A syndicate of Milwaukee bachelors who undertook co-operative housekeeping has failed. One of the four men is to be married, and the others do not cars to keep up their establishment, which costs \$500 a month.

The statement that a woman could be implicated in every case of bomb throwing which has taken place in Paris has been proved. The New York World facetiously asserts that women are employed almost exclusively in the dyramite factories of France, and are equal upon provocation to blowing men up.

In the latter part of October a good roads congress will be held under the auspices of the Agricultural Department of the Columbian Exposition Road machinery, taxation, legislation, tolls, free roads, repairs, and material for construction, will be discussed. The object is to advance the cause of good roads in Anferica, and to develop a more practica system of improving our highways, bes methods of construction, and to encourage the public and private support for the same. The congress will be held in the permanent Memorial Art Palace in the Lake Front Park. T. Butterworth, of Chicago, is Chairman of the committee.

The labor troubles in Lancashire, England, which ended by a compromise take rank as the greatest struggle be tween capital and labor which the worl has seen. The campaign lasted twenty incomplete condition of that matter, the weeks, involved directly and indirectly 125,000 employes, and cost in loss of wages alone \$10,000,000. Each side was equally willing at the outset to engage in a test of strength, and at last they were just as glad to call a truce with the honors even. Great sacrifices have been endured, with no result, save that both parties to the conflict have had all desire for fight taken out of them, and the advantages of mutual compromise are for the time being fully conceded The operatives have in the terms of peace conceded just a shade more than the masters, but there has been really no victory for either side. The plans agreed upon for settling future disputes seem to be the best ever devised thus far. They assure the necessary stability in the cotton market by limiting all future changes to five per cent. at intervals of not less than one year.

A strange and grostesque figure disappears from the upper ranks of the British nobility with the death of the Duke of Bedford. Succeeding to the dukedom on the suicide of his father only two years ago he has, accor ling to the New York Sup, exhibited in an intensified form the Russell family traits. He was practically a recluse and never had any intimate associates. Though enormously rich he was a miser. Scores of acres of the most valuable property in the heart of London belong to his estate. His passion for saving manifested itself when a boy at school and it remained with him medical school of Howard College, till the day of his death. Nover a day passed without his saving something and reckoning how much he had saved. After his succession to the dukedom and examination. She stood well in fall vast property accompanying it the passion increased. His one absorbing thought was to pile up further hoards, to find new possibilities of retrenchment, to form ways of increasing the unneeded surplus, and every penny he continued to invest by the best advice procurable in the soundest securities. During the last few years he had become physically almost a monstrosity. He was well proportioned and active as a young man, but indulgence of a most gluttonou appetite soon made him corpulent. The very corpulence that made more exercise nongrapy programmed exercise at all. Of been most se dentary. For days together he would not go outside his house. His appetite was huge, gross, enormous, Gargantuan He ate, as an eminent man who knew him better perhaps than any other de scribed it, like a wolf. He was reputed

At 2:30 the merchant marine was sigsalled to get away. The Scabird, with the committee on board, rounded the head of the double column of the meaof-war and started down the river on the New York side. The Al Foster followed, and the police patrol tugs fell into line two by two. Then the fog lift d and with bright skies overhead and a warmer atmosphere than the day before, the blue jackets from our own ships and foreign vessels landed and marched to the place of the rendezvous.

Remarkable as was the gathering of the foreign men-of war in our barbor to participate in the naval review, still mo e remarkable was the spectacle presented of the uniformed forces of the foreign nations, arm:d and accoutred as for battle, as they marched in our streets. Not since the British evacuated New York has such an occurance been witnessed here, and in no coun'ry but ours is such an occurance possible. With mu-kets at their shoulders and small arms by their sides, the foreigners invaded our soil and arched down America's greatest street, Broadway. Grim, fierce-look ng Russians, sturdy Britons, suddy faced Gernans, trim, q i k moving Frenchmen, and dark visuged Italia is muched with their own officers commanding and with their own bands playing the airs they love best.

But they were our captives. Our ma rines and blue jackets preceded them and our national guardsmen followed in their rear. The arts of peace had superseded the strategy of war and the armed forces of nine pations marched in our streets as though our country and theirs were one and they and we were brothers. The parade starte I from the corner of

Fifth avenue and Forty second street at 10:57 o'clock in the morning. Governor Flower and General Horare Porter rode at the head of the line. They were followed by details from the Uni'ed States Army and engineer corps. Then came the admirals in carriages. The foreigners were escorted by officers of our own navy. Following the carriages came United States sailors and marices. These were followed by the sailors of the visit ing fleets and the marines of Great Brit ain and Holland.
