For the cure of woman's peculiar weaknesses, irregularities and derangements, giving rise to frequent headaches, backache, dragging-down pain or distress in lower abdominal or pelvic region, accompanied, oftentimes, with a debilitating, pelvic, catarrhal drain and kindred symptoms of weakness, Dr. Pierce's Favorite Prescription is a most efficient remedy. It is equally effective in curing painful periods, in giving strength to nursing mothers and in preparing the system of the expectant mother for baby's coming, thus rendering childbirth safe and comparatively painless. The "Favorite Prescription" is a most potent, strengthening tonic to the general system and to the organs distinctly feminine in particular. It is also a soothing and invigorating nerve and cures nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, chorea or St. Vitus's dance, and other distressing nervous symptoms attendant upon functional and organic diseases of the distinctly feminine organs.

Nonmagnetic Ship.

Odd Construction of the Carnegie For Studying Compass Variations.
The Carnegie Institute is having built at Brooklyn for the study of phenomena of magnetic variations an auxiliary craft of 668 tons displacement, in the construction of which less than 600 pounds of steel or iron will be used. The vessel will be called the Carnegie and will be used chiefly for the study of compass variations. The use of steel and iron has been limited to the greatest possible extent so that observations will not be affected by the compass deflection usual on modern steel ships.

Honor for a Mexican Hero.

The government of Mexico has voted an appropriation of \$50,000 for a monument to a humble hero—Jesus Garcia, a locomotive engineer. Garcia a year ago bravely hooked his engine to a burning car filled with dynamite and hauled it out of Nacazari, Mexico. He saved the town from disaster, but was blown to pieces himself.

Will Surely Stop That Cough.

Around the Whole World With Sixteen Battleships

REAR ADMIRAL ROBLEY D. EVANS.

THE return home of the American fleet from its trip around the earth ends the greatest battle-ship cruise in the history of the world. The distance covered has been approximately 43,000 nautical miles, or nearly 50,000 land miles, which if extended in a straight line would go twice around the earth at the equator. The time consumed has been a few days over fourteen months, the start having been made on Dec. 16, 1907, from Hampton Roads, and the trip ending at the same point and in the same battle-ship formation on Washington's birthday, Feb. 22, 1909. President Roosevelt reviewed the fleet on its departure and again on its return. During the entire cruise there was not an accident worth mention or an untoward event. The schedule followed before the ships started was followed throughout. At one or two points, notably Yokohama, there was a variation of a few days due to storms. The delay was made up easily, however, and on other legs of the journey the vessels had to loaf to keep from coming in ahead of time.

The good effects of the cruise it is impossible fully to measure, but enough benefits are already apparent to pay for the extra cost of the trip, as has been said from Washington. The way, has been only nominal, the chief item being coal. One more added cost has been in the transportation of food. Other outlays have been but little more than they would have been if the ships had remained at home. It is estimated that the increased cost in coal has been about \$1,300,000, as approximately \$65,000 tons have been burned, costing \$2,600,000, about half of which amount would have been required in home waters. Much of the extra expense was in transporting. Oil has cost approximately \$100,000 and food nearly \$200,000, little of which represents added outlay. The passage through the Suez canal cost \$130,000. From this trifling expenditure has come an incalculable good. The beneficial effects of the cruise naturally fall under two heads—first, the diplomatic results or influence on the world at large; second, increased efficiency or influence on the fleet itself.

Of the diplomatic results the chief is the added respect of the world for the American navy. It is safe to say that no naval event outside of war has ever so much attracted the attention and admiration of all nations. At the beginning all sorts of pessimistic prophecies were made concerning it. The

NEW LINCOLN MONEY.

One Cent Piece Bearing Martyr President's Portrait Simple Design.
Victor D. Brenner, the New York sculptor who made the Lincoln centennial medal, is the designer of the new one cent piece bearing Lincoln's portrait. He received word from Washington recently that his design had been accepted, with suggestions by President Roosevelt for several minor changes in the lettering. Mr. Brenner said that he considered the placing of Lincoln's likeness on the coin much more symbolic of American ideals than the present design.

The new coppers have the bas-relief head of Lincoln in profile on the coin in place of the Indian. The word "LIBERTY" is to the left of the head, and to the right is the date "1909." On the reverse side at the top is the motto "E PLURIBUS UNUM," with underneath in the center the words "One Cent." In large letters, with a sheaf of wheat on each side.

It is believed that the Lincoln head has been used on only one coin before the five cent design in nickel of 1866. It is said that not more than five of the Lincoln five cent pieces were struck in nickel and that single impressions now sell for about \$12 each.

NONMAGNETIC SHIP.

Odd Construction of the Carnegie For Studying Compass Variations.
The Carnegie Institute is having built at Brooklyn for the study of phenomena of magnetic variations an auxiliary craft of 668 tons displacement, in the construction of which less than 600 pounds of steel or iron will be used. The vessel will be called the Carnegie and will be used chiefly for the study of compass variations. The use of steel and iron has been limited to the greatest possible extent so that observations will not be affected by the compass deflection usual on modern steel ships.

Honor for a Mexican Hero.

The government of Mexico has voted an appropriation of \$50,000 for a monument to a humble hero—Jesus Garcia, a locomotive engineer. Garcia a year ago bravely hooked his engine to a burning car filled with dynamite and hauled it out of Nacazari, Mexico. He saved the town from disaster, but was blown to pieces himself.

Warning New Discovery

Will Surely Stop That Cough.

perfect manner in which it was carried out has changed all this to praise. It has advanced the cause of brotherhood. Its motto from the beginning has been that it was made for peace, not war. It has brought added friendship from all the lands visited. This was especially notable in South America, Australasia and Japan. It immeasurably helped the pan-American sentiment. It was taken by Australia and New Zealand to mean white supremacy in the Pacific. Its arrival in Japan was timed exactly to assist in bringing about the Japanese-American alliance. As for the effect on the fleet, its value in training officers and men has been incalculable. Added efficiency in navigation, in economy and in marksmanship has been marked. The target tests at Magdalena and Manila boys not only showed the highest record in the American navy, but in the world. More than all else, it helped the fleet find its spirit. On this head Admiral Sperry says:

"This cruise marks an epoch in our naval annals, for the fleet has found itself—been welded into a unity. An aggregation of battleships irrespective of the power and efficiency of the individual units is not a fleet in the highest sense of the term until by long faith and harmonious work on the part of the personnel the spirit of the fleet has been developed. That now has been accomplished."

At the start the fleet was commanded by Rear Admiral Robley D. Evans—"Fighting Bob"—who said he was prepared "for a fight or a frolic." Because of ill health he was relieved at San Francisco and was succeeded by Rear Admiral Charles N. Thomas, who commanded but a few days when ill health also caused his retirement and ended his life shortly after. The command then devolved on Rear Admiral Charles S. Sperry, who took the fleet from San Francisco around the world.

Of the sixteen battleships that originally started on the cruise the Maine and Alabama dropped out at San Francisco, and their places were taken by the Nebraska and Wisconsin, both Pacific fleet ships. The chief ports touched at in the cruise were Trinidad, Rio Janeiro, Punta Arenas, the southernmost port in the world; Valparaiso, where no stop was made; Callao; Magdalena Bay; our own Pacific ports; Honolulu, Auckland, Sydney, Melbourne, Yokohama, Manila, the Suez ports; Messina, to relieve the earthquake sufferers; Gibraltar and home. At almost every point touched the enthusiasm was prodigious.

COSTLY GIFT FOR UNCLE SAM.

Gem Studded Rug, Worth \$50,000, Presented to the White House.
What is said to be one of the most costly gifts to the nation by an individual was recently accepted by President Roosevelt at the White House. H. H. Topkayan, a wealthy Armenian connoisseur and a personal friend of the president, presented an imperial silk jeweled Persian rug, said to be the finest in texture and weave in the world.

The rug, which is valued at \$50,000, contains twenty-four square feet of unblemished Persian silk. It is studded with strings of sapphires, rubies, emeralds and turquoises, surrounded by ropes of pearls, causing the color design, which is modeled after the interior of a Turkish mosque, to run into delicate shades of rose, green and horizon blue. The whole effect is one of indescribable softness and richness.

The rug, which is hand woven, represents the labor of an entire Persian family for five years. It was originally intended for use as a wall tapestry in the palace of the shah of Persia, but it struck Mr. Topkayan's fancy on one of his trips to the orient, and he succeeded in purchasing it and bringing it to America. A framework of mahogany has been built around the rug, and it may be used as a hanging tapestry in the White House reception room.

SETON BEAM FOR ROOSEVELT.

Device Determines Weight and Measurement of Animals Accurately.
Ernest Thompson Seton of Greenwich, Conn., has presented to President Roosevelt a sportsman's weigh beam for use on his South African expedition. It is called the Seton beam and is the invention of the naturalist. By the use of this beam animals up to 300 pounds may be weighed to within half an ounce of accuracy. The outfit itself weighs but one and three-quarter pounds and is on the pure gravity principle, without spring. It also provides for the measurement of the animals.

Race Transplanting Test.

A British religious organization is trying to transplant a race by encouraging the emigration of the Lapps from Lapland, where they are in danger of extinction to Labrador and Newfoundland.

Groundhog Night in Missouri.

Mrs. William Berry of Bellflower, Mo., who is a widow, and consequently a trapper, caught seven groundhogs in her seven steel traps a few nights ago.

CARROLL WRIGHT'S JEST.

Clark College President Used Mathematics to End Friction in a Choir.
When Colonel Carroll D. Wright, president of Clark College at Worcester, Mass., and former United States labor commissioner, was a young man he was appointed by the church with which he was connected chairman of the committee on music. He was no musician, but he was a mathematician, and he used mathematics to direct music.

He promptly made three of the committee members of the quartet. That removed the possibility of friction between the committee and the choir. He soon found, however, that there was some feeling between the contralto and the soprano singer. Either was likely to exhibit sensitiveness if the other seemed to be assigned to solos the more frequently or more prominently.

When Easter Sunday came it so happened that the anthem which had been selected as suitable for the occasion contained very long soprano solos. The contralto soloist was plainly displeased. Noting this, the chairman of the music committee quietly whispered to her that he had made an accurate measurement of the number of inches of the soprano part and that he would see to it before the month was out that anthems were selected which not only harmonized with the religious needs of the occasion, but afforded an equal number of inches of contralto solo. "I am not much of a musician," Mr. Wright is said to have added, "but I am great on figures. You can trust me to equalize the account to the eighth of an inch."

COLONY OF COMMUNISM.

How Dr. Van Eeden Would Abolish Human Ills.
Dr. Frederik Van Eeden of Holland, poet, scientist, artist and sociologist, whose views on communism attracted so much attention a year ago when he visited the United States, recently arrived in New York and this time with a well defined plan for the elimination of all human ills and the realization of universal happiness.

"I am going to form a corporation or a trust, as you call it here in America," he said the other day, "whose scope will be worldwide and whose object will be the suppression of usury, special privilege and barter. The trust will eliminate the man who does not work, the drone who dissipates his usefulness. The corporation will be conducted on purely business lines. We will have a company with a president, a treasurer, a secretary, and we will have a board of trustees. I do not know who the officers and the trustees will be, but they must be men of high standing and undoubted honesty. The general manager must be a capable business man, and the basic principle will be the prevention of unemployment and maldistribution of wealth."

Dr. Van Eeden hopes to organize several communistic colonies in America. He has already founded such a co-operative society in Amsterdam, which has grown to large proportions.

CALL FOR THREE PRESIDENTS

Petition of Civic Federation of Huron, S. D.—Wanted "With Vices."
Representative William Sulzer of New York presented to the house the other day a petition from the Civic Federation of Huron, S. D., urging an amendment of the federal constitution. The petition sets out that there ought to be three presidents—one from the east, one from the west and one from the central part of the United States. The adoption of this scheme would keep the judiciary out of politics, would prevent the concentration of power and would serve to diminish the centering of popular dislike on one man.

WOMEN LOADED WITH IDEAS.

But Men Come Home Simply Loaded, Says Bishop Anderson.
Bishop Charles P. Anderson has added a unique contribution to the arguments in favor of woman suffrage. In an address the other night at Chicago to a men's club he took up the cudgels for the other sex.

"When men have an afternoon off they go to a ball game or a circus," he said. "When a woman has an afternoon to spend she goes to a meeting of the Browning club. The women come home loaded with ideas; the men come home simply loaded."

The bishop went on to say that there was as much reason why the women should get together and refuse to allow the men to vote as for the opposite condition to exist.

New Eye Disease.

A new disease, called "electric ophthalmia," is said to threaten all users of the electric light. According to two Dresden scientists, the damage is done to the eye tissues by the ultra violet rays of the electric light, and cataract may ultimately result. The same investigators have discovered a simple preventive for electric ophthalmia in the shape of yellow or green spectacles, which, they prophesy, will become universal as electricity comes more and more into use as an illuminant.

Our Beneficial Millionaires.

It is to be hoped that the expiatory offerings of the very rich for charitable purposes will do some people as much good as the means by which these multimillionaires secured their fortunes did harm. The sums donated the past year for educational institutions, religion, libraries, museums, art galleries and public improvements are said to amount to \$148,902,130. Still this vast sum is not a tithe of what our beneficent millionaires possess.

ALL SUFFER ALIKE

NO CLASS EXEMPT FROM TRUST EXTORTION.
Recent "Little Flurry" Has Shown in Stronger Light the Bogus Prosperity That is the Republican Party's Boast.

All classes of citizens are suffering, in this boasted era of Republican prosperity, and if the recent trouble was, as our Republican contemporaries declared, "only a little flurry," what will a real Republican panic do? The farmer has discovered that the "little flurry" has prevented the cotton buyer and the wheat buyer from having money to buy the crops; that the price of farm products is falling, while the price of the tariff-protected trust products is still at the top notch. The workman finds wages declining and factories either running on short time or closing down, with but little or any corresponding reduction in the price of what he is compelled to buy. The railroad men, the telegraph operators, and other employees of public utility corporations, are threatened with a "lay off" as winter advances, and but little saved to keep the gaunt and hungry Republican wolf of "prosperity" from the door. And yet the Republican leaders in congress, and out of congress for that matter, stand pat and sing their monotonous song of "let well enough alone," and advise us all to join in the chorus. Under this joyless Republican symphony, while the tariff still protects the trusts and not a trust magnate, a malefactor of great wealth, though he may be, is prevented from continuing his plundering, every one is suffering but the favored few.

How do you like it? Will you still vote to protect the trusts and endorse the Republican policy of "leaving well enough alone?" Do you think President Roosevelt can be a real reformer and not even recommend to congress the reform of the tariff that protects the trusts, which is the chief cause of prosperity for the few and panic for the many? Are you farmers satisfied with the bogus protection the Republican tariff protects to give you, and do you really believe that the tariff on wheat and other cereals has added one cent a bushel to the price paid you? If you get two or three cents a pound more for wool, you more than pay it out again in dearer clothes. If you grow sugar beets, and the tariff tax on imported sugar makes such beets a dollar a ton higher, the sugar trust gets it back from you in higher priced sugar.

Do you workmen still believe the tariff tax on iron and steel and glass and all other manufactured products protects you and adds to your wages or shortens your hours of labor? Is a carpenter or bricklayer or painter protected by the tariff? You know they cannot be, but their wages are higher than their brothers who produce tariff-protected products because they are better organized and have thus been able to secure better terms and shorter hours from employers. It was not the tariff, therefore, that protected them, but rather plundered them, for all alike have to pay the tariff tax to the trusts in high prices for their products.

There is another class of workers who are especially robbed by the tariff and have no particle of tariff protection, and that is the storekeepers and their clerks. The trusts' cuts down their profits, and in many instances dictate the price they shall sell for, and thus reduce profits, and very naturally their clerks suffer by small wages and long hours.

Then there are those whose incomes are fixed and do not increase as the price of trust products advance. All such have through the increased cost of living had the purchasing power of their incomes reduced over 50 per cent in the last ten years, or since the present tariff law has been on the statute books.

So all these classes suffer from the tariff that our Republican brethren boasted produced prosperity until this panic took the wind out of their sails and they wonder what has struck them.

Nursing the National Banks.
It is seldom that an admission of the close connection of the Roosevelt administration and the frenzied financiers is made officially, although it is well known that such exists. In his opening speech to the jury in the case of the government against Banker Walsh of Chicago, United States Attorney Dorbyns said: "It is the policy of the government to nurse a bank found to be in trouble, even if conceal crime until its affairs can be straightened out." How much Banker Walsh paid to the Roosevelt campaign fund for concealing the crime he was charged with has not yet come to light, but like the corrupt insurance contributions, it may yet be divulged. The inspection of national banks would seem to be run in the interest of the Republican party instead of for the protection of the people.

When a man has nothing to do he finds it very wearisome unless he can persuade somebody to help.

There are many people in this world whose actions indicate that they think with their stomachs.

The world may owe every man a living, but it is not under any obligation to pay interest on the debt.

It is hard for some people to understand that there may be pleasure in anything which doesn't cost more than they can afford to pay.

ABOUT YOU.
Your bones number 208.
Your stomach has four coasts.
Your brain is seven-eighths water.
There are but four bones to your ear.
Your lungs contain five quarts of air.
Your sense of touch is dullest on your back.

WITH THE SAGES.

Efforts are always successes.—Bishop Walsham How.
To love is to obey; to know how to love is to rule.—Levi.

What would you have? Take it—and pay the price.—Goethe.
The measure of a man's life is the well-spending of it—not the length.—Plutarch.

I will listen to anyone's convictions, but pray keep your doubts to yourself.—Goethe.
If a thing is possible and proper to man, deem it attainable by thee.—Marcus Aurelius.

Our greatest glory consists not in never falling, but in rising every time we fall.—Goldsmith.
Assume in adversity a countenance of prosperity, and in prosperity moderate thy temper.—Livy.

Every man is worth just so much as the things are worth about which he busies himself.—Marcus Aurelius.
An able man shows his spirit by gentle words and resolute actions. He is neither hot nor timid.—Chesterfield.

It would be better for most of us if we complained less of being misunderstood and took more care that we do not misunderstand other people.—Dr. John Watson.

Acquiesce in the present without repining, remember the past with thankfulness, and meet the future hopefully and cheerfully, without fear or suspicion.—Diogenes.

SUNFLOWER PHILOSOPHY.
No one has as much money as people imagine.
Discount your expectations at least \$0 per cent.
The man who really enjoys fighting is not much good for anything else.

When a man is loser you can't console him by telling him how much you won.
The more people talk about the proper thing to do the less apt they are to do it.

The average woman will use almost any kind of soap if it is recommended to improve the complexion.
Probably more men would join the church if some initiatory work were put on when a new member is added.

It is said if you do not blow your own horn no one will blow it for you. Well, they certainly will not blow it if you are blowing it.

Let three women talk together, and within five minutes one of them will say that she doesn't intend to work herself to death for any man.—Atchison (Kan.) Globe.

WHAT THEY DO IN THE NAVY.
The ship's bell is struck every half-hour to announce the time.
The quarter-deck must always be saluted on being approached.
Postal orders are sold at face value without postage being charged.
The master-at-arms or chief of police is the only man in the ship, not being an officer, allowed to wear a sword.

From the minute a ship commissions to the day of paying off, there is always an officer on watch day and night without intermission.
Grog is always mixed with three-parts water before being served out to the men; warrant officers and petty officers alone receive it undiluted.

Most men are able to appreciate the blessings of toil only after they lose their jobs.
When a man has nothing to do he finds it very wearisome unless he can persuade somebody to help.

There are many people in this world whose actions indicate that they think with their stomachs.
The world may owe every man a living, but it is not under any obligation to pay interest on the debt.

It is hard for some people to understand that there may be pleasure in anything which doesn't cost more than they can afford to pay.

ABOUT YOU.

Botanic Blood Balm

(B. B. B.) Cures Through the Blood
Blood Poison,
BONE PAINS, CAN-
CER, SCALY SKIN,
PIMPLES,
Rheumatism, Eczema,
Itching Humors.

B. B. B. (Botanic Blood Balm) is the
only Blood Remedy that kills the poison
in the blood and then purifies it—sending
a flood of pure, rich blood direct to
the skin surface, bones, joints, and
wherever the disease is located. In this
way all sores, ulcers, pimples, eruptions
are healed and cured, pains and aches
of Rheumatism cease, swellings subside.
B. B. B. completely changes the body
into a clean healthy condition, giving
the skin the rich, red hue of perfect
health. B. B. B. cures worst old
cases.

BOTANIC BLOOD BALM—B. B. B.
is pleasant and safe to take; composed of pure
Botanic ingredients. It purifies and enriches
the blood. B. B. B. strengthens the nerves
and builds up the broken down system. Drug-
gists \$1.00 PER LARGE BOTTLE with direc-
tions for home cure.
Sold in Pickens, S. C. by Bolt & Co.

Notice to Debtors and Creditors.
All persons having claims against the
estate of the late Isaac Durham deceased,
should present the same duly proven on
or before the 1st day of April 1909,
or be debared payment, and all persons
debted to said estate must make pay-
ment on or before the above date to the
undersigned.

E. N. DURHAM, Admr.
