## NATURE @SCIENCE

Denatured alcohol has been successfully manufactured from flax straw at the North Dakota Agricultural College. The yield of thirty-five gallons a ton does not make it a paying proposition.

The "singing arc" has been so far perfected that it is made use of as an relventisement feature of a Paris shop. The lamp hangs in front of the store and at all times during the day and night there is a continual concert of musical features inferspersed with vocal references to the virtues of the ! articles to be found on sale within the

One of the latest Parisian inventions is the trackless trolleys and they threaten to be taken up in America within a few years. The new cars present electric vehicles, but they have rubber tires and run on any of the streets. They are much cheaper to operate, do not interfer with other street traffic and can be constructed

A new kind of piano, the choralcelo, has the ordinary keys and hammers, which may be used if desired, without striking with the hammers. The tones, when produced by the action of the electro magnets, are "Yes, I see." "I was swimming. said to resemble those of an organ

gives him an advantage over the white man in the stoke hold, as well Gabriel Perley's body lunged as in the sun. "In the sun," this au-"Look here," he whispered, draw- against mine. As he fell to the floor thority explains, "dark skins resist heat better: in the stoke hold it radiates heat better." Dr. Rees says the little thin man loses heat much fleshy man.

> The latest invention in wireless telegraphy is the construction of an underground station in Paris. It is being erected in the Champ de Mars, and will probably be open for use next month. The station will be fitted up on the latest approved lines, and comprise a machine room, a transmitting pole and accommodation for the officials. By the introduction of a 100-horsepower engine it is hoped that messages may be exchanged with places about 5000 to teach the farmer how he may de- miles distant. The result of the experiment will be awaited with much

SEEK MORE DURABLE PAPER.

That Will Better Preserve Records.

Alarmed regarding the permanency of their State papers and other valuable documents, the leading Governments of the world, headed by the United States, are seeking paper of as nearly as indestructible character as can be made. This announcement was made in a statement issued by the Department of Agriculture, which was prepared by F. P. Veitch, chief of the leather and paper laboratory. Bureau of Chemistry, on "The Need for Good Paper."

Already several Governments have introduced stringent requirements with which record paper must com-The need in this country for more durable paper is a real one, Mr. Veitch declares. Important State papers, correspondence, deeds, bonds, certificates, ledgers, court records and certain printed documents are so valuable, it is stated, that it is absolutely necessary that the paper upon which they are printed should be as nearly

indestructible as possible. It is declared that the quality of the paper is not the only problem that should give concern. So rapidly are records of all kinds increasing that their proper storage and safekeeping are a serious problem. Paper should be not only durable, but light and thin, so that the burden of its proper handling and storage may be reduced as far as possible.

### Sherlock in the Kitchen.

The modern Sherlock climbed through the window and entered the

"His wife is away," ejaculated Sherlock, as he surveyed the room with the critical eye of Scotland Yard. "I shall find out how long she has been away."

And then Sherlock bega to count the soiled dishes piled up on the

"She has been away exactly fourteen days," he commented. "And how did you find that out,

chief?" asked his assistant. "Why, it's dead easy! Married men never wash their dishes when their wives are away, and there are just forty-two soiled plates on that shelf. That means three plates a day for fourteen days."-Chicago News.

Newspaper Ads. Are Cheapest. Newspaper advertising is the cheapest advertising known. That is to say, it reaches me people in proportion to the month expended than at other kind of vertising.

#### A Millerist Baptism. A curious ceremony has just taken place at Geneva, where a young woman 20 years of age was baptized in one of the bathing establishments according to the rites of the Miller-

She appeared in chemisette and short skirt and stood up to her knees in water, and so remained while the minister read some passages from the New Testament. The minister wore a frock coat and high boots. Taking the postulant by the waist he plunged and asperged her copicusly. Then she was taken into a room and dry clothing given her. This is the second baptism of the kind which has taken place in Geneva.-London

On a few of the larger ocean liners a trained nurse may be found, but the idea is novel to train stewardesses as such.

#### AN INTERESTING CASE OF THE PRES-

IDENT OF THE FARMERS' UNION. A few days ago a gentleman related the case of Mr. J. Matty McMichael, a prominent citizen of Jackson, Ga., and a member of the Legislature from Butts County. About four years ago handing his wife a pair of solssors he dropped them and struck his right leg just above the ankle. In a few days his leg was so badly swollen and sc very painful he sent for his physician, and in spite of all that could be done blood poideveloped and he was confined to his bed for more than a year suffering tortures, and the case became so desperate he was brought to A lanta for his leg to be amputated. During all of this time it was necessury to administer morphine to relieve his pain, and the long continued use of the morphine produced the habit. His general system became so thoroughly poisoned with the drug that it produced a very serious condition of his heart, he would have attacks with his heart and remain un onscious as long as ten and eleven hours. He could not leave the morphine off, it was necessary for him to take as much as three or four grains every hour during the day. In consulting with his physicians and family as to going to a Sanitarium to be treated for the morphine his physicians gave him no hope and plainv told him and his family that he could not be cured, if he attempted to take treatment could not live more than a few days, and in his present condition he was liable to die at any time from one of his attacks with his After the consultation he decided to heart. go to Dr. W. A. Starnes' Sanitarium in Atlanta, Ga., which he did. In six weeks he left the Sanitarium thoroughly cured of the morphine, his general condition was better than it had been for more than three years. To-day there isn't a man in Butts County who enjoys any better health, his weight is two hundred and twenty five pounds. The matter what happens. It's a black people of his county were so proud of his cure that they sent him to the Legislature this past summer.

Mr. McMichael says: "It shows you that this disease can be cured if properly treated and I recommend Dr. W. A. Starnes' Sanitarium in Atlanta, Ga., and his method of treatment, and I will further state, that anyone who will go to him and follow his in-structions will be cured."

Time is not money, argues the Boston Post, when you waste a shilling's worth to save a penny.

#### Distemper

In all its forms, among all ages of horses and dogs, cured and others in the same stable prevented from having the disease with Spohn's Distemper Cure. Every bottle guaranteed. Itching Was Intense-Sleep Was Often Impossible-Cured by Cuticura in Three Weeks.

"At first an eruption of small pustules commenced on my hands. These spread later to other parts of my body, and the itching at times was intense, so much so that I literally tore the skin off in shreds in seeking relief. The awful itching interfered with my work considerably, and also kept me awake nights. I tried several doctors and also used a number of different ointments and lotions but received practically no benefit. Finally I settled down to the use of Cuticura Soap, Cuticura Ointment and Cuticura Pills, with the result that in a few days all itching had ceased and in about three weeks' time all traces of my eruption had disappeared. I have had no trobule of this kind since. H. A. Krutskoff, 5714 Wabash Ave., Chicago, Ill., November 18 and 28, 1907.'
