

OPEN INDUSTRIAL LABORATORY HERE

WILL ENGAGE IN MANUFACTURE OF, COCOA, BAY RUM, ETC.

ANDERSON MAN

Will Be Manager of Plant—Formerly With Southern Bell Telephone Company.

Word has been received in Anderson to the effect that Messrs. John A. Thompson, and Lewis A. Smith are to return to Anderson from the Canal Zone and open an industrial laboratory in this city. They left Cristobal Saturday and will land in New York city some time next week. They are expected in Anderson about the 22nd of this month.

The laboratory is to be opened for the manufacture of cocoa, cooking oil, vinegar, bay rum, denatured alcohol, and other extracts and products. Both of the young men have been engaged in the industrial laboratory of the government in Panama and both have lots of practical experience. Mr. Thompson will be the manager of the plant and Mr. Smith the chemist. Mr. Smith has about 10 years experience in this line of work.

Mr. Thompson was cashier of the Southern Bell Telephone office here for several months, and left Anderson about the first of this year. He and Mr. Smith has a great number of friends in Anderson who will be glad to hear of their return to the city and wish them every success in their new enterprise.

The Era of the Silo.

(From The Wall Street Journal.) In the evolution of American agriculture the years between 1910 and 1920 will properly be designated as the Era of the Silo. Until this source of cheap feed supply came into use livestock as a factor on the farm depended largely on producing cheap corn. But corn at 50 cents a bushel or more is too much of a luxury for feeding and fattening animals on the farm unless their destination is the market where prices must cover the cost of production. The silo not only takes care of the corn which does not reach the normal grade of maturity, but it releases millions of bushels more for the market. It turns the millions of waste fodder into a feed of highly fattening quality. In other words, the silo is the fortress by which the American farm restores and develops the fertility of the farm acres to produce productive-ness.

AWARD MEDAL TO MOST POPULAR YOUNG LADY

UNIQUE AFFAIR AT CENTENNIAL CELEBRATION AT PENDLETON

ANNOUNCE PLANS

Next Tuesday Morning When the Great Celebration Opens—Live Stock Exhibits.

Editor The Intelligencer: The latest is that the Pendleton Farmers' society will award a Centennial celebration medal to the most popular young lady attending the celebration at least one day. Candidates and terms of voting will be announced early Tuesday morning by Mrs. Seawright at Seawright's Furniture store, near the speaker's stand. This contest promises a great deal of interest and amusement to the young people and the souvenir will be a relic of value to the winner.

The town is quite busy brightening up, and many things are about promise to give the visitors a joyous welcome to the celebration. Prof. Shields, in charge of the livestock and dairying departments of Clemson college will be in charge of the live stock demonstrations all three days of the celebration and was one of the most impressive illustrations in favor of pure cattle breeding.

Miss Jayne Carlington has a very pretty corner in the Farmers' hall partitioned off for the Tomato club demonstrations which will be a very attractive and educational feature and will tend to the schooling of household improvement, which is all important to every home of the land.

J. C. Stribling, Pres.

How to Measure Distance on a Map.

(From The Outing Magazine.) Distance on a map is measured by its "scale." If the scale is 1-62500, as in the case of the well known United States geological survey maps, it means that one inch on the ground, which number is the approximate number of inches in a mile. Therefore, the scale is roughly one inch to a mile. If the scale is 1-40000 the scale is approximately an inch and a half to a mile. By laying a rule on the map and ascertaining the number of inches between two points one can calculate the number of miles between them. As the inch is the common unit of measure in the United States by which the eye is accustomed to judge distances on paper, almost all maps are drawn to a scale representing one, two, three or more miles to the inch.

THE FIRST NUMBER OF LYCEUM COURSE

WILL APPEAR AT ANDERSON COLLEGE NEXT SATURDAY

GOOD ATTENDANCE

Is Expected, Although Other Entertainments for That Night Are Being Planned.

The first attraction of the Anderson College Lyceum course will make its appearance in Anderson next Saturday evening, October 16, in the college auditorium. It will be the L. A. C. Orchestra with eight pieces and comes to this city most highly recommended.

It seems very unfortunate that this number will appear next Saturday night since that being the day of the Clemson-Auburn football game, other entertainments in which the town people will be interested are being planned. One of the entertainments will be a dance, or will probably, be since a committee has been appointed to arrange for one. In addition to this there will be a performance at the Anderson theatre. Dr. Kinard stated yesterday that he thought that it would be impossible for the date of the lyceum number to be changed.

However, there will be a good attendance at the college on that evening. Many tickets have already been sold and a great many will attend because they have already purchased these. Then again, the quality of the attraction will be great enough to cause many to attend even if there are several other entertainments in the city that night. It would be best if the orchestra could come on another night, but since it cannot, the attendance is expected to be good just the same.

Other numbers which have been arranged at Anderson College this season are: The Metropolitan Grand Quartette, Dr. T. P. Blaxton, United States Commissioner of Education, Scooney-White recital, Ralph Parnette, humorist lecturer, Danaway company, in the "Lady of the Decoration."

LANDER COLLEGE

The college work is proceeding steadily. The few cases of homesickness are about over and the student body is working with a will and good humor.

On last Saturday night the Y. W. C. A. gave a pleasant reception to the new students. It was greatly enjoyed. On Monday night the new teachers were entertained by the faculty. It was a veritable banquet and a most delightful occasion. Again on Oct. 7th Mrs. George C. Hodges, Jr., entertained the members of the faculty who were serving at the time she taught at Lander college. She reported a very pleasant evening.

As a sharp contrast to these functions was the call of Miss Mary Newton to the funeral of her father, the late Gen. H. H. Newton of Bennettsville. She had the sympathy of the entire college home and appreciative associations were passed.

Rev. R. O. Lawton spent last Sunday at his old charge, North Augusta, and Dr. Wilson preached at Vordery on the same day. Among recent guests at the college were Mr. M. Carso of Portsmouth,

Va., and Miss Mattie McLees of Dillon on last Saturday and Sunday.

The Lander club organized on October 4th, and Mrs. Alexander was elected president. The club is now actively engaged in preparing for the lyceum course which begins with an entertainment by the Carroll Glee club on October 15th. Four other fine numbers have been engaged and the college and community will have the usual pleasure and profit afforded by the lyceum.

On Sunday night, September 27th, the opening sermon was delivered by Rev. W. C. Owens. It was an able discussion of Sunday school.

HEAVY MEAT EATERS HAVE SLOW KIDNEYS

Eat less meat if you feel Back-achy or have Bladder trouble.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which clogs the kidneys, they become overworked from the strain, get sluggish and fail to filter the waste and poisons from the blood, then we get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, dizziness, sleeplessness and urinary disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, stop eating meat and get about four ounces of Jad Salts from any pharmacy take a tablespoonful in a glass of water before breakfast and in a few days your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate the kidneys, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder weakness.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active and the blood pure, thereby avoiding serious kidney complications.

Saving Anyway.

O'Brien—So the landlord lowered the rent for yez. He'll save money at that.

Casey—How so?

O'Brien—Shure, it's less he'll be losin' when yo don't pay it.—Punch.

Debon—"What does Blifkin remind you of?"

Hobson—"Well, every time I meet Blifkin he reminds me of a little debt I've owed him for over a year."—Wall Street Journal.
