# FOOT-MOUTH DISEASE

LIST OF SALES DR. MITCHELL COMMENTS ON RAPID SPREAD AMONG CATTLE

### INFECT HERD IN DAY

Also Says Many Head of Stock Are Imported Which Are Hever Inspected.

Commenting on the decrease of the foot and mouth disease in America Dr. Mitchell, one of the leading veterinary surgeons of Anderson stated last night that he has received an order from the Veterinary Commit-tee of Clemson college in regard to the importantion of cattle and live-stock from regions now infected by the diseases. The regulation reads

the diseases. The regulation reads as follows:

"It is hereby ordered that the importation into the state of South cattle, sleep, other ruminants of swine originating in any part of the state of Illinois for any purpose is hereby prohibited and also the importation of anti-hog cholera serum or views from this giata.

virus from this state.
"Effective on and after October 23,

Dr. Mitchell was speaking about the rapid spreading of this disease and said that secretion from the mouth of any infected animal may spread the disease through an entire herd in one

He also stated that the laws of South Carolina about bringing in cat-tle from other states are very rigid and they are good, but owing to the fact that many hundreds of cattle and horses are brought into the state each year over the state lines and are not examined, the laws are not very useful. "I have often seen a number of cows or horses and sometimes hogs being brought across the Savannah river into South Carolina and into Anderson courts, when I have the river into South Carolina and into Anderson county, when I knew they were not being inspected. This may be all right, but it looks bad. The laws are good and are against this. They should be enforced. The cattle way or may not be dispased."

tle may or may not be diseased."

There is a lot of truth in what Dr. Mitchell says. Numbers of cattle are brought into South Carolina without an inspection, and most of them are usually all right, but that is a mighty good way for a tubercular cow or how to come into a community that is now free from disease. free from disease.
