MESSES. FOWLER & McDonald are now botter prepared to show the Ladies of Abbeville District a handsome stock of Dry Goods than ever before. The Ladies are especially invited to examine their stock before buying. They will always strive to keep goods suited to the taste of the Ladies of our District. White Goods.

Abbeville can boast of as fine a Millinery House as any in in the proval bonds and mortgage of the premi-State of South Carolina—in fact, as ses. fine as any in any city, North or . South. The stock will compare with any Retail House in Charleston, Baltimore or New York. The Ladies can have no plea for sending off for their millinery any longer, for Messrs. Fowler & McDonald can show as pretty goods, as fine goods, as stylish goods as can be found in Baltimore or New York. And, besides, they can prove their prices to be from 25

to 50 per cent. lower than city prices. They have every style of Hat and | This tract contains about Bonnet that is out. Should any new and novel style make its appearance in New York, they have arrange-ments by which to get it immediately, hence there is no necessity for the Ladies of Abbeville to pay city prices when they can do better at home. Mrs. Sassard has had experience,

both in Europe and America, and, we think, has the confidence of every Lady of taste in Abbeville. She is assisted by Mrs. Jno. A. Wier whose good taste and skill in this Department is well known to the Ladies of Abbeville, and will always be pleased to see her friends at the Emporium of of Fashion. Mrs. Sassard and Mrs. Wier will take pleasure to show the Ribbons, Sashes, Curls, Switches Chignons, Embroidered and Braided Yekes and Bands, Skirts, Corsets, Pads, Breast Protectors, Buttons, Shell and Gold Beads, cut and uncut Velvets, Satins, Silks, trimmed and untrimmed Patterns for all kinds of Ladies' and Misses' Garments from Demorest, of New York, Rouches

#### THE MILITIA

The records of enrollment not havof arms and accoutrements appropriated to the State not having been received from the Federal Government containing FOUR HUNDRED ACRES, until recently, the organization of the Militia has been somewhat impeded It will be hastened, however, as rapidly as practicable, and I hope soon to be able to report that the requirements of the law have been fully complied with.

A change is demanded in the system of selecting juries. As at present manged, it is liable, and perverted to great abuse, an account of the character of the persons placed upon them. Men have been appointed on Grand and Petit juries who were at the time, and are now, under heavy bail on charges of complicity with murder; and in one case, when one of these accused individuals was foreder submitted to them by the Solicitor of the Circuit were ignored and thrown out. notwithstanding the oaths of witnesses who identified the accused as participants in the murder, ing further proceedings of the same accused as participants in the murder, in the further proceedings of the same accused as participants in the murder. Cases are decided, not by the guilt or innocence of parties, but in accordance with the political bias of the juries; and, from the intensity of pre indice existing, it is vain to expect a better condition of things while the present system of drawing juries continues. This corruption of justice at the fountain head demands a prompt and efficient remedy, which will place the jury box above the influence of politics, and fill it with our best and

The cause suggests the remedy, and fisheries belong to the State, and The wide latitude heretofore given to the discretion of Magistrates and Courts has had the effect to crowd our jails with petty offenders, at a heavy expense to the State, much of neanors of similar grade, with power ance on a credit of one and two years, by fine. This would obviate the neso manipulated as to involve the largposes, frequently from political motives or political objects.
