The Duke of Veragua and Suite A CURIOUS OLD WEAPON. Reach New York.

He is the Eleventh Lineal Descendent of Columbus.

DUKE OF VERAGUA.

Don Cristobal Colon de la Corda, Duke de Veragua, Marquis of Jamaica, and Admir s and Adelantado Mayor of the Indies, the ineal descendant of Christopher Columbus chief of the World's Fair Commission from Spain, arrived at New York on the American Line steamship New York. He was meethere by Commander W. Dickins, United States Navy, the official representative of this Government, and by the special committee of citizens appointed by Mayor Gilroy to receive the distinguished guest and his suite, and extend to him the freedom of the cits.

his suite, and extend to him the freedom of the city.

Essides the Duke there were on board his wife, the Duchess; the Hon, Christobel Colon Aguilera, the Hon. Carlos Aguilera and the Hon. Maria del Pilar Colon y Aguilera, the Duke's brother; the Marquis Barballes and his son and the Hon. Pedro Colon y Aguilera.

cra.

The Duke of Veragua came here as the guest of the American Nation at the invita-

guest of the American Nation at the invita-tion of Congress to be present at the open-ing of the World's Fair in Chicago. He was welcomed to the United States by three different committees.

The first represented the Nation, the sec-ond the city of New York and the third a committee of Spanish Americans. Besides these there were members of the Citizens' Committee and the Honorary Reception Committee. Committee.
The first person to greet the Duke on his

The first person to greet the Duke on his arrival at Quarantine was the representative of the Februal Government, Commander Francis W. Dickins, U. S. N., who was accompanied by his wife. He delivered an address in Spanish to the Duke.

The Duke replied briefly in Spanish, thanking the United States Government for the display of its courtesy on behalf of himself, his family and the Spanish Nation.

An address was also delivered by General Horses Poster in Franch, presenting the Duke with the freedom of the city. The Duke with the freedom of the city. The Duke in a low, clear voice, replied briefly in French. The party were taken to the Waldorf in carriages.

The Duchess is a tall, well-formed woman of perhaps forty years, with a round, pleas-

The Duchess is a tall, well-formed woman of perhaps forty years, with a round, pleasant face and dark features. The Duke is a little, dark man of about forty-five years. He wears closely clipped whiskers.

His daughter the Hon. Maria del Pilar Colon y Aquilera, has a slender figure, dark omplexion and very dark eyes and hair. The Hon. Christobel Colon Aquilera is a sturdy boy of sixteen.

hon. Christobel Colon Aquilera is a sturdy boy of sixteen.

The Duke of Versgua Marquis of Jamaica and Admiral and Adelantado Mayor of the Indies, was born in Madrid in 1837 He is the eleventh in descent from Christopher Columbus. A genealogical tree of the descendants of Columbus shows that the line of descent is as follows: First—Cristobel Colon, discoverer of the New World and First Admiral of the Yadies, married Phillippa Moniz. Second—Their son, Diego Colon, married Marie de Toledo. Third—Cristobel Colon, Diego's son, married Anna de Payia. Fourth—Their daughter Francisca Colon—this being the first break in the male line of descent—married Diego Ortegon. Fifth—Their daughter, Josefa Ortegon, married F, de Paz de la Serna Sixth—The issue of this marriage was again a daughter, Josefa de Paz de la Serna y Ortegon, who married Martin Larrastegui. Seventh—Their son, Diego Larreategui y de Paz de Serna, married into the Carvajal amily. Eighth—Francisco de Larreategui, the offspring by their marriage, married into the Anguilo family. Ninth—In this reneration their son, Pedro Isidore de Larrastegui y Auguilo, married into the Jimenez de Embrun family. Tenth—Mariano de Larreategui y Jimenez de Embrun married a daughter of the Ramirez de Baquedano family. Eleventh—Pedro de Larreategui y Ramirez de Baquedano married into the de la Cerda family.

A Welter Weight Mill.

CONEY ISLAND, L. I .- Billy Smith, or Boston, and Tom Williams, of Australia, fought for the welter weight champion ship of the world and five thousand dollars. OLDEST TYPE OF THE MAGAZINE ARM IN THE WORLD.

Made in London in 1586 and Found at Baltimore After the War-Its Romantic History.

THE oldest type of magazine gun in the world is the John Cuck-son, which was made in London teenth Century. The only arm of this kind in the United States now known to be in the possession of collectors is held A. E. Brooks, and can only be seen by the collector's favorites.

A number of inventors, including Lieutenant H. K. White, of the United States Navy, have been afforded access to the arm, which is one of romantic nterest. The story of its loss and recovery in the city of Baltimore during the war is in itself a fascinating one, not o speak of the mystery that surrounded t for years prior to the attack on the Federal troops in 1861 in the city ounded in honor of Lord Baltimore.

This ancient gun bears the name and date "John Cuckson, fecit, London 1586." The magazine was calculated or ten shots and rested at the left of the breech mechanism. The bullets were ound and were ejected into place simulaneously with the powder. The use of int lock necessitated a device that would carry the powder into the pan, where it could be ignited by the spark from the steel. This was accomplished by a peculiar mechanism that carried enough powder from the magazine to the ight of the guastock, from which point he distribution supplying the basin took olace.

The magazine was operated by a lever on the left side of the stock, which noved in a semicircle at right angles with the magazine itself. The motion threw the left hand out and away from he gun until the quadrant was completed, when the hand in operation was Irawn back to the butt or stock.

It is an interesting fact that the ball adjoined the powder when loaded, the paper wadding that was regarded as indispensible in the cartridge that was used for 100 years before the war being conspicuous by its absence. The car-tridge of the present date is identical in principle, with the exception that it is elongated and attached to the shell containing the powder.

The sight, which is perhaps six inches from the muzzle, is a crescent in form. The muzzle shows a plain bore half an inch in diameter. The stock, which is fi tely preserved, shows rare and curious carvings. The heads of the screws even are embellished with figures of dragons and wild animals.

The cost of this old arm must have been great, as every particle of work connected with it must have been executed by hand. The gun was so expensive in design and workmanship that It could have been owned at first only by the rich and powerful land owner or military leader of the time of its manufacture. It is a plausible theory, at least, that it was brought to America by one of the wealthy colonists under Lord Baltimore. While there are no exact data at hand at present sustaining this notion as fully/as could be desired, there is unmistakable reason for ad-

hering to it as the only tenable one.

The history of the gun during the last thirty years is not destitute of exciting features. After the attack on the Union forces that were marched through Baltimore in April, 1861, the city was ordered to be searched by the Government forces, and arms of every nature were confiscated by the Provost Guard. These arms were rendezvoused at a central point, where they were kept under guard for four years. At the conclusion of hostilities, the residents of Baltimore, from whom the arms in question had been them. They were rusty, and the selections were generally of small value.

Strange as it may seem, the old magazine gun of the Sixteenth Century, was so unprepossessing in the rust and defilement of its long servitude that no one cared for it enough to take it home. In the end it was actually thrown away and left to be carried off by a ragpicker as old junk. It was purchased from the ragpicker for half a dollar and taken to an old German gunsmith in the city, to be transformed, if possible from the flintlock to a modera piece. Weeks afterward the German gunmaker decided that the job could not be done and that the old gun should have no better fate than the junk heap. A second trade was effected, and the repairer of old muskets became himself the owner, paying \$1.50 for the privilege.

It occurred to him one day, after assuming the proprietorship, that he would attempt to disassemble the gua. The process was slow and intricate. The more the man worked, the more he became absorbed with interest and delight. Eleven days were actually spent in the process. The rust was removed and the barrel polished to the old surface. For the first time the gunmaker, as he deciphered the inscription, began to understand the treasure that had come into his hands. It was found to be a veritable Cuckson, with possibly not a duplicate on this side of the Atlantic. So far as known, there is not one in the

United States. Mr. Brooks was in negotiations with the Baltimore owner for three years at least, trying to buy the arm. It was not until within a few months that terms could be made. A personal visit from the collector to the old German gunsmith was the only way that led to success in the negotiations. A large check was made payable to the Baltimore discoverer before his consent was obtained to the removal of the ancient weapon to Connecticut.

The army men and inventors who have seen the gun have gone into ecatasies over it, considering it one of the most interesting mechanisms known of in gun manufacture.-New York

An Underground River of Iron Water. At Charlotte, N. C., while prospect-ing for water for the oil and fertilizer works, Mr. Knox, the engineer, struck a great underground stream of strong iron water. It is located in the B ssell botom lands, to the southwest of the city. By means of driven wells, it was found that the stream is 700 feet wide and 51 feet deep. It is 45 feet below the sur-Considerable interest has been excited in the discovery. The water is strongly impregnated with iron, but the surprising part about it is the immense volume of the stream. Very pear this place is Dowd's iron spring.

HOUSEHOLD APPAIRS.

PRACTICAL HINTS.

China may be mended as firmly as a rock by the following recipe: Two persons will be needed for the work, however, for the manipulation must be rapid. The necessary materials are a little unslacked lime, pulverized; the slightly beaten white of egg, and a small hair brush such as is used for mucilage. Put the white of egg on the broken edges of both pieces to be joined, and immediately dust one edge with the powdered lime; put the two edges accurately and firmly together, hold in place for a minute or two and then lay aside

to dry. To keep your silver bright without constant cleaning, which is injurious to the plated articles, dissolve a small handful of borax in a dishpan of hot water with a little soap, put the silver, in and let it stand all the morning (or afternoon, as the case may be), then pour off the suds, rinse with clear, cold water and wipe with a soft cloth.

Use flannel to wash the children with in winter and they will be good-natured while bathing.

Put a sound, ripe apple in the tie box with your fruit cake, and the latter will keep without becoming crumbly or dry. -New York Recorder.

TO MAKE HOME MADE CANDIES. Butter Scotch-Boil a cupful of sugar, a cupful of molasses, half a cup of butter, a tablespoonful of soda. Stir frequently, and as soon as the syrup will snap between the teeth after being dipped in cold water, remove from the fire and flavor to taste. Pour upon a buttered tin one-fourth of an inc's thic's, and when nearly cold mark off in strips or squares and wrap in paraffli paper. This is excellent.

Lemon Drops-Boil one pound of sugar, a cupful of water and one-half teaspoonful of cream of tartar until a little dipped into cold water will say between the teeth without a suspicion of stickiness. Remove from the fire and ald tartaric acid to the taste, and flivor highly with oil or essence of lemon; oil is preferable if obtainable. Drop the candy from a spoon upon butterel tins to form drops, or pour into an oile l pia

and mark off in squares. Peanut Candy—Almond or peanut candy may be made by employing the same materials above, without the lavoring, by just before taking off, pouring in a goodly supply of nuts and letting the whole boil up once. D) not stir the syrup in any way, or it will grain, but when brittle pour on slab or

pan and mark off in strips.
Old-fashioned Molasses Canly-Pour into a large kettle a quart of molasses, boil for one-half hour over slow fire, stirring to prevent it from boiling over. When a little dropped in water becomes brittle, add one-half teaspoonful soda, stir quickly and pour out to cool; turn in the edges as they cool, and when cool enough to handle pull until it becomes a golden color.

These last three recipes make candies that grow very sticky if exposed to the air after the syrup is cold, but which will keep indefinitely if put in glass jars or tin boxes with tops securely fastened to exclude the air.

An oiled cloth wiped around the edge of a kettle in which syrup is boiling, making an oily streak just below the rim, will prevent its boiling over, and must be looked to in candies whic's cannot be stirred .- Good Housekeeping.

PALATABLE POTATOES.

Fried potatoes are a staple of family tables, but how many housekeepers serve them nicely? American fried potatoes are boiled first and slice! cold to fry. They need a large frying pan, or are best cloked on a griddle which has surface enough to let each piece lie next to the fire. The careless cook throws in potatoes enough to fill the pan, letting some scorch and others get sodden. Slice them a quarter of an inch thick, so as not to break in turning. Salt and pepper, and when the large spoorful of fat is turning brown in the hot par lay them in, brown quickly and turn with a broad griddle cake turner. Potatoes of secondary quality are best pared and sliced raw and fried. The heat of boiling fat, which is stronger than that of boiling water, drives the water out of them. Small, deep kettles are sold for frying, and the lard is kept in them and

used many times over. The Secret of "Chips"-The secret of frying Saratoga potatoss or "c'aips," as they are called, is to have then cold, crisp and dry before putting then in the boiling fat. They are sliced as thin as possible, soaked in ice water an hour or nore, and each slice dried on a towel, fried in very hot fat and drained on a sieve a moment in a very hot oven or over the stove, then cooled in a draft quickly. They are hardly worth the trouble.

The Virginia Way-They taste better to be sliced thicker, soaked in cold water, drained and friel in a covered pan with two or three spoonfuls of suct, turning brown before they are put in, salt and pepper thickly while cooking at leisure. This is a Virginia fashion of cooking potatoes.

Hoosier Potatoes-For dinner they are pared and boiled till nearly done, then put in the kettle with nice boiling white turnips to finish. As much turnip as potato is the rule, and the turnips must be put to cook half an hour earlier to be done at the same time. When done, drain; let the kettle stand uncovered over the fire a moment to drive out the steam from the vegetables, and mash them together, mixing well with two spoonfuls of butter, salt to taste and serve in a well smoothed mound in a hot dish with pepper on the top. Tais is a nice way of serving turnips, without the strong flavor most persons dislike, and potatoes of ordinary quality are better used in this fashion.

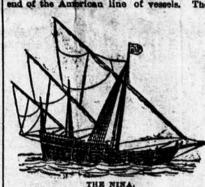

Kentucky Potatoes-Slice the potatoes as for frying, and soak in cold water for balf an your. Parboil in a frying pon, pour the water off, and let them stand on the fire uncovered till the steam is driven off; brown a spoonful of butter or fat and pour over them a minute after, then cover the potatoes with milk, in which they should boil till done. Salt and pepper while cooking, and watch lest they burn. There should be just milk enough when done for a creamy gravy, thickened by the starch of the potatoes. —St. Louis Republic.

The liquor dealers of South Carolina. it is announced, will fight the new dis-pensary law of the State from the lowest court to the highest,

THE CARAVELS ARBIVE?

The Santa Maria, Nina and Pinta An-cher is Hampton Roads.

The three Columbus caravels arrived safe-The three Columbus caravels arrived safe-iy at Hampton Roads, Va., from Havans in tow of three Spanish warships. They were received with thunderous salutes and dis-plays of flags of the countries represented by the fleets, and dropped anohor at the end of the American line of vessels. The

day was beautiful, and they came down the Roads decorated from jibboom to taffrail with bunting, including the old flags of Castile and Aragon. The little versels were tumbled about off the Virginia Coast on the day before in a lively fashion by the northeast wind that blew all day, but they managed to make the capes and, after taking pflots aboard, came in. At the head of the first was the unprotected cruiser Infanta Isabel towing the flagship Santa Maria, which displayed the flag of an admiral. Behind and a mile astern came the torpedo vessel Nurve Enpana with the Nina as her charge, and in the latter's wake was the big black protected cruiser Reina Regente with

the Pinta. They were towed by at least a quarter of a mile of hawser and looked like so many ducks sitting on the water with the feathers of their tails plucked.

When off the fort the Stars and Stripes where broken out and saluted by the leader, the fort quickly responding. Before the San'a Maria was abreast of the Philadelphia the Dutch frigate. Van Speyk ran up the Spanish colors and saluted them with thirteen rounds. Then the Russan salp Ceneral Admiral began to salute, and after every flag-ship in the harbor yaid home's to the carlous-looking crafts and the country tasy come from. sex came from.

TO EXCLUDE ULSTER.

A Move to Leave the P. ovince Under Imperial Rule.

London, (Cabl. gram.) - An important statement is made in regard to the Irish Home Rule bill. It is to the effect that when the bill r. aches the committee stage a large section of Redicals will sun ort a proposil to leave the cou dies of Lon 'onlerry, Antrim, Down and Armagh, in he province of Ulster under imperial

These being the counties in which the Unionist element is str ngest, and au-agenism to the Irish Home Rule bill here'ore pronounced, it is considered leubtful that Mr. Gla stone would as ent to such a scheme, even if the Ir'sh Nationalist m mbers are willing to do so. The proposition means a division o' Ira and, and the frish Legi lature c cated inder it would represent only a portion of the country.

The Trees ry officials are encouraged to hope that by Saturda , then x shipping day, the free gold may be increase I to a suffi ci n' sum to m e, the export demand. Secretary ile con inues to decline to talk on the situation.

No More Gold Certificates.

Secretary Carlisle Saturday directed the sub-treasurers throughout the United States to issue no more gold certificates at present. In doing so he simply obeyed the law, which provides that the Secretary of the Treasury shall suspend the issue of such gold certificates whenever the amount of gold coin and gold bullion in the treasury reserved for the redemp-tion of United States notes fulls below \$100,000,000.

In explaining his ac ion on this subject, Secrefary Carlisle said that while \$100,000,000 gold reserve had not yet been reached, he was so close to it that prulence dictated that no more gold certificates would be issued.

Florida Will be There.

JACKSONVILLE, FLA. - In a westbound freight over the Savannah, Florida and Western Railroad there are fifteen cars loaded with Flor da products and manufactures for exhibit in the Florida State building at the World's Fair. They include agricultural and mineral products, many varieties of woods, educational work, art exhibits, fruit, (natural and preserved.) b tanical specimens, etc. Btate Commissioner A. O. Jackson will have most of this material in place before the opening day of the Exposition.

The Liquor Men Begin the Fight COLUMBIA, S. C .- The fight against the dispensary law in this State was brought up in the Supreme Court on the case from Chester, where two barkeepers ask that the city be compelled to issue them license for a year. The new liquor law goes into effect on July 1st and the town refuses to issue license later than that dat. The court reserved its decision until May 1st, when the argument will
