Saluda Manufacturing Co.

RESOLVED, by the Board of Directors of Saluda Manufacturing Company, That the Books shall be opened on the 1st day of March next, at the counting house of D. & J. Ewart & Co., for an additional subscription of one hundred thousand dollars to the capital Stock of the Company. New subscribers will be lates to their own Brigades, to their respective comadmitted into the Company on the same terms and on the same conditions of original subscribers. Ten dollars a share on each share of one hundred dollars, will be required at time of subscribing, and ten dollars a share at the end of each and every sixty days thereafter, entil the whole will be paid. A failure to comply with these terms, will inure in a forfeiture of the stock for the benefit of the Company. The Company having one fourth of the mill filled with machinery, and now in operation, and another fourth in progress of setting up, are able to calculate to a reasonable degree of certainty, the value of their undertaking. To make the establishment available to the full extent of which it is capable, they have come to the determination, provided they can sell the stock, to fill the mill from the basement to the attic story. The citizens of our State, and particularly the present stockholders, are called uson to aid in an undertaking which will be a credit to our State, and will most unquestionably exceed in profitable or pecuniary results any joint stock company within the State.

Old English Poetry.

MONTANUS'S FANCY.

GRAVEN UPON THE BARKE OF A TALL BEECH TREE. First shall the heavens want starry light, The seas be robbed of their waves: The day want sunne, and sunne want bright,

The night want shade, the d ad mens graves. The April, flowers and leafe and tree, Before I false my faith to thee. First shall the tops of highest hills

By humble plaines be overpride: And poets scorne the Muses quils, And fish orsake the water glide; And Iris loose her colored weed. Before I faile thee at thy need.

First direful hate shall turn to peace. And loue relent in deep disdain; -- --And death his fatall stroake shall cease, And enuy pitie euery paine,

And pleasure mourn, and sorrow smile, Before I talke of any guile.

First time shall stay his stayless race, And winter blesse his browes with corne: And spow bemoisten Julie's face, And winter, spring, and summer mourn, Before my pen by helpe of fame, Cease to recite thy sacred name.

ROSADER'S SECOND SONETTO.

TURNE I my lookes vn:o the skies, Love with his arrows, wounds mine eies, If so I gaze vpon the ground, Loue there in every flower is found. Search I the shade to flie my paine, He mee's me in the shade againe : Wend I to walke in secret groue, Euen there I meet with sacred Loue. If so I bayne me in the spring, Euene on the brinke I heare him sing : It so I meditate alone, He will be partner of my mone. If so I mourn, he weeps with me, And where I am there will he be. When, as I talke of Rosalynd, The god from covnesse waxeth kind, And seems in self-same flames to fry, Because he loues as wel as I. Sweet Rosalynd, for pity rue, For why, then Loue, I am more trve : He if he -peed will quickly flie, But in thy loue I liue and die.

Thomas Lodge-1596.

Attached to the chair, would be a patent vailing; for the power required to wind up the power would not occupy a space of more than shops in Paris are, each day and evening, pre- whale line, two thousand and fifty feet long, heavy weight which moves the machinery two feet square, we cannot see why, in case therein is revealed the ingenuity of the Submerged during the day, and at night ap had not sufficient power to give forth its full ing vessels over every part of "the wide ex-French, and many a green one, and many a proach the surface. Everything then perfectly tone. Unfortunately, it also happens that the panse of illimitable waters," and thus effect nowing one, is beguiled into jewelry and in order, I should then go on shore provided note of the bell accords so perfectly with the what has long been "s consummation deroutly kid gloves, to say no more, merely because it with some other small articles, such as a ball ocean's roar that in stormy weather it cannot to be wished," short, and certain passage to is pleasant to higgle about their price with such of strong twine, an iron bolt with a block, be distinguished from it even at the point of Europe and other parts of the world .- Phil.

The Exeter News Letter relates the ful? lawing excellent anecdote :-

"A countryman from the northern part of the state, once called upon Gov. Wentwork at Portsmouth, and begged his acceptence of saddle of vension. The Governor loved vension and smiled most graciously upon Jon, athan as he accepted the present, and thanked and was in no hurry to depart: The efraud was but half done, his Excellency inquired of him, if he could in any way be of service to him, when Jonathan informed him that there was no Ensign in the militia company at and would be dreadfully obliged to his Govemorship for a commission. The Governor would be very happy to oblige him, if he had the proper recommendations; and asked if or sent any evidence of their wish for his appointment? "Why, no, may it please your Excell ney's Honor," said Jonathan, "there are only two other men in town but myself. and one of them is the Captain, and the other the Leftenant, and they exercise me and manœuvre me so much that I am really afcard if I'm not made an Ensign pretty soon; they'll drill me to death."

A MISER'S PRAYER.

Among many curious papers found after

"Oh, Lord thou knowest that I have nine women, arose rather from arbitrary usages of imperial majesty, and propose his return to houses in this city of London, and likewise society, than from any physical differences of France, where he would meet with a very that I have lately purchased an estate in fee simple, in the county of Essex. I, beseech woman has a certain place. In Italy, in to confirm her in this opinion for, as she pro- outline of this daring and ingenious plan; the thee to preserve the countries of Essex and Switzerland, in Germany, in England in Scot- ceeded in her out door labors, her health whole of the negotiations for which were, he Middlesex from fire and carthquake; and to the Mermaid sloop, because I have instinct it; and as thou hast said that the days of the QUODDY HEAD .- Dr. C. T. Jackson, in wicked are but short, I trust in thee that thou will not forget thy promise, as I have pur-

> Important Invention .- Philosophers have long known the power of the magnet, and may ny have been their attempts to apply this pow? er to the propulsion of machinery, but heretofore all these attempts have been vain and fruitless. The great difficulty has been that when attrac; ed to the poles of the magnet, the needle or iron became stationary; to neutralize the attractive power, or to cut it off at the point of maximum attraction, has been often attempted, but in vain, and the terning this power to any useful petual motion; when a Mr. Davenport, a sim? ple blacksmith of Vermont, succeded in discovering the long sought for secret of changing the poles of the magnet, so that at the instant it arrives at the point where but for its poles being changed it becomes stationary, this is accomplished, and repulsion immediately takes place. The poles can thus be changed; if ne cessary, ten thousand times a minute, so that attraction and repulsion instantaneously succeed each other and propel the machine.

> We saw in New York, the other day, & small machine about the size of a unin's hat? of equal length, made of soft iron: around The shafts, where magnetized by a current of the arms and the shaft are kept up, with & power and velocity corresponding with the

The galvaric battery from which the steam Helena) abreast of Longwood house, the rolls over, and sinks, or is dashed to pieces is produced may, for a pretty large machine, highest point of the island, and being two by the surf, as it were, in a moment, before be contained in a quart cup, and this is all the
