The Beauties of Wyoming.

A corre-pondent of the Philadelphia Press with the Haydon United States Geologic 1 - Survey, writing from Wyoming Territory, gives an interesting account of the beautiful cascades and deep canons of the yellow stone regions I In one place a stream was discovered which, after flowing in h sneeds for of ch cades for a short distance, suddenly dashes over the edge of the precipice, and falls one hundred and lifty six feet to the canon. The rocks, from the action of the weather and the water, every Southern State. Special advantages have been croded, so as to leave high towers standing along the banks. Two of the highest, each rising one hundred feet above the water, stand, one on either side, just at the edge of the fall, as though stationed there to guard it. The water falls into the centre of a rounded basin, cut out of solid rock, about six foot in diameter. Not far distantille in warm spring, emitting the most offensive odors, principally from the sulphuretted and carburreted hydrogen ,... which escapes from uniterous orifices on the banks of the creek. The temperature of the main spring was 127 deg. Fahren When that country is once thoroughly opened to exploration, what a multitude of wonders it will

Bight Between a Cat and a Snake. A few days ago a gout loman who is engaged in farming near this city was walking through his field, near where his hands were ploughing, when he discovered a cat at some distance coming toward him. Presently the cat' turned aside and squatting very low, appeared to creep stealthily leace, and without any interruption of or along as though in search of game. He quickened his steps to see if he could discover what was up. He Painless Cure ever Discovered. soon discovered a snake about a foot and a half er two feet long, and as the cat approached the snake coiled and put himself in a striking position. The jeat instantly walked direct up to the snake and held out one foot letter of G. A. T., expasing the intrigues negar his snakeship's head, as if daring of Harper's Magazine and Ludlow, and a himseto strke. Master snake being full description of the Antidote, sent free full of spunk, was not the chap to take a dare, consequently he responded with his full strength; but when his head should have been in direct contact with the cat's paw, the paw. like the Irishman's flea, wan't thar; and before the head could be withord before the head could be with the Masculine Function. About a month ago we published a currous and sad little story of the strong attachment existing between a mocking bird and its mistress, and showing to what degree human affection and power can be exercised over the animal creation. A young lady, Miss Mansfield, in Scottville, Kentucky, had, on her death bed, commanded her little feathered companion to cease his setig, as in the restlessness of the rick had, even his gentle warblings seemed to atmoy her. Aiter death, which took place next day, Jackson, Michigan, the bird was prized as a friend and called away, and many efforts were made to induce him to pour torth his inclody as a sweet reminder of its Watches. Jewelry, Silver and lovely mistress; but all efforts were unavailing, and nothing but her yoice, now stilled forever, would break the spell. Day after day passed and still silence, prolonged and unbroken, held the bird in its thrall .-Rofusing all food, it pined away, and after a short time died.

This is a true story, and as it was told to us. Who can tell what was the mysterious tio that bound that little chorister of the forest to its dead mistress ?- Nashville Banner.

## Leeding Hogs on Cooked Wheat.

A correspondent of the Cincinnati Gazette says: On the 4th of August 18 0,7 put up 15 hogs weighing 2, 1007and Wodthoming bushels cook ed wheat the first week. On the 11th their weight was 2,600, pounds ; gain, 200, pounds, or a gain of 131 pounds to the Magabolag nearly 2 pounds a day. The next week I feed them six hushels of the cooked wheat, producing an increase of 215 lbs., or 14g pounds to the hog, being a grain of 2 pounds, or 172 pounds a head, or 2 10-21 a day. The fourth week I fed them 124 bushers of cooked wheat, the gain, being 320 pounds, or 211 pounds a head, or a fraction over 3 wounds a day each. The hogs were then sold and taken away. They rained in four weeks 995 pounds on ier of feeding I received a good price or the wheat, as the hogs were sold t \$8, 25 per 100 lbs. The breed ras the Russian China stock, about 73 months old.

ITS CURE AND ITS PREVENTIVE. By J. H. SCHENCK, M. D.

By J. H. SCHENCK, M. D.

Many a human being has passed away for whose death there was no other reason than the neglect of known and indisputably proven means of cure. These near and dear to family and friends are sleeping the dreamless slaunber into which, had they caimily adopted

DH. JONEPHE HEACHENCK'S SIMPLE

and availed themselves of his wonderfully efficacious medicines, they would not have failen.

Dr. Schenck has in his own case proved that we will be a suit clear, visuality remains, that vitality, by his are suit clear, vitality remains, that vitality, by his even suit clear, vitality remains, that vitality, by his resultclear, which we have a contract of the faith of the invalid made no representation that is not a thousand times substantiated by living and visible works. The theory of the cure by Dr. Schauck's medicines is as a simple as it is unfailing. It is philosophy requires no argument. It is self-assuring, self-convincing.

The Sea-weed Tonic and Mandrake Pills are the first two wedpons with which the cleaded of the maindy is assailed. Two-thirds of the case of conditionally assailed. Two-thirds of the case of conditionally disordered liver. With this condition the bronchist index "sympathize" with the atomach. They resupend to the morbide action of the liver. Here they comes the culminating result, and the setting in, with all its distressing symptons of

comes the culminating result, and the sering in with all its distressing symptoms of CC-NSUMPTION.

The Mandrake Pilis are composed of one of Nature's noblest gifts—the Podophilian Peliatum. They possess all the blood-searching, Micrative properties of calomed, but, unlike calomed, they properties of calomed, but, unlike calomed, they "LEAVE NO STING HEMIND."

The work of cure is now beginning. The vittated and mucous deposits in the bowels and in the alimentary canal are elected. The liver, like a clock, is wound up. It arouses from its torpidity. The slothach nets responsively, and the patient begins to feel that he is getting, at last.

Richiach ack responsively, and the patient begins to feel that he is getting, at last.

A SUPPLY OF GOOD BLOOD.

A SUPPLY OF GOOD BLOOD.

The Sea-weed Tonic, in conjunction with the Pills, perheates and assimilates with the food. Chylification is now progressing without its previous tortures. Digestion becomes painless, and the cure is study to be at annet. There is no more flatulence, no exacerbation of the stipmach. An appetite sets in. Now comes the greatest Blood Purifier over yet given by an indujent father to suffering man. Schemek's Pulmonic Syrup comes in to perform its Schemek's Pulmonic Syrup comes in to perform its Schemek's Pulmonic Syrup comes in to perform the annet of the complete the cure. It enters at once upon its work. Nature can not be entered, it collects and ripuss the impaired and flacased partions of the lungs. lo! in a very short time that it occupied is renovated and made new, and the patient, in all the tignity of regained vigor, stops forth to enjoy the manhood or womanhood that was GIVEN VIP AS LONT.

The second thing is, the patients must stay in a warm room until they get well; it is almost impossible to prevent taking cold when the mags are discased, but it must be prevented or a cure can not be effected. Fresit air and riding out, especially in this section of the country, in the fall and winter soason, are all wrong. Physicians who recommend that course lose their patients, if their lungs are baily diseased; and yet, because they are in the bouse they must not sil down quiet; they must walk about the room as much and at first as the strength will bear, to get up a good electiation of blood. The property of the room as much and at first as the strength will bear, to get up a good spirits—be determined to the country of the second of the country of the property of the second of the country of the owners and the special mans they are after such existence of its possibility in the cure after such existence of its possibility in the cure after such existence of its possibility in the cure after such existence of its possibility in the cure after such existence of its possibility in the cure after such existence of its possibility in the cure after such existence of its possibility in the cure of the own cure was in these modest words:

Discuse, Fits, Epflepsy, Neuralija, and the various Ulceratis affections of the muscular and nervous systems, and nervous systems, and nervous systems, syphilis or Veneral and Mercurial Discuses are cured by it, though a long time is required for subdiving these obstinate maladies by any medicine. Let long-continued use of this medicine will cure the complaint. Leucorrhae or Whites, Uterine Ulcerations, and Fennals Discuses, are commonly soon relieved and ultimately cured by its purifying and invigorating effect. Minute directions for each case are found in our Almanuc, supplied gratis. Itheumatism and Gout, when caused by accumulations of extraneous matters in the blood, yield quickly to it, as also Liver Complaints, Torpidity, Congestion or Inflammation of the Liver, and Jaundien, when arising, as they often do, from the rankling poisons in the blood. This SARSA-PARILLA is a great restorer for the strength and vigor of the system. Those who are Languid and Listless, Despondent, Siecpless, and troubled with Nervous Apprehensions of Fears, or any of the affections symptomatic of Weakness, will find inmediate relief and convincing evidence of its restorative power upon trint.
