COUNTY AGENTS' NOTES.

See Vetch and Clover Pasture.

"Vetch and clover can't be beaten for a pasture," says C. W. Bauknight, of Walhalla, and those who are interested in seeing his fine pasture of vetch, bur clover and white clover should look the field over on Saturday, May 14, at 2 o'clock, when those interested will assemble in front of his store and proceed to the pasture on the edge of town.

"A gullied hillside, where a scrape was used to fill the ditches is where I began three years ago," says Mr. Bauknight. The growth is now from ten inches to two feet high. It has reseeded each year, and last year there were about ten cows and two mules on the six acres from June 1st to frost.

Rev. W. B. Aull is also a big vetch grower, and the party will look over his field if it is still standing.

Wire Bought Co-operatively.

On Thursday, May 5th, a carload of barbed wire, which was bought co-operatively from the government, was unloaded at Walhalla for about six farmers, who will fence some mountain land for more live-stock. The saving on these eighteen tons of barbed wire was approximately \$300. If co-operative buying pays, why not co-operative selling?

Visited Vetch Field.

Those who went to Townville last Friday saw a wonderful field of vetch at Lee Gaines's place, and they say they are going strong on vetch this fall. In an old cotton-field where vetch had reseeded itself the growth was nearly impassible—from three to five feet tall, thickly matted and of uniform growth. The cotton stalks remaining on this field showed unusual evidence of production, and Mr. Gaines stated that one and three quarter bales per acre was produced on this field.

Poison the Borer.

In these columns lately was published Prof. Conrad's advice to plant some hills of squash ten days ahead of the cantaloupe planting, in rows by the cantaloupes, so that the cantaloupe borer would eat the squash instead of the cantaloupes. It should have been stated also that the squash plants should be kept dusted thickly with plain arsenate of lead in order to poison the borers feeding on the squash plants in preference to the cantaloupes.

Dust the poison on while there is dew on the plants.

Geo. R. Briggs, County Agent.

Mrs. Frank Harper and baby, of Columbia, are visiting the former's mother, Mrs. Geo. L. Wilson.

Mrs. Claude McMahan, of the Fairview section, spent several days last week in Walhalla with her parents, Mr. and Mrs. W. M. Alexander.

Miss Anna Belle Strickland, of Pelzer, spent the past week-end in Walhalla with her former college friend, Miss Anne Strutton, at the home of Mr. and Mrs. W. A. Grant.

Farmer's Skull Fractured.

Pictures for the Home.

Pictures on the walls of our homes reflect our taste and mold the characters of the inmates of the home. Since thought influences character, our thoughts should be directed to the good and the beautiful. Beautiful pictures give us beautiful thoughts and high ideals. It would be difficult to estimate the good influences that come from contact with inspiring pictures.

Selection.—Good copies of the masterpieces of great artists are easy to obtain and are inexpensive. A few good pictures of this kind are far more valuable than a large number of poor, meaningless pictures.

In living room, dining room and other rooms which all of the family use, pictures should be chosen that are of interest to all. Pictures of places and people of historical interest are especially good for those who are students of history.

The Bible is the source of inspiration for a multitude of excellent pictures which are stimulating to all. Pictures of landscapes and animal life point out to us most forcefully the beauties of nature. Personal photographs should be reserved for private bed rooms or "dens." Highly colored pictures of fruits, game and vegetables are no more suitable for the dining room than any other room of the house.

Framing.—The frame should add to the value of the picture and not detract from it. It should be narrow, very plain and in color should conform to the lightness or darkness of the picture. Fancy, decorated frames are unsuitable because they cheapen the picture.

Hanging.—In order to study and appreciate a picture it should be hung low enough to be seen easily. The bottom of the picture should not be above the level of the eye of an average person standing. When several small pictures are used on one wall the centers of all the pictures should be on a straight line. Step ladder style, so often used, shows a poor arrangement. The picture shows off to best advantage when hung flat against the wall. The picture wire should be as inconspicuous as possible. Use two wires that run straight to the moulding rather than one wire that runs to a central point.

There is no substitute for a good picture. We like to be surrounded by our friends, so let us make beautiful and inspiring pictures our friends, and visit them frequently.

Ethel L. Counts,
County Home Dem. Agent.
