E. T. TAYLOR & CO., MANUFACTURERS OF PREMIUM COTTON GINS, AND PATENT EXCELSIOR STRAW CUTTERS, Columbus, Ga.

THE Subscribers having completed important additions to their extensive Gin Manufacturing Works, and perfected in all respects the details of their celebrated Patent Excelsior Straw Cutter, beg leave to call the attention of Planters, and all others interested in the cultivation of Cotton, and the raising and feeding of stock, to the importance and advantage of using the above named Machine. On the subject of their

PREMIUM COTTON GINS. little need be said to satisfy those who feel willing to be convinced of their superiority over those of any other manufactory, as evidenced by the numerous certificates to that effect from our most extensive Cotton Planters and cotton dealers, and in the premiums which have been uniformly awarded them by the various State Fairs and Agricultural Societies in Georgia and South Carolina, during the last five years. To all interested they would say they are prepared to supply on terms more reasonable than ever, any number of their Gins; all of which they fully warrant to give satisfaction with proper usage.

They would also call the attention of those interested in feeding stock, particularly to their newly invented Patent Excelsior Straw Cutter, manufactured only by themselves, and for sale by their authorized Agents in the principal Cities and Towns in the United States. This Cutter they confidently offer as the most complete and effective machine for cutting hay, straw or fodder, ever invented.

The objections which have been urged against all the straw and hay cutters heretofore used, viz: Slowness of operation and difficulty of keeping in repair, in this machine are entirely removed. As to its speed, they confidently assert that it would run over a hundred per cent. more than any other Cutter ever used. The knives are nineteen in number, of fine cast steel, presenting a cutting edge of thirty-seven and a half feet. As they are never brought in contact with anything but the straw or other material to be cut, they do not wear out the machine, or become dull. The whole of them can be changed in five minutes, without removing them from the machine. For the correctness of these assertions, they refer to any of their numerous patrons.

All orders received by letter, or through any of their Agents, will receive prompt attention; and any information cheerfully given, on application. E. T. TAYLOR & CO., Columbus, Ga., Oct. 6th 1852. BILLINGS & BELK, A. S. S. C., Lancaster, C. H., S. C.
