**COUGHS & COLDS**

Clothes of English Workmen.  
I saw great numbers of workmen among the mills and elsewhere in England, but outside of railroad quarters in London did not see a single man wearing overalls. England is a cold country and they want warm clothes.

I did see quantities of good woolen breeches made in three-quarter cloth weighing from ten to twelve ounces selling at half from 2s. 6d. to 3s. 6d. a garment—less than the price at which an eight ounce cotton cloth in overalls would cost a workman in America—and I was told that woolen clothes were worn universally by the workmen in England.

In travelling through the country the great flocks of sheep indicated the source of this valuable supply; and while the cost of cotton garments for both men and women appears to be about the same as in America, the cost of woolen garments appears to be about one-half.—Textile Manufacturer Journal.

**The Farm**

**Sire for Sheep.**  
Getting a better sire to head the flock of sheep is simply a matter of economy. The cost may seem exorbitant, but the superior type of lambs thus secured next spring will cause you to consider the high-bred sire a safe and profitable investment, after all.—Farmers' Home Journal.

**Cornstalk Fiber.**  
When the green stalks are given to hogs care should be used to prevent cattle from having access to the woody fiber which the swine will leave after chewing the stalks. Pigs relish the stalk for the sweetness in it, but leave enough saccharine matter in the fiber to make it attractive to cattle, especially the younger stock. This fiber is indigestible, and the cattle, if allowed to pick it up, will frequently eat a sufficient quantity to cause impaction and harmful if not fatal results. It is not safe to let cattle into yards where swine are given green cornstalks.—From Coburn's "Swine in America."

**Grind the Corn For Finishing Pigs.**  
Fattening hogs will usually finish faster on cornmeal than on shelled corn, and many farmers favor cornmeal for that reason. Experiments covering the quantity fed plainly show, however, that hogs given cornmeal eat more feed in a given time than those on shelled corn. When both the feed eaten and the gains made are taken into consideration the profit in favor of cornmeal is considerably less than many suppose. Corn and cob meal has been shown to have about the same value as pure cornmeal; if any advantage is had from corn and cob meal, as is claimed by some stockmen, it, no doubt, largely comes from the bulk furnished by the particles of cob, which by rendering the contents of the stomach less compact or more porous helps to their easier and more complete digestion.—Coburn's "Swine in America."

**Plain Horse Sense.**  
Gentle colts make gentle horses. An excitable and nervous horseman usually owns horses of the same temperament. We never yet have seen the colt that could not be turned into a pet by kind words and gentle handling. If you want a horse trained to suit you in every respect you must do the training yourself, and begin when he is a suckling colt. A severe or so-called "safety" bit often causes a horse to become vicious or unruly. Be sure the animal needs such a bit before you use it on him. Don't try to shun the automobiles. They've come to stay, and the sooner we train our teams to drive past one without being frightened, the better for us, the horse and the autoist. Get rid of the kicky horse at once. He may be valuable as far as his working qualities go, but if some of the children should happen to stray up behind his heels you may regret having kept him—after it is too late. We frequently see a man (?) strike his horse with a whip and then yank the poor, dumb animal back when he plunges and tries to get free. Such a man ought to be knocked down right on the spot, and kicked a time or two for falling so hard. When the skittish horse shies or gets scared, handle him gently and speak kindly to him for a few seconds. Instead of whipping, jerking and talking in a loud tone, as most men do, soothe him, rather than unnerve and excite him by causing him to think he is going to be hurt. The balky horse is a nuisance you cannot afford to waste time with on the farm—nor any place else, for that matter. Usually, the poor animal has been ruined beyond redemption by over-loading, and the sooner you get rid of him the quicker you'll make a big saving in time and temper. Besides you don't want him to spoil another good pulling horse, and that is just what he is liable to do if you keep him. The man who flies into a passion and kicks his faithful horse in the handest place ought to be forced to remove his shoes and stockings and repeat the operation barefoot, or have some one administer a sound kick on the same part of his anatomy that he kicked the horse. It might show him the error of his way. In fact it would seem a good thing if the owner were compelled to take the place of the horse now and then. It would be far better for the horse at last. The horse that seems to be susceptible to frequent attacks of the colic is a risky piece of flesh to keep around the farm. The fatality of this disease is sometimes so sudden that there is little chance of securing the services of a veterinarian, or of administering relief at a stage that would be of any benefit. Such an animal usually has some striking good qualities about him, but you can't let these tempt you to hold onto him till his loss is total to you. Sell him, get a healthy animal, and be on the safe side of the fence.—M. Albertus Covardell, in the Indiana Farmer.

**Losses in Manure.**  
One of our experiment stations has shown by careful investigation that when the stable manure is piled up and left exposed to the rains the loss from leaching of the fertile elements is very large. The New Jersey station finds that manure exposed for 100 days lost over one-half of nitrogen, one-half of the phosphoric acid and the same proportion of the potassium had been lost. More than one-half of the constituents had been lost by an exposure of less than four pounds. Work from other experiment stations confirms this. A great deal of valuable manure is also lost in badly arranged stables, where there are poor facilities for recovering the manure. The valuable liquid manure is lost by drainage. The best way to save all the fertile elements in manure is to haul it on the fields and meadows and spread it evenly over the land. Washed into the soil it is preserved for the next crop.

**Breeds and Laying Capacity.**  
Laying capacity varies greatly among individual hens. This has been discovered by the use of trap nests. Experiment station records show that hens vary from 250 eggs per year to no eggs. Frequent good looking hens in good health will not pay for the food she eats, while another hen of the same breed and with the same care, will lay eggs worth three or four times the cost of the food. It is not known that there is a type or shape characteristic of heavy laying hens, otherwise it would be an easy matter to rid the flock of the unprofitable fowls. The use of the trap nest involves considerable labor, more than a farmer, keeping only a few hens, can profitably give, but he should endeavor to secure "pedigreed" males from some of the experiment stations or from reputable private breeders in order to breed up the laying qualities of his flock. The smaller breeds, such as Leghorns, are usually the most profitable for egg production. The Leghorns should lay as many eggs as the Plymouth Rocks and breeds of that kind on one-fourth less food. But the question of profit does not hinge on egg yield alone. Large returns will be secured from the sales of the Plymouth Rocks for market, which will about balance the difference in the cost of feeding.—Weekly Witness.

**Soy Beans For Hogs.**  
The Wisconsin Agricultural Experiment Station compared soy bean meal and wheat middlings for pork production in three separate experiments in as many years. Two-thirds of the grain ratio was cornmeal in each case. In each of the experiments the largest gains were made on the soy bean ration. Soy beans proved about ten per cent. superior to wheat middlings for pork production, figuring the cost of the feeds as the same. The Indiana Agricultural Experiment Station compared rations of two parts of cornmeal and one part of soy bean with cornmeal and wheat middlings in equal proportions and with five parts of cornmeal and one part of flake for pork production. The soy bean ration produced the largest daily gains, and this with the smallest quantity of feed consumed for each pound of gain. The Kansas Agricultural Experiment Station has several times tested the value of soy bean in combination with cornmeal and with kafir meal in comparison with the two latter feeds alone in feeding hogs. The feeds were mixed in the proportion of four-fifths corn or kafir and one-fifth soy beans. Larger gains, varying from thirteen to thirty-seven per cent., were made in every case on the mixed rations than on corn or kafir alone. With cornmeal alone 100 pounds of gain cost \$3.92, with cornmeal and soy bean meal \$3.73 and with kafir meal and soy bean meal \$3.37. For these computations the value of cornmeal was fixed at \$14 a ton, kafir meal at \$13 a ton and soy beans at \$25 a ton, or seventy-five cents a bushel.

**Frost Proof Bits.**  
For material take any piece of leather as long as the bit and wide enough to reach around it, then sew it round the bit. Now cut out two circular pieces of leather three inches in diameter like the illustration. Cut them half way across and make a round hole in the centre. Slip these around the ends of the bit and sew up the cut. Now you have as good a bit as you could buy.—Everett E. Tinker, Ellsworth, Me.

**Stomach Blood and Liver Troubles**

Much sickness starts with weak stomach, and consequent poor, impoverished blood. Nervous and pale-people lack good, rich, red blood. Their stomachs need invigorating for, after all, a man can be no stronger than his stomach.

A remedy that makes the stomach strong and the liver active, makes rich red blood and overcomes and drives out disease-producing bacteria and cures a whole multitude of diseases.

**Get rid of your Stomach Weakness and Liver Laziness by taking a course of Dr. Pierce's Golden Medical Discovery—the great Stomach Restorative, Liver Invigorator and Blood Cleanser.**

You can't afford to accept any medicine of unknown composition as a substitute for "Golden Medical Discovery," which is a medicine of known composition, having a complete list of ingredients in plain English on its bottle-wrapper, same being attended to correct under oath. Dr. Pierce's Pleasant Pellets regulate and invigorate Stomach, Liver and Bowels.

The first steel pen was made in 1820.  
Perry Davis' Painkiller has been for over seventy years a reliable remedy for lumbago, sciatica, pleurisy, etc.  
London's fire brigade costs \$1,420,000.

**Piles Cured in 6 to 14 Days.**  
Pazo Ointment is guaranteed to cure any case of itching, blind, bleeding or protruding Piles in 6 to 14 days or money refunded. 50c

Taking the average for the world around fewer than half of the babies born live to be 50 years of age.

**Rheumatism Cured in a Day.**  
Dr. Dechou's Relief for Rheumatism and Neuralgia radically cures in 1 to 2 days. Its action is remarkable. Removes the cause and disease quickly disappears. First dose greatly benefits. 75c and \$1. All druggists.

The bitter end, in cigars, announces the Louisville Courier-Journal, is the last half-inch.

**For COLDS AND GRIP.**  
Hick's CAPSICUM is the best remedy—relieves the aching and feverishness—cures the cold and restores normal conditions. By liquid—strikes immediately. 10c. Etc. and 50c. stores everywhere.

In the hold of one of the trans-Atlantic steamers there were recently 20 tons of ostrich feathers.

Dr. Pierce's Pellets, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels and cure constipation.

Those who frequent the courts, mused the Christian Register, suspect that a lawyer has a weak case when he begins to abuse his opponents.

**Tetterine for Ring Worm and Skin Disease**  
Tetterine, S. C. July 17, 1908.  
My wife uses your Tetterine for Ring-worm, also uses it in her family for all kind of skin diseases, and she thinks it a good medicine. There is no substitute. L. R. Dowling.

Tetterine cures Eczema, Tetter, Ring Worm, Old Itching Sores, Dermatitis, Itching Piles, Corns, Chubbins and every form of Scald and Skin Disease. Tetterine 50c. Tetterine Soap 25c. At druggists or by mail direct from The Shurtzette Co., Savannah, Ga.

With every mail order for Tetterine we give a box of Shurtzette's 19c Listerine free.

If you lost too trifling taxed, lick Uncle Sam's postage stamps and tell your troubles to your congressman.

Rich cured in 30 minutes by Woolford's Sanitary Lotion. Never fails. At druggists.

Never listen to any story that you cannot repeat in a room full of women without blushing.

Break up that cough with Allen's Lung Balsam, the popular family remedy. Cures where others fail. 25c., 50c. and \$1.00.

A man never knows how imaginative he is until he begins to write of love.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

Callow youths and underbred politicians often vent their spleen against the question of woman suffrage for lack of something more convenient.

**Boy Tortured by Eczema.**  
"When my boy was six years old, he suffered terribly with eczema. He could neither sit still nor lie quietly in bed, for the itching was dreadful. He would irritate spots by scratching with his nails and that only made them worse. A doctor treated him and we tried almost everything, but the eczema seemed to spread. It started in a small place on the lower extremities and spread for two years until it very nearly covered the back part of his leg to the knee.

"Finally I got Cuticura Soap, Cuticura Ointment and Cuticura Pills, and gave them according to directions. I used them in the morning and that evening, before I put my boy to bed, I used them again and the improvement even in those few hours, was surprising. The inflammation seemed to be so much less. I used two boxes of Cuticura Ointment, the same of the Pills and the Soap and my boy was cured. My son is now in his seventeenth year and he has never had a return of the eczema.

"I took care of a friend's child that had eczema on his face and limbs and I used the Cuticura Soap and Ointment. They acted on the child just as they did on my son and it has never returned. I would recommend the Cuticura Remedies to anyone. Mrs. A. J. Cochran, 1823 Columbia Ave., Philadelphia, Pa., Oct. 20, 1909."

**HOW TO SCENT GLOVES.**  
A woman who knows all the ins and outs of the well-dressed world tells how to scent gloves. Pour perfume in the palms of the hand or rub oil of flowers on the palms and place the gloves on the hand for several minutes until the odor penetrates them. The warmth of the hand drives the oils into the glove and good perfume will remain for many months.—Indianapolis News.

Hamlins Wizard Oil will knock the spots off a sore throat. It's a makes tonsillitis, quincy and diphtheria impossible. It is simply great for the relief of all pain, soreness and inflammation.

His Alarm Clock.  
"I guess," said the Yankee who had been asked to admit an echo, "I guess you don't know anything about echoes in this country. Why, at my country place up in the Rocky mountains it takes eight hours to hear the echo of your voice. When I go to bed I put my head out of the window and shout 'Time to get up' and the echo wakes me in the morning."

**THE NEW FERTILIZER.**  
A discovery of far-reaching importance to the farmers of the south is the new fertilizer which has been perfected on one of the islands near Charleston, S. C. It has long been known that lime is an essential food for plants of all kinds and that they cannot live when it has been exhausted from the soil. It has also been known that old worn-out lands are extremely deficient in lime, and that poor, badly-drained lands have their lime in a form that is not usable by growing crops.

Farmers' Bulletin No. 124, United States Department of Agriculture, says: "All the applications of lime increased the yields. . . . The best yields were obtained with the lime in the form of carbonate, the finely ground oyster shells standing first. . . . Lime with fertilizer was more profitable than depending upon fertilizer alone."

This new fertilizer which presents lime in its most usable form is made by a new process of burning oyster shells and using a burner that can supply potash. The result is a high grade fertilizer costing the consumer only \$7.00 per ton. It reclaims worn-out lands in a marvelous manner if applied broadcast two months ahead of ammoniated goods. It's sweetening effects on sour lands is almost magical. Charleston freight rates apply on this new fertilizer. The factory is located on Young's Island, S. C., but all letters should be addressed to E. L. Commins, Sales Agent, Meggetts, S. C. Free descriptive circulars will be sent to any one on request.

Gloving over split milk is silly; first, because split milk would be fit to use even if you could pick it up; and second, if you were to keep it, it would soon get sour.

**FOR HEADACHE—HICK'S CAPSICUM**  
Whether from Colds, Heat, Stomach or Nervous Troubles, Capsicum will relieve you. It's liquid—pleasant to take—acts immediately. Try it. 10c., 25c. and 50c. at drug stores.

Electricity at last has been applied to the Teddy bear, a Maryland man having patented one that opens its jaws and flashes lights from its eyes, nose and mouth when a battery in its interior is pressed.

**FOOTREST FOR INVALID.**  
In making a gift for an elderly person or invalid the comfort of a footstool or footrest should not be overlooked. A carpet remnant is excellent for this purpose, or the sound parts of a worn-out rug or carpet may be utilized.—Public Ledger.

**It was in this very cottage in Brookside, 15 miles from Birmingham, Ala., that three Italians nearly died of Fever. They had been sick 3 months. Johnson's Tonic cured them quickly—read letter below:**

The two physicians here had 3 very obstinate cases of continued Malarial Fever. All were Italians and lived on a creek 30 yards from my store. These cases were of three months standing, their temperature ranging from 101 to 104. The doctors had tried everything in vain. I persuaded them to let me try Johnson's Tonic. I removed all the printed matter and let the medicine go out in a plain bottle as a regular prescription. The effect in all three cases was immediate and permanent. They recovered rapidly and there was no recurrence of the Fever.  
S. R. SHIPLETT.  
Brookside, Ala., May 4, 1902.
