The Fort Hatterns Prisoners

We learn from the New York papers that, Wednesday, the prisoners taken at Hatter Inlet were transferred from the frigate Minnesota to Fort Wood, on Bedloe's Island, and to Castle William, on Governor's Island. Owing to the fact that the Havy Department intend fitting out the frigate Brandywine as soon as possible, it was decided not to have her converted into a prisonship, as was first designed. Therefore the plans were altered so that forts, not ships, will be military prisone. The Commercial of Wednesday afternoon gives the following account of the removal of

the prisoners from the Minnesota: This morning, about nine o'clock, the steam-boats Saturn and Sarah A Stevens went off to the frigate for the purpose of taking the rebels to their prison home. The Stevens occupied the the frigate for the purpose of taking the rebeis to their prison home. The Stevens occupied the starboard side, and the Saturn th: port side. At a few minutes of ten o'clock the embarks tion commenced, and a more interesting sight has been seldom witnessed on the waters of our bay. The roll of the company was called, and as each man answered to his name he passed over the side, down the gangway ladder, thence crossing the deck of a coal barge lying thence crossing the deck of a coal barge lying alongside, he stepped on board of the steam-

As fast as they came on board they were or-dered to be scated on the after part of the deck. Each man, as he came down, brought his traps with him. These consisted for the most part of blankets, old coats, and perhaps a few old shirts. Some men had small trunks, and many were provided with valises. The embarkation was performed in a very rapid manner, and without any accident.

At this time dozens of small boats had comoff to the ship to see the process of disembar kation, and many of them contained ladies In their anxiety to get a good view of the pris-oners, they crowded around the ship too close-ly to be either safe or lawful, and the officers of the ship in vain tried to drive them away. At this juncture Coxswin Nesbitt, of the har-bor police, came off, and soon kept the boats

at a proper distance.

About 10 o'clock the lines were cast off from publicly in Washington City last winter, that the frigate, and the Stevens headed down the bay with over three hundred privates of several different companies on board. regularity.
On acriving at Bedloe's Island the Stevens was secured to the deck, and the prisoners on the forward dock landed in single file. On the dock a few regulars were drawn up, while guard of the Fire Zonaves were present to es cort the prisoners to their quarters in Fort Wood. As soon as the portion on the after deck were landed, the prisoners were drawn up in line, the roll called, and all found correct. They were then marched up to the

also see it stated that the people of Belfast, Maine, are greatly agitated by the arrival of a number of boxes in that city from Boston, containing muskets, cartridges and other munitions of war, which has gone into the hands of about 200 men, who have openly proclaimed their disloyalty to the government and organized themselves into a company, without any authority from the State, declaring it their object to resist any attempt made to draft any member in their ranks into military service and

the payment of war taxes.

In Connecticut, the Legislature has found it necessary to pass an act for the suppression of secession meetings, and the latest Northern papers tell of a sheriff who had to ride over to neighboring town to haul down a secessio flag, and that he required the aid of a consider able posse in order to accomplish the object. These facts look rather ominous when taken in connection with seventy five Northern newspapers that openly denounce Lincoln and the

HOW A MAN FEELS WHEN HE IS SHOT .-- We take the following from a letter written by one of the lows volunteers, who fought in the battle near Springfield, Missouri:
"I was standing, or rather kneeling, behind

a little bush, reloading my musket, just before the rebels engaged in this close work retreated Suddenly I felt a sharp pain in the shoulder, and fell to the ground. Jumping up, one of our boys asked me if I was hurt. I replied that I thought not, and drew up my musket to fire. when he said; 'Yes, you are shot through the shoulder.' I think it was this remark, more than the wound, which caused the field all at once to commence whirling around me in a very strange manner. I started to leave it, with a half ounce musket ball in my shoulder. and once or twice fell down with dizziness, but in a short time recovered sufficiently to be able to walk back to Springfield, nine miles, where the ball was taken out.
