Garden Work for March.

This is the mohth for work in the Southern garden. Continue to plant peas, early cabbages, onions, spinach, beets, parsnips, carrots and radishes, &c. Cabbages started in the hot bed may now be transplanted into the open grounds. The last of the quence of some scandalous adventures in month, kidney beans, tomatoes, egg plants, okra, squashes, melons, peppers, &c., may be planted. These tender plants may yet require a slight protection in cold nights.

Preventing an Elepement

A writer in the Democratic Quarterly Review, in sketching life at Baden-Baden, records the following incident:
A noble Hungarian lord, Count Chris-

tian W—, had come to pass the season at Baden, accompanied by his daughter Helen. Young, beautiful, charming and heiress to an immense fortune left her by her mother. The young Countess soon found herself surrounded by a host of admirers. Adorers of all kinds were not wanting rich and poor, noble and obscure, tender and passionate, grave and gay. It was a perpetual tournament, of which she was the queen, and where the aspirants contended for her hand by exhibiting their address. dress, grace and seductive qualities. When she entered her carriage, ten cavalers were in the saddle caracoling around her caleche. At the ball, the most elegant dancers were devoted to her. They had neither cares, attentions nor sighs, but for her; whereat many beautiful women-French, English and Russian-were particularly mortified. Amongst these pressing suitors Helen selected the most worthless. The Chevalier Gaetan M- was, it is true, a charming

fellow, pale and delicate, with fine blue eses, and long black wavy hair. In the place of true passion, he had eloquence of look and word; in short, he dressed with taste, danced marvelously, and sang like Rubini. But unhappily, these advantages were contrasted by great vices. A dissipated gambler, and unprincipled, the Cheva-lier Gaetan had quitted Naples in consewhich he had been implicated. Rather Tough.

The following story was told in Sandusky, Ohio, and appears in the Massillon

News, which says: A party of young men in that ancient city amuse their leisure moments at the hotels in drawing a long bow, or telling wonderful yarns to each other for the benefit of those apparently verdant, who may happen to come in from other parts. They tried the effect of a few extraordinary wolf stories upon a venerable and sedate customer not long since, who had come to prise and interest until their stock appeared to have run out and the conversation flagged, when he remarked that he had been much interested in the news they had given him, relative to the primeval inhabitants of that country; but regarded an event in his early life as more peculiar than any they had named. Said he:

"When a young man, I was travelling in western New York, and late of a stormy night applied at a log cabin for lodging. The occupant, a woman, refused it, saying that her husband and sons were out hunt ing, and if they found me there, would murder me. I preferred the chance to the storm, and she consented that I might lie down before the fire. In the night I heard them coming, and scrambled up the chim-

"Thinking I was safe when at the top, I stepped over the roof, and, jumping down at the back of the cabin, jumped plump into a wolf trap. A scream of pain brought the men and the boys out, and they declared I deserved a more severe punishment than death, so they kept me both in the trap and in suspense until morning, and they put me on a sled and drove me some four miles up a hill and there rolled me off to starve. This I undoubtedly should have done but for a very singular occurrence. The wolves smelled me out and gathered round my prison, when one of them in turning round happened to thrust his tail into the bung hole. It was my only chance. I caught firm hold and held on like "grim death to a dead nigger," which frightened the wolf, of course, and he started down the hill, followed by the hogshead and me. It was a very uneasy ride, over the stones and stumps; but I had no idea how long it was until the hogshead striking a stone fairly, the staves, worn by long travel, were broken in and I jumped out to find myself away down in the lower end of Cattaraugus country, not express any doubt of the truth of your

set the same value on half a crown now as he did when he was worth only £100. That great captain, the Duke of Mailborough, when he was in the last stage of life, and very infirm, would walk from the public room in Bath to his lodgings, on a cold dark night, to save sixpence in chair hire. If the duke, who left at his death more than a million and a half sterling, could have foreseen that all his wealth and honors were to be inherited by a grandson of my Lord Trevor's, who had been one of his enemies, would he have been so careful to save a sixpence for the sake of his heir? Not for the sake of his hen, but he would

have always saved a sixpence. Sir James Lowther, after changing piece of silver in George's coffee house, and paying two-pence for his dish of coffee, vas helped into his chariot (for he was lame and infirm) and went home; sometime after, he returned to the same coffee house on purpose to acquaint the woman who kept it that she had given him a bad half penny, and demanded another in exchange for it. Sir James had about £40,-000 per annum, and was at a loss whom to appoint his heir. This man died intestate, and left more than £1. 200,000 in the funds, which were shared among five or six day laborers, who were his nearest relations.

Sir William Smyth, of Bedfordshire, was my own kinsman. When he was near seventy he was wholly deprived of his sight; he was pursuaded to be couched by Tay lor, the occulist, who, by agreement, was to have sixty guineas if he restored his patient to any degree of sight. Taylor succeeded in his operation, and Sir William was able to read and write without the use of spectacles during the rest of his life; but as soon as the operation was performed, and Sir William saw the good effect of it, instead of being overjoyed, as any other person would have been, he began to lament the los (as he called it) of his sixty guithen, heading me up in a hogshead with neas. His contrivance, therefore, was how no air or light but through the bung hole, to cheat the occulist; he pretended that he had only a glimmering and could not see anything perfectly; for that reason the bandage on his eye was continued a month longer than the usual time. By this means he obliged to Taylor to compound the bargain, and accept of twenty guineas; for a covetous man thinks no method dishones: which he may legally practise to save his money. -Dr. King's Ancedotes of his Own

Times affirms that the Emperor ALXXANDER tried twice, but without success, to lure away Louis Napoleon from the alliance with England. It is stated that friendly courtesies, "but of a strictly private nature, have been kept up since the commencement of the war, between members of the imperial family of Russia and the Princess Mathilde, the cousin of the Emperor of the French, a natural result of her union with Prince Demidoff; in September last, a political turn was given to this, and one of the small German States undertook to bring about a separate peace between France and Russia. Russia communicated to France the concessions she was willing to make, (and which subsequently were published in the circular despatch of the 22d of December,) and in addition, offered to France special advantages for herself. These temptations, however, the Emperor

resisted, although the alliance offered by Russia opened the widest field for French ambition and love of conquest; considerable territorial acquisitions were to be the price and the result of this union of the two greatest and most aggressive military Powers; but it involved a breach of the Em peror's engagement with England, which would have thrown him into the same path and career as his uncle had unfortunately trodden. The Emperor, on refusing these overtures, communicated them to London and Vienna. The result in this latter capital was that Austria became suddenly alive to the danger to which she had been exposed, and quickly resolved upon putting herself on an unequivocal footing towards aii parties; the proposals she drew up for the conclusion of a peace, after being revised and somewhat sharpened in London and Paris, were forwarded to St. Petersburg, and accepted there. While these negotiations were going on, Russia got wind of them, and endeavored to anticipate them by authorizing Price Gortschakoff to communicate in Vienna the concession that had been already mentioned to France, and which formed the contents of the despatch of the 22d of December. The Prince accordingly called upon Count Buol, and addressing him with; 'Well, my dear Count, I bring you peace,' opened his budget of commucations, but met with the objection

seph Gales, esq., to visit the Capitol. He was accompanied by a young gentleman, and I presume it was his first visit during the present session of Congress. I happened to be present when, in the course of is walk, he entered the Hall of Representatives. It was, perhaps, half an hour be fore the House was called to order, and there was the usual hum of talking and laughing voices. But the moment his presence was observed, the remark, 'There's Mr. Gales,' went the entire round, and a general silence prevailed. Those who were personally acquainted with Mr. Gales went forward to shake him by the hand, and those who were unknown to him begged to be introduced. One honorable member went off to inform the Speaker of the unexpected visitor, and that gentleman came forward to present his compliments, so that in a short time there was quite a crowd assembled around the venerable editor. His step was as firm as ever, and most dignified, and as he appeared uncovered, (where head. Then I hope he will furnish the Senate a biographical sketch of him.
