An Irish Story.

It was a little after midnight that a knock came to the door of our cabin. I heard it first, for I used to sleep in a little snug basket near the are ; but I didn't speak for I was er, and then came a cry:

"Con Cregan! Con, I say, open the doo: ! I want you."

I knew the voice well; it was Peter McCabe's; but I pretended to be fast usleep, and snoved loudly. At last my father unbolted the door, and I heard him say :

"O, Mr. Peter, what's the matter Is the ould man worse ?" "Faix that's what he is, for he's

dead," replied Peter. "Glory be his bed !" When did it happen ?"

"About an hour ago," said Peter, in a voice that even I, from my coruer, could perceive greatly agitated. "He died like an ould heathen, Con and never made a will."

"That's bad," says my father, for he was always a prite man, and said whatever was pleasing to the com-

p.ny.
"It is bad," said Peter; but it would be worse if he could'nt help it. Listen to me now, Corney; 1 want ye to help me in this business : a d'iere are five guineas in gold if ye do what I bid ye. You know that ye were always reckoned the very image of my father, and before he took ill ye were mistaken for each other every day of the week."

"Anan!" said my father, for he was getting frightened at the notion, without well knowing why. "Well, what I want is for yo to

A Hundred Bushels from one Potato.

Mr. D. Branning, of Jacksonville, Fla., made last full before the Duval County Agricultural Society, a statement which suggests wonderful possibilities for the sweet potato in the congenial climate of the South. In 1871, having a specimen which he desired to multiply to the largest possible extent, he first cut it into pieces each with about two inches square of skin. These he planted February 10th, in a rich warm spot, which had been occupied as a hog pen. They grew finely, and on May 18th, he took from them two hundred and two vine cuttings, which he planted, and he continued this cutting and planting till August 10th, planting in all something over tenthousard cuttings. The crop was not measured, but experienced farmers, who saw the whole in heaps, as put up for banking, estimated that there was at least one hundred bushels. That will do for poor sandy, barren Florida!

Mineva's Bird.

A singular incident is related by the local press of Washington city, thus: "As if Providence had doubts of the a sembled wisdom of the Supreme Court, the other day one of these meditative birds suddenly appeared in their midst. It came down the chimney and perched itself at the right-hand of the Chief Justice without saying a word, and there it sat all day, blinking, winking, and gravely listening to stupid pleas, nodding comfortably between times, and altogether performing the duties of the bench with due decorum. No one disturbed the new associate, but of the Theresian Convent at Prague, when the other owls walked up at is an archduchess, and is sweet sixevening, and went home, he, too, teen. shook off the dust of ages and went up the chimney. An attendant immediately stopped up the fire-place, and put up a notice, "No outside owls hereafter permitted in the Supreme Court chambers."
