It was our fault and our very great fault, and not the judgment of heaven,

We have an army in our image on an island nine by seven,

Which faithfully mirrorred its maker's ideals, equipment

and mental attitude, And so we got our lesson and we ought to accept it with grati-

We have spent some hundred million pounds to prove the fact once more

That horses are quicker than men make four.

And horses have four legs and men have two legs, and two into four goes twice,

And nothing over except our lesson and very cheap at the price.

It was our fault and our very turn it to use, We have forty million reasons for

failure, but not a single ex-So the more we work and the less we talk the better results we

shall get. We have had an imperial season; 11th-18th, Southern Railway anit will make us an empire yet.

Wind Mills and Progress.

It is interesting in this age of new ideas, when steam and electricity are so much in evidence, to notice how some of the older methods, of obtaining power are still profitably employed. Take for example the use of the windmill. Nobody knows when this useful device was invented. It is rumored that the old Romans knew of its use, and there is another story that the Saracens in-troduced it into Europe. But ticket. Dates of sale August while the early history of the 24th to 28th inclusive, final limit windmill is shrouded in uncertainty, we do know that it came to play so important a part in the little Kingdom of Holland as to be considered a national necessity in keeping that courageous nation out of the hands of the sea.

In Holland wind-mills are used to get rid of the water; in America they are employed to produce it. Out on the Great Plains in address any agent of the South-Konsas, Dakota, Iowa and the ern Railway. adjoining States, an ideal place for wind-mills, where the country lise At, and the winds sweep uninterrupted for miles, the landscape is fairly dotted with them. They are all sizes and kinds, some tall and graceful, others placed low and resembling huge paddle wheels with the lower half housed, monthly report of the statistician and the upper half catching the of the department of agriculture wind.
