COST OF FENCING.

Mr. Editor :- The appearance in your isling home wet as a drowned rat; not by being sue of the 17th ult., of an article on the "cost of starvation, and we venture not one of them could tell within half what it costs. Southern their fences at a time when they suppose nothing picked and packed, and the corn housed, a "new ground" must be cleared from ancesmade, and the fences built at no loss but time, and time to such men is of no value. Were this same tract of woods land allowed to reof its trash to make manure, thousands of impovertshed acres might be reclaimed, and our beautiful forests left standing as pasture ground for the owner's stock.

As fences are built during the winter season, when planters do not think it profitable to keep their plows, and those too of the subsoil kind, running, and many of them are altogether ignorant of the method and value of making manure, clearing lands and mauling rails is a necessary alternative to employ the hands on a plantation, hence its cost is regarded inconsiderable. But when, after such a dry winter as we have had, there happens so universal and destructive a fire as has lately visited our State, and almost the entire South, and this too, in the very beginning of the planting season, each land owner will appreciate fully the following summary which we suggest as the prime cost of fencing a field for cultivation.

We will select a square field of 36 acres, 6 acres on either side. The length of a fence to enclose such a field would be 5,040 feet, water in which, for the first time, you noticed rails high (which is too low to be certain protection) will average one rail to the foot, hence Young ladies take their colds in grandly it will require 5,040 rails to build the fence.
