Napoleonic Revolutionary Specialist Joins Faculty

By MARIO BEGUIRISTAIN
Staff Writer

An amusing caricature of a big-headed man on a horse covers the door of room 116 in Currell College.

The man is wrapped in a scarf and wears an odd-shaped hat which immediately identifies him as Napoleon.

The door opens into the office of Dr. Owen Connelly, a new member of the University's history department and a specialist in the French Revolution and the Napoleonic period.

Dr. Connelly received his Ph.D. at the University of North Carolina and taught there before coming to USC.

Teaching a course in the French Revolution and the general freshman history course, Dr. Connelly finds that the Uni-

versity's choice of textbooks is one of the best when compared to what other schools are using.

He would be very much in favor of increasing the history requirements for most majors, specially on the field of European history since he says many of the problems we face today are not unique, but have occurred in history innumerable times, and modern man has much to profit from whatever decisions our predecessors made in the past.

Dr. Connelly pointed out that the college student is expected and

obliged to become a leader in our society, and in order for the student to be able to function adequately as a leader, a comprehensive knowledge of history is mandatory.

He has written and published two books on the subject: "Napoleon's Satellite Kingdoms" and "The Gentle Bonaparte," a biography of Joseph, Napoleon's elder brother.

He also contributes articles for the Encyclopedia Americana and is in the process of writing a textbook for college level.

DR. CONNELLY

USC Faculty Exhibits Art

About 40 recent works by faculty of the Art Department are on display in Huntington Gallery of McMaster College.

Most of the paintings, prints, sculpture, drawings, ceramics and crafts in the exhibit were done during the last year.

J. Boyd Saunders, instructor of art, is director of the exhibit.

Saunders describes the display as "running the whole gamut of artistic attitudes, disciplines, backgrounds and materials."

The show is not devoted solely to either traditional or modern work but is noteworthy for its "lack of consistency," Saunders said.

Several new members of the USC Department of Art faculty will be exhibiting in the show, which continues through next Friday.

Huntington Gallery is open Monday-Friday, 8 a.m.-9 p.m.; Saturday, 8 a.m.-6:30 p.m.; and Sunday, 2 p.m.-9 p.m.

Tindall Posted On Two Boards

Dr. Ralph H. Tindall, professor of psychology, has been appointed to two national committees of the School Psychology Division of the American Psychological Assn. (APA).

One committee will guide the establishment of national accreditation of graduate training programs in school psychology and the other will establish diplomas in school psychology through the American Board of Examiners in Professional Psychology.

The APA Board of Professional Affairs has authorized accreditation and the establishment of diplomas as a means of improving standards in school psychology.

Dr. Tindall coordinates the training program in school psychology at the University.

USC Journalism School Growing

By CYNTHIA CAPPS
Staff Writer

The school of journalism has been, it seems, the target of cuts, bantering, and the brunt of rising Carolina comedians' jokes.

It may be about time these clever ones took a look at the school and realized it's a fast-growing part of the University curriculum.

The fastest-growing area within the department is the broadcasting sequence which has seventy students.

The graduate program has three times as many (23) graduate students as it did three years ago.

As a whole the school has increased enrollment from 246 in 1965 to 321 in 1967.

One of the biggest activities of the school is public service.

Each year "task forces," composed of a professor and graduate students, are sent out to spend a day at various high schools, helping them "iron out" problems they have in their publications.

During the '66-'67 school year, task forces helped newspapers in

the high schools of twelve SC cities.

It's also the headquarters for the South Carolina Press Association, made up of the state's weekly and daily newspapers.

Each year, in cooperation with the SCPA, the school holds a number of clinics, workshops, and other meetings. This year 850 participated in the various conventions and clinics held during this summer.

The South Carolina Broadcasters Association has also established its headquarters at Carolina's school of journalism.

Last spring an audio tape network service was established by the School of Journalism. Programs were produced each week for radio stations throughout the state.

The project has received many favorable compliments from the stations carrying the program, and the school is now in the process of developing a fall program consisting of campus news, sports news, feature and sports interviews, and College of Business Administration and School of Nursing reports.

Not only are there radio programs, but the school has four

half-hour television programs produced by SC Educational Television, including "College Press Conference" and "University Forum."

At the moment, the idea of having a weekly program is being contemplated, to be entitled "Carolina Campus" and feature various news and interviews about the University.

In addition to being headquarters for two associations the school runs a summer internship program in the state.

Students take jobs on newspapers, radio and television stations, advertising agencies, government agencies, and other communications oriented businesses.

This year, the school has acquired three new professors; which, is not a 100 per cent increase in faculty as some believed.

Prof. Steve Yates recently obtained his Master's from the University of Alabama.

He's a member of Sigma Delta

Chi, the professional Journalist society, and Sigma Alpha Epsilon. He was editor of the Birmingham News, and managing editor of a paper in Tallahassee, Fla.

Mr. Yates has had articles published in several magazines, and has done research on magazine marketing.

Harry Ashley expects to complete his Ph.D. in communications at Southern Illinois sometime this year.

He has currently done research on the status and role of the weekly newspaper, and the high school student's attitude toward journalism as a career.

Ashley is particularly interested in the history of journalism, photo editing, and introduction to mass communication.

For eleven years he was a staff member of the University of Kentucky School of Journalism, and assistant director of the Kentucky Press Association.

Dr. Lee Dudek received his Ph.D. at Northwestern University.

Tuesday, October 31, explore an engineering career on earth's last frontier.

Talk with Newport News On-Campus Career Consultant about engineering openings at world's largest shipbuilding company—where your future is as big as today's brand new ocean.

Our half-billion-dollar backlog of orders means high starting salary, career security, with your way up wide open. It also means scope for all your abilities. We're involved with nuclear ship propulsion and refueling, nuclear aircraft carrier and submarine building, marine automation. We've recently completed a vast oceanographic ore survey. We're a major builder of plant water power and heavy industrial equipment. We're starting to apply our nautical nuclear know-how to the fast expanding field of nuclear electric power generation. We're completing competitive systems designs for the Navy's \$1 billion plus LHA fleet concept.

Interested in an advanced degree or research? We're next door to Virginia Associated Research Center with one of the world's largest synchrotrons, offering advanced study in high energy physics. We're close to Old Dominion College and University of Virginia Extension Division, where you can get credits for a master's degree, or take courses in Microwave Theory, Solid State Electronics, Nuclear Engineering and other advanced subjects. Ask about scholarships, tuition grants, study and research leaves to implement these opportunities.

Ask, too, about the pleasant living and lower living costs, here in the heart of Virginia's historic seaside vacation land, with superb beaches, golf, fishing, boating, hunting.

IMMEDIATE ENGINEERING CAREER OPENINGS

- Mechanical Engineers
- Electrical Engineers
- Marine Engineers
- Industrial Engineers
- Systems Analysts
- Naval Architects
- Nuclear Engineers
- Civil Engineers
- Metallurgical Engineers

See our representative
Marion Vaughan
Tuesday, October 31

He'll be at the Placement Office to answer questions, discuss qualifications, take applications for fast action.

Newport News
NEWPORT NEWS SHIPBUILDING AND DRY DOCK COMPANY, NEWPORT NEWS, VIRGINIA
An Equal Opportunity Employer.

These U.S. Air Force officers are getting what they want out of life. You can be one of them.

What are they doing? They are performing a job of importance. Hour after hour. Year after year. Many of them will serve for 20 or more years. The fruitful part of a man's life. Will yours be fruitful and creative? Or just spent?

You're going to college to do something constructive, important. And you can be sure of it, in the U. S. Air Force.

Start now in the Air Force ROTC program on your campus. Your Professor of Aerospace Studies will explain the variety of career opportunities. Pilot. Navigator. Engineering. Science. Administration.

If you get in on it, you get paid to be part of the most exciting technological breakthroughs of all time. You'll become a leader, an officer in one of America's most vital organizations... the U. S. Air Force.

You can be part of the Aerospace Age when things are most exciting... at the begin-

ning. While you serve your country, the whole universe will open up to you.

There's a 2-year Air Force ROTC program, and the 4-year program has new attractive financial assistance provisions.

Lots of men waste their working years. But you don't have to be one of them.
