No. 31.

JOHNSTON LETTER.

Splendid School Opening. Mission Society Elects Officers. Stag Supper for Mr. Wright.

The Johnston High School opened last Tuesday with a splendid enrollment, and the school is most fortunate in having Superintendent Alexander at the head. He comes highly recommended, having had several years of experience, and everything promises to work well, along all lines. At the opening there was a large number of patrons and friends, and this was indicative of the interest in the school work. Short talks were made by the pastors of the churches who greeted the new scholars and new teachers and extended a cordial invitation to each to attend the church services. Mr. Heber Ballentine, one of the trustees made a few remarks on the school work and congratulated the school on its splendid corps of teachers. Superintendent of Education W. W. Fuller, was present and made some happy remarks concerning the school, its past work and of the bright outlook. Mr. Alexander said this school had a most unique distinction in having 127 in the high school and of these 21 are in the 11th grade. The total enrollment is about 300. He said he had no rules, in the beginning, to outline to the students-right is right and wrong is wrong-would be the measuring rod, and he hoped that nothing would arise during the term that would cause any rule to be Sunday. made. With Mr. Alexander, the superintendent, are Prof. Stanton Lott, principal, Misses Antoinette Denny, Dessie Dean, Sara Aycock, Marie Gaillard, Estelle Owdom, Floride realized. Hendrix, Ruby Glover and Mrs. L. C. Latimer. Miss Veda Barre is again musincal likector.

The manual training class is a large one this year, and is a department that has created much interest and has proven what splendid talented young men there are in the school. The exhibit at the close of the last term certainly verifies this.

Mrs. M. M. Coleman of Aiken and Prof. Coleman of S. C. university have been guests in the home of Mr. and Mrs. W. E. LaGrone.

Mr. and Mrs. J. A. Lott of Greenwood were welcome visitors here

during the week. Mrs. James Keith and little Elizabeth and Irene have been guests of

Mrs. Harry Strother. Miss Louise Watson will go to

Winthrop college this wek. Miss Mary Waters and Miss Mallie

Waters are at home from a visit to Mrs. David Phillips at Springfield.

At a recent meeting of the Woman's Missionary Society of the Baptist church, officers for the coming year were elected. President, Mrs. P. C. Stevens; vice president, Mrs. J. Howard Payne; corresponding secretary, Mrs. W. J. Hatcher; recording secretary, Mrs. J. Neil Lott; treasurer, Mrs. S. J. Watson; assistant treasurer, Mrs. T. R. Denny. The society decided to pack a box of clothing for the suffering of Russia and the members were asked to make contributions of second hand clothing and a committee was appointed to canvas during the week. This is "Bundle Week" and each member, and all interested were requested to observe the week with a good bundle. There will be many that perhaps will freeze and starve to death this winter, so the box is expected to be

ready for distribution as needed. Mrs. Sallie Rice Owen is visiting Mrs. John Wright.

Logue were the colored porter informed me that the "New York Giants," ball players, had engaged most of the car. I think he was perfectly delighted that he was to serve professional athletes, and I climbed into the upper, resigned by necessity to this last irony of fate. The "Giants" were exceedingly quiet. If they had been Mr. S. A. Holston spent one day school boy players, I think they ted their aunt, Mrs. Margaret Stev- fun like the amateurs.

I have not been here long enough Mrs. Plyney Perminter is on the this time to feel like a Bostonian again. I look out over the tops of grayish buildings and think, "This is not Boston." What is Boston anyway and where is it? I want to put my arms around it all at once and tell it that I am here, but the streets stretch endlessly into more streets as far as the eyes can see. So Boston as someone said, is not a situation, but a condition; not a locality, but a state of mind.

Think in terms of Boston and you are a Bostonian. Think unlike it and here, at least you are a heretic.

Be still, and it will delight you, in leaving."

New Courses in Agriculture.

Clemson Colleme, Sept. 12 .- With professionals are settled and serious the beginning this week of the ses-Mr. and Mrs. M. D. Lyon, Jr., vis- with pep for business and less for sion of 1922-23 the agricultural department adds a complete new line of study in the form of a two-year course for young men who want good training in agricultural subjects but can not take the four-year courses for graduation, and adds also to the agronomy division a new subject, the marketing of farm products. These are important additions to the work of the resident teaching in agriculture, filling needs that the faculty is glad to be able to meet.

The new two-year course in agriculture was created to give a broader training than that given by the she has inherited. one-year course. It contains more fundamental education in the first year and more agricultural work in and take you for its own. I like the the second year. The one-year course quietness as though it fairly said "I in agriculture, which teaches the perience, will be given also. Neither the two-year course nor the one-year course is intended as a sbstitute for the four-year degree courses in agriculture, but to reach with practical agricultural training those of more limited opportunities who can not take the four-year courses.

The subject of marketing, which iron now, but can not pay over 15cts. will be added to the course of the agronomy division, will be given by Gr. King's New Discovery

spent the week-end here with the Miss Florence Mims Renews Edgefield Baptist Association professor of agronomy, who will handle the farm management and farm marketing work for that division. Marketing work as been conducted by the Extension Service for several years and has been very effective in aiding farmers in the orderly selling of farm products, but so far no course of instruction in marketing has been given to Clemson College

In this connection it may be well to say that the teaching work of the agricultural department as now organized is done through eleven divisions: namely, agronomy, horticulture, botany, and bacteriology, chemistry, zoology and entomology, veterinary science, geology and mineralogy, rural sociology, and agricultural education, these eleven divisions offering over 100 courses covering the various phases of these sciences as applied to agriculture.

Vetch for Soil Building.

Clemson College, Sept. 12 .-Hairy vetch, because of its adapta-Members who had not met their bility to all the soil types of South assessments for necessary decora- Carolina, is the safest legume to sow tions, to be used whenever the as a winter soil building crop. It does well on soils ranging from sandy to As next month the election of of- heavy clay and will make a fair ficers will take place, Mrs. Agatha growth on soil so low in fertility Woodson moved that a nominating that crimson clover would be a complete failure.

> Vetch is a nitrogen gatherer of first importance . A growth sufficient to produce one ton of hay will contain approximately 50 pounds of nitrogen, and the stubble and roots of this will contain about 12 more pounds of nitrogen. This sixty-two pounds of plant nitrogen is equal to the nitrogen in about 417 pounds of nitrate of soda. Three fourths of this is gathered from the air by the legume bacteria on the vetch roots and is a clear gain for the farmer. Besides converting air nitrogen into an available form, vetch prevents the loss from the soil by leaching and erosion of approximately 50 pounds of nitrogen per acre.

Vetch may be planted either alone or with any small grain, suggests R. W. Hamilton, Specialist in Legumes, who says that on poor soils rye and vetch will give the largest amount of growth for turning under. Twenty rye or two bushels of oats per acre Several most interesting letters should be used. Seeding may be done from General Mart Gary and one to broadcast or in the drill. In drilling oats and vetch together the seed in the hopper should be kept well stirred or the planting will not be even.

Inoculation of vetch is absolutely necessary for its successful growth on land that had not previously grown vetch. Inoculation may be done by the pure culture or by the soil method. Soil where English peas or sweet peas have grown and produced nodules on their roots may be used as these two legumes and vetch are inoculated by the same strain of

bacteria. Further information regarding the growing of vetch may be obtanied from county agents or from the Extension Service of Clemson Collège.
