The idea is an attractive one, much more so than would be that of a "strawberry party" if one had to help one's self from the vines.

Speaking of Mrs. Alice J. Shaw, the American whistler, The Saturday Review of London remarks that many people have been asked out to hear her, regarding the whole thing as a joke, and have come away in simple wonder at the unlooked for display of her powers. They have found her a sound musician and a subtle mistress of her particular art. They have found that, through her special medium, she could fill Covent Garden with ecstatic trills or sink into the softest whispered notes the execution of which only years of rehearsal could achieve. It may be difficult to conceive a whistling prima donna; but the fact is that whistling as a fine art is worthy of attentive study. Those who have once heard Mrs. Alice Shaw cannot fail to realize that, if whistling were cultivated as a fine art by those who, in addition to musical endowment, have strength of vocal chord, a high roofed palate, and a flexible buccal aperture, they might be trained to take part in a concert, as of many clarionets, with an effect more thrilling than the most exquisite instrumental music has ever ponjured up, and which, from its novelty alone, would be more surprising than any concert hitherto heard, whether instrumental or vocal.
