**REAL ESTATE?**  
The best and safest investment on this globe is the earth itself. Land well located is a better investment than Government Bonds, for increase in value of land alone (without any rents you may receive) will pay double amount of interest on Government Bonds.  
Your Grandfather told your father and your father told you "Had I bought land ten years ago I would have been worth a fortune today." Are you going to let this be true of you? "A word to the wise is sufficient."  
List with me if you want to sell. I get results.  
Yours for business.

With your land with the sake of saving a few dollars you use a fertilizer only recommended by the analysis. It requires special knowledge to make materials to analyses. The fertilizer lies in the materials used, so as to over feed the plant and starve at the time. This is why Roys are so popular. The ingredient has its own work to do.
