Examination was postponed until January 9th. Gaynor was released on-\$1,000 ball. He denies that the woman is his wife.

Several weeks ago the announcement was made that Greenville would shortly have the sixth cotton mill, unless its projectors concluded to locate at Greers, and now it is almost a certainty that the enterprise will be undertaken. Application has been made for a charter for the Monaghan cotton mill company. The board of corporators are L. W. Parker, T. F. Parker, Ellison A. Smyth and H. J. Haynsworth. The cap-Ital stock is to be \$ 00,000, divided into shares of \$100 each. The location is not definitely named in the petition for charter, but is to confined to Greenville

### LEGISLATURE IN SESSION.

Governor McSweeney's Message Read Tuesday.

The General Assembly of South Carolina assembled at noon Tuesday. Senator R. B. Scarborough becomes Lieutenant Governor, succeeding Miles B. McSweeney, who became Governor on the death of William M. Ellerbe, June 2, 1899. In his annual message Governor McSweeney congratulates the \$5,450.28. He also states that plenty of General Assembly on existing conditions. There is no bitter political factionalism in the State and South Carolina has advanced wonderfully in the year just ended. There has been no mob violence and good order has pre-

> The condition of the State finances is encouraging. There were 7,158 persons on the State's Confederate pension rolls, the total appropriation being \$100,000. In the State Hospital for the Insane are 1,002 inmates, 599 white and 403 colored. In the State prison are 1,073 convicts. This institution netted the State \$12,500.56. The phosphate mining industry shows an increase of \$15,856.64 in royalty to the State. The net income of railroads in the State for 1899 was \$2,701,430.16. The following new lines were constructed or are being constructed: Atlantic Coast Line, 34 miles; Southern, 31.2 miles; Seaboard Air Line, 91 miles; Sumter & Wateree, 15.8 miles; Lockhart & Union, 15 miles; Conway & Seashore, 10 miles; Camden & Sumter, 20 miles; total, 237 miles. This represents an outlay of about \$600 and will add at least \$2,500,000 to the taxable property in the State. In the Institute for Deaf, Dumb and Blind 186 pupils are cared

> for by the State. Speaking of the cotton mill outlook the Governor says: "In cotton manufacturing South Carolina leads all of the Southern States and stands second only to Massachusetts in the number of spindles, and second to none in equipment. If the progress of the past year augurs anything for the future, we shall soon lead all others in this important industry and instead of furnishing any of our staple crop for export to other places for manufacture we will be large importers of cotton demand. During the past year eleven new mills have been organized and are in progress of construction, representresenting an increase of their capital stock of \$2,429,000."

Governor McSweeney suggests a the State liquor dispensary, delegating an insurance company exclusively for the powers of the board of control to their race. State officers and a commissioner to be elected by the General Assembly. He also calls attention to the impending danger from trusts.

The following is the conclusion of the message, which consists of a general resume of the State's progress and her present condition:

There has been no mob violence during the past year and general good order has prevailed throughout the State. English Secret Service Money.

The term "secret service money" is usually applied to a fund placed at the

disposal of ministers to be expended at their discretion in promoting or protecting the interests of this country. These moneys consist of a sum of £35, 000 annually, included in the estimates, in respect of which ministers are only required to make a declaration that the moneys spent have been expended "in accordance with the intentions of parliament." As ministers are required to give no account of their stewardship it is obvious we have no means of knowing how these moneys are expended. The reader, however, who carries his mind back to episodes within his knowledge, such as the conapse of the Fenian conspirators or of their later development, the "Irish Invincibles," will have little difficulty in realizing how indispensable a fund of this kind is to the protection of a state, and of understuding the infinite variety of uses to which it may be applied. -Chambers Journal.
