

THURSDAY, OCTOBER 14, 1819.

From the Spanish Maine.

The editor of the Baltimore Patriot has been favored with the following intelligence communicated in a letter under date of

ST. THOMAS, SEPT. 13.

Since your departure there are no arrivals from Margaritta, and we are apprehensive that place is still blockaded—part of the Spanish fleet having left Porto Cabello for that purpose.

Yesterday we had an arrival from Santa Martha, which confirms a previous account we had received of Bolivar's success. Having beat Samana in several severe actions, he took possession of the city of Santa Fee, and was well received by its inhabitants; Samana escaped with only two followers; our victorious general Bolivar, following up the blow he has already struck, has since taken Papigan and Mourpox, and no doubt but he has ere this hoisted the flag of liberty on the walls of Santa Martha.

The old English Admiral, Campbell, returned from Laguyra on Saturday last, with the Spanish schooner Josefe under convoy. It is said they have between them one hundred thousand dollars in specie, besides indigo, and a great many Catalans came in the schooner. We are led to think that General Paez has been at work again. It is said he fell in with a division of Morillo's troops, about four or five hundred and not one returned with the information.—The Taking of Santa Fee was not known in Caracas when the Galisburry sailed. Morillo no doubt will feel a little unpleasant when he hears of this. I should not be surprised at his quitting the province of Caracas altogether, and to embark for Carthagena.

The flour market in this place still keeps good. By the cargo, 88 1-2; to-day, retail, 9 1-2—there is not much here, it being bought up for Barbadoes. We have several arrivals here since your departure, principally assorted cargoes.

By Captain Denny, of the schr. James H. McCulloh, for St. Thomas, the editor of the Patriot has been put in possession of the following memoranda. He received it from Captain Joseph J. King, commander of the regular republican brig of war General Urdaneta, who boarded him off St. Thomas, on the 30th August.

“On the 11th of July the squadron left Margaritta, after having embarked the British and German Legion, amounting to about 1800 men. On the 15th the troops were landed a few miles to windward of the Moro, for the purpose of taking the city of Barcelona; on the morning of the 16th they marched for that purpose, and the same day about 11, A. M. the fleet weighed anchor, and sent in boats about 150 seamen to land on the shore to attack the heights of the Moro, who were attacked and fired upon while landing, by about 60 infantry of the enemy, who immediately retreated as we rose the height. The place was taken by us, consisting of about six regular batteries, with 3 or 4 of temporary defence, mounting a number of 18s, 24s, and small brass pieces. Our loss, 2 wounded (not mortally) and a number of the enemy killed, 40 prisoners, and 150 deserters. The city of Barcelona was taken without any loss. On the 28th the forts of Moro were blown up, guns destroyed, and troops embarked. 30th, sailed for Cumana; on the 2d of August landed the troops a short distance from Cumana in the evening, and on the 3d, A. M. the fleet got under weigh, and shortly after commenced a cannonading on the flecheras and batteries, which was continued 3 days by the most part of the squadron, destroyed three of the enemy's flecheras and silenced several of their battery guns.

The upper fort at Cumana was attacked by part of the troops, who, after a warm action for an hour, retreated, not being able to take possession of the same. The rest of the troops fell in with a party of Spaniards, who intended to join the enemy, and out of about 300, 40 escaped to tell them the news. Our loss in killed and wounded, on shore, was about 10—in the fleet, about 3 wounded, not dangerously. The place was evacuated in consequence of the difficulties attached to mounting battery guns on the heights; and the troops are marched to Augustura. On the 14th August arrived at Margaritta a part of General D'Evereux's command, consisting of about 500 men. There are several men of war on their way out from England to join the squadron. A 74, named the General D'Evereux, a 44, 2 frigates, 4 corvettes, and 3 brigs, which, ere this, in all probability, have arrived. The subscriptions have been made to a great amount in Liverpool and Dublin, supposed about two millions sterling.”

It is calculated that 200 hands by machines will spin as much cotton, as twenty millions could have done 40 years ago, with the common spinning wheel. The work now done in Great Britain in this way would require sixty millions of hands in the old way. It is further calculated that the manufacturing machinery of all kinds, in England, does the work of four hundred millions of artificans, without machinery.
