INCREASE OF RATS.—The Farmer's Gazette, England, asserts and proves by figures that one pair of RATS will have a progeny and descendants no less than 651,000 in three years. Now, unless this immense family can be kept down, they would consume more food than would sustain 66,000 human beings.

We should like some one to give us the benefit of their experience in driving out these pests. We need something besides dogs, cats, and traps for this business.—*Scientific American*, N.Y.
