, wrote asking if the city would have any more to sell. Since bonds are not bringing as high premium as they did a few days ago, and those in Anderson sold at such a high price, it was decided to notify them that the city would likely have some more to sell in a few weeks. The matter of paving Manning street will be taken up before city council and the regular proceedings gone through with before anything definite will be known.

Resolution. The following resolution was adopted at the meeting:

Whereas, the city has incurred the expenses of the city engineer for his services to the paving commission.

Resolved, that the treasurer of the commission is ordered to pay to the city treasurer the sum of \$200 to reimburse the city in part for the amount paid by the city for services of the city engineer.

BEGIN LAYING BRICK SOUTH MAIN STREET

CONCRETE FORCES WILL TURN DOWN RIVER STREET

ASPHALT CREW

is Now Idle Since Church St. Finished and Will Assist in Brick Work--Resume of Paving.

Sometime during the day the laying of the brick on South Main street will begin. City Engineer Sanders stated yesterday afternoon that the sand covering over the concrete would be put down followed immediately by the brick.

The work will start at River street and come north until Church street is reached. The asphalt plant will now be shut down for about ten days or two weeks and this crew will be put to laying the brick.

The concrete force which has been at work on South Main has reached River street and will turn down River street today. That part of South Main on the east side of the car track from River to Church will be let alone until that section on the west side has been finished with the brick, so as not to hinder traffic any more than possible.

The asphalt crew finished Church street yesterday afternoon about 4:30 o'clock, thus catching up with all of the work to be done by them at present. In about two weeks they will go to River street and after finishing there they will go to Greenville street if it is ready. If Greenville is not ready, the crew will go to West Whitner. City Engineer Sanders stated yesterday afternoon that all of the asphalt work would be carried right ahead as fast as possible in order to get it done before bad weather set in. From the present plans North Main will be the last street paved in the work already decided upon by the paving commission.

Paving Finished. Up to date the following streets have been finished: West Market, McDuffie, Calhoun and Church. On all of these streets about 40,000 square yards of paving have been put down.
