THE YELLOW FEVERIN NEW ORLEANS -From the New-Orleans Delta, of the 25th instant, we learn that the yellow fever is rogressing with giant strides in that city. According to the report of the Charity Hospital for the twenty-four hours on Thursday, says the Delta a larger number of deaths have occurred from this disease than have perhaps, ever before been reported in the same time. That number is forty-two for the 24 hours preceding 12 M., on the 21st ! The deaths during the week before last, at the Hospital, when the presence of an epidemic had not been admitted showed nearly as large a number as occurred in the same establishment during any week of the year 1847,-the last great epidemie which visited our city.

GOVERN THE CHILDREN. - The worth of the country are soon to hold its destiny in their hands. And as they are now governed will they hereafter govern. Niebuhr says in his Letters-"Freedom is quite impossible when the youth of a country are devoid of reverence and modesty." We confess we have some-

times feared for the future of our land, when we considered the character of the rising popution.

Young America is so very fast, has so little Allen, Mr Addison, reverence for the past, and such unfailing faith in "progress," of the aggressive order, that his Broom R hands seem unsafe receptacles of so great a Bradley trust. Our Puritan forefathers were strict dis- Beauford, ciplinaries, and New England owes much of its Brasingto power and glory to this fact. Parental con- Barnes, J Baker, M trol is now very much relaxed. In most cases Carter, Ca it is the children who govern. This is a bad Carter, M state of things and should be changed. Boys need Cartor, Th control as much as bread and butter. Nie- Campbell Dunlap, I bahe whom we must again quote, says: Douglas,

"I would warn every one, whose child shows Dabuey. a bad disposition to hold him in while he is young Davis, S Durant, I for there is not much fear of breaking his spirit. Evaus, V He innate impuder ee will protect him from Foster, M this; and I feel, by myself; that our faults can-Gregory, not be torn up with too much violence in Huckabe childhood before they have taken too deep a Hogaes, Ilix. J. root."-Portland Transcript. Harris, N

- . . A Bad Start and a Worse Outcome-

A young man in this city lately attempted shooting himself with a pistol, giving as a re: sou for doing so that he had no means of living. He had written to his friends for funds, but not receiving any, he determined on self-destruction. We know nothing of the individual, and only gathered the above particulars from some of the daily papers; but the case suggests some important considerations.

1. Why is it so many boys are suffered to grow up in our country, without a practical knowledge of the means of an honest livel hood ? In other words why are not hoys, all boys, everywhere taught to work? Is there any disgrace in being abre, from early education, to earn an honest living by the labor of one's hands, whenever it may be necessary ? Do not parents do an injury to their children, and to the community at large, by raising them up and thru-ting them out upon the world unprepared to earn a competent sub-i-tence ? Are their sons too good to work? Alas for want of correct views on this subject, and of useful, honorable employment, hundreds are led first to drinking and gambling houses, and then to disgrace and rain.

2. In a country like this, where openings for industry and enterprise are so numerous, where every healthy man may do well if he will, why should m u, and especially young men, com-plain of a white of the means of living ? It is certainly not because there is nothing to be done that because there are nothing to be them; but it is because they are gither to o

#### To the Physicians of the State of South Carolina.

VOLFES CELEBRATED SCHIEDAM AROMA-110 SCHNAPPS-Deeming it unnecessar, to remind any regular member of the Medical profession of the established medical properties of pure relland Gin in many diseases of dropsical tendency, I respect-fully invite your examination to a very superior artiele, manufactured by myself exclusively, at Schiedam, in Holland, by a process peculiar to my own factory. It is flavored and medicated, not by the common harsh berry, but by the choice botanical variety of the aromatic Italian Juniper Berry, whose more vinous ex-tract is distilled and rectified with its spirituous solyent, and thus becomes a concentrated fincture of exquisite flavor and aroma, altogether transcendent, in eordial and medicinal properties, to any Holland Gin heietofore known. And the influx of inferior distillations with which

he market is now flooded, physicians find no little difficulty in procuring a good and pure G n which they can prescribe with confidence in its beneficial effects. As an importer of twenty year's standing, in the eity of New Yark, and possessing a matured experience in the manufacture of HOLLAND GIX, especially I beg to submit to your attention my ARCMA-TIC SCHIEDAM SCHNAPTS, as one which cannot fail to realize your utmost expectations, and 1 shall

be happy to forward you a little of it, free of charges, in answer to a letter intimating your readiness to ac-

It is now scarcely one year since I have prepared and distributed my Schenam Gix exclusively for medical purposes ; yet within that brief period, I have received numerous letters, both from physicians and patients, testifying to its really extraordinary efficacy in Gravel, Incipient Dropsy, and affections of the Kid neys and Bladder generally; also in Dyspeptic Mala-dies, when taken in proper quantities as a Diet Drink, and especially at dinner, is found, by uniform experience, to be eminently efficacious in the most ousti nate cases, when even the best of the usual remedi s have failed to afford more than temporary relief, and I have no doubt that it would yield similar results with precision and certainty in your own professional experience.

The Aromatic Schiedan Selmapps is put up in strong bottles, pints and quarts, neatly covered and labelled with my name embossed on the bottle; also a fate simile of my signature on the label, and my seal on the cork, with an essay upon its properties. UDOLPHO WOLFE,

Im orter, 22 Beaver street New York.

Extracts from the New York Medical Gazette and Journal of Health, edited by D. M. Reese M. D., LLD., 775 Brondway, October 1, 1852:

#### Holland Gin as a Medicine.

In our last number, we accompanied the publication a circular on this subject, from our fellow citizen, Uddpho Wolfe, Esq., with a brief commentary, expressive of our own views. Since then we have been mploying this agent, and thus far with favorable results. But we are in the receipt of several commuserve to show that Mr. Wolfe's Aromatic Schiedam Schnapps is very extensively in use, and in the hands of physicians, is proving itself, as a stimulating ciuretie, to be eminently successful, after other medication with this intent had seen tried in vain. In one of the cases thus reported, abdominal dropsy has been entirely removed by the passage of a calculous of considerable size which is ascribed to the use of only two bottles of this article. We know not the object of Mr. Wolfe in designa-

ting his preparation by the singularly uneuphoneous name of "Schnapps," nor of his denominating it in his advertisements the "concentrated Tineture of Ju-niper," instead of perpetuating its ancient tile of Hol-land Gin. It is true that he admits it to be nothing else than the latter article in its pure state, unadul-terated by noxious drugs; and hence he contradis-doment for a Mill which can be be proportion. The else than the latter article in its pure state, unadul-torated by noxious drugs; and hence he contradis-tinguishes it from the Gin of commerce, nearly all of which, as is well known, is manufactured here and elsewhere from inferior whiskey and refuse drugs. The name he has given it, however, may serve the purpose of designating his article as prepared exclusively for medical purposes, and thus commend it to physicians, for whose convenience it is on sale only

by reputable druggists and apothecaries. As respects its medicinal and curative effects, we inderstand him to claim only that it is a pure and reliable article of Holland Gin, and as such, worthy of commission Business, respectfully tender their services the confidence of Physicians, to those diseases for which ommission BUSINESS, respectivity tender menservices their friends, acquaintances, and the public gener-ly, for the selling of Cotton, or the purchasing of loods of any description. Any or all of the products, or manufactured articles

ave their prompt attention. Every exettion will be used to conduct all business the preference to a pure article over the manifold rally supplies physicians with a sample bottle for analysis and trial, as set forth in his circular, and stakes the reputation of the remedy upon the innocence, safety and efficiency of his Holland Gin, when used with a pledge to devote their entire time and skill to under medical advice, and pledges his own "character the business, they flatter themselves that they will be in business that the article will not disappoint any who use it.

as being in every respect prersminently pure, and deserving of medical patronage. It is indefined for its superiority, doubt not, to sound and select materials not to that peeu liarly moderate method of di-tillet on which leaves Inrive moderate method of distribution to the hardey beavier and less volatile seven, is rule, be not the barley and the herry, highlight seven, is rule, being institu-tion become for the refined arcenta of the they can be sufficient, has in regard to the special quantum of the thatman Juniper beavy, of which the manufacturer specks in his circular barry of which the manufacturer specks in his circular barry of which the manufacturer specks in his circular barry of which the manufacturer specks in his circular barry of which the manufacturer specks in the lighter bit barry of which the manufacturer specks in the lighter bit barry of which the manufacturer spectrum is a lighter bit I have no chemical knowledge, nor with this lighter but differs from that of the Inniperie contactions. I find that the pure of of both polarizes to it with and yrields, with hydrochlarife and, a liquid campion. This neid heing in, the stomach as a principal comparent of the relative func-prolably creates this material form the risk and renders it the valuable diffusive standard for which it was formerly and will, probably, again he renowned. I consequently repard Mr Wolf, will solve a Aromatic Schnapps, as a valuable accession to our phasmaceuther agents : to cay nothing of its comparative innocuousness agents: to have the tilded liquers as a Leverage. To per-sons traveling in the Southwest, where the best water frequently produces distressing and sonetimes even den-geous effects upon persons unaccustomed to them. I should plink it would be a good precautionery provision, as a counteractive or preventive of these effects, when mixed in moderate quantities. At all events fit is the purest possi-ble article of Holland Gin, heretofore unon intable, and as such, may be safely pre-cribed by physicians. DAVID L. MOTT, M. D.

. Pharmaceutical Chemist.

### Edward Harrison's Unequaled Flour and Grain Mills.

THIS Grist Mill has never been equaled, either in-1 its simplicity, portability, compactness, or beau-ty of design. The frame work and casing are of cast iron, as also are the hoppers. A casting consisting of a triple-shaped base, with three columns resting-uopu it constitutes the frame-work which supports the casing. The casing is the cylindrical portion, or uptor body of the Mill, resting upon, and secured to the columns, and serves the purpose of inclosing and holding the stones in their places. The casing is made in two equal pasts, and each part is composed plate and rim. The edges of the rims are clusely fitted together and are secured by three bolts. The frame and casing thus connected readily admits the frame and casing thus connected reaching the support advantage of three babit metal boxes for the support of the spindle. One in the center of the base, and one in the middle of either plate of the casing. This arrangement renders the parts peculiarly adapted to stand the pressure of grinding without yielding in the least degree, and therefore it is that these diffe-are known to grind the same quality of flour and mails, whether fed at five or twenty-five bashels per hour-The spindle being secured finaly and rigidity to the spindle being secured finaly and rigidity to the spindle store, takes its bearings in the three boxes above named, and sustains the weight, of the store above named, and sustains the weight of the stime and the pressure of granding, by resting upon a more able step inserted in the center of the base. The host per, which holds two bushels-of grain, is supported, upon the top of the Mill, by three pillars' which are serowed into the upper plate of the casing. The grain is field and regulated by an ordinary show and a single in the hopper. The stones are driven by a pulley of fifteen inches diameter, and eight inches face, w. ha

is placed upon the lower end of the spindle between the columns. The arms of the pulley are constructed in the form of spiral wings, or the purpose of driving a strong blast of air through apertures in the casing in contact with the stones; to keep them cool One of these entire Mills, including the hoppers with stones two feet and a half in diameter, and each with stones two seet and since of burg, weighing in or them cut trom a solid block of bury, weighing the all about 1,300 pounds, and warranted capable of grinding, in the best manner, twenty-five bushels ner hour of flour or meal, may be packed in a cask thur-ty-four by forty-two inches inside, and this trans-ported in safety to any part of the world. Farmers will find them adapted to be driven by there have been added by the stranger bar as a larger by the stranger bar and athematic thema a larger by the stranger bar and athematic the stranger bar and by the stranger bar and b demand for a Mill which can be driven by horse pow er, and grind grain to advantage, without getting out of order, has not heretofore been supplied; mills p

peck measure dimensions do not seem to be big enough The objection to this Mill, if any, is not that it does not work well, but that it costs too much, perhaps ; but others must decide about that, as there are enoug cheaper ones. They have given satisfaction in all cases where they have been tried, and are now used in place of common mill stones, in many of the best

etablishments throughout the country, with decided advantage, both in the power required and in the quantity and quality of the flour and meal. The first reminus have always been awarded them, over all mpetition, at all the Fairs where they linve been of the country, will be received upon consignment, dis-posed of promptly, and to the best advantage. At such times as there may be only a limited demand for an article consigned to them, a market will be found where it will command its value. The receiving and forwarding of Goods will also have their prompt attention. Every exertion will be need to conduct of them. exhibited, viz: two Gold Medal's from the American

mation on application to W. W. TRYON & Co., agents, at Camlen, S. C., who will self the Mills at the Manufacturers prices. One of the Mills can be seen in operation at the ge sidence of E. Tryon, in Comden. 6m. 27 July 19,

proud or too fazy to consider the effect A false education, connected with action of the effect of own important selves, lead them to exactlide that honest labor is *degrading*: the degra-ding; though they will not often speak out that false failur. thus, this is the feeling. To soil their pretty hands and dirty their fine unpaid-for blothes, is a stoop to which they cannot submit-their pride will not allow it; hence they are too often ready to resort to almost any course rath r than go honestry to work. In all this there is a radical error, which in most cases may be traced to the influence of early education. The parent was, perhaps, some thirty-seven and a half cents better off than his mighbor, benee he, weak man, was led to suppose that his son was only suited for some profession, or, at the very lowest, to " go into some business," as it is usually termed-that is, to stand behind some counter, cut tape, and measure calico. And this, in the estimation of the over fond and deluded parent, is "more respectable" than the various handieraft pursuits of the country. - How upon the face of the earth did it ever enter the heads of men that it was more respectable to stand by a counter than by a work-bench---to measure cloth than make the coat-to shave notes than to shave timber ? How, we cannot imagine. Out upon such ninnyism, say we! Let our sons be taught that idleness is a disgrace, and that no man has a right to live upon the common stock without contributing his share-to the support of the whole ; and then let each and every man " lay to" and do something useful to himself and others. If he cannot do this, let him do that, but let him never be idle, but always usefully employed; then he will not be so anxious to hurry hight out of this world, bad as some pretend to think it is.

#### LYON'S KATHAIRON.

FOR PRESERVING, RESTORING AND BEAUT FYING THE HAIR, is the most delightful and wonderful article the world ever produced. Its astonishing success is without a precedent in the history of the Materia Medica. Dark and luxuriant curls, soft and glossy hair, withscores of admirers, (mark this, Ladies,) is the univercal effect of the Kathairon. Bald and gray heads stood perfectly astonished. "The Kathairon has fully restored my hair after a baldness of 12 years. A. JAY COERTRIGHT, 76 Bond-St. N. Y." The Kathairon is a certain cure for Netwous Head Ache, and all Cutane ous Diseases. Sold by all dealers everywhere. Try it. Price only 25 cents, in large bottles. D. s. Barnes, Proprietor, 161 Broadway, N. Y.

Sold by every Druggist in Camden. Haviland, Harrall & Co. wholesale Agents, Charleston Sm-30

July 26.

#### POISONING.

Thousands of parents who u e Vermifuge composed o Castor Oil; Calomel, &c., are not aware, that while they appear to benefit the patient, they are actually laying the not go at the business expecting that he will be foundations for a series of diseases, such as sulvation, loss advertised.

foundations for a series of diseases, such as salivation, loss of sight, weakness of limbs, dy. In another column will be found the advertisement of Hobensack's Medicines, to which we ask the attention of all directly interested in their own as well as their Chil-dren's health. In Liver Complaints and all dicorders ari-sing from those of a billious type, chould make use of the only genuine medicine. Hobensack's Liver Fills, Or "Be Nor nECENEN," but ask for Hobensack's Worm Syrup and Liver Fills, and observe that each has the signifure of the Proprieter, J. N. HODENS WK, as have et all grows.

TEREAS, John U. Ingrem has applied to me for Letters of Administration on all and singu-lar the Goods and Chattles, Rights and Credits of Marguret Eletcher, late of the Distriset aforesaid, deconsed :

These are, therefore, to cite and admonish all and gular the kindred and creditors of the said deceas ed to be and appear before me at our next Orlinary's Court for the said District, to be holden at Camden Court House on the 19th day of August, inst., to show e-use, if any, why said administration should not be granted.

of be granted. Given under my hand and seal this 1st day of August, 1853, and in the 78th year of Amerienn'Independence.

JOHN R. JOY, O. K. D.

Milronn, July 25th, 1853.

Feb. 1. 177 W. R. HUNTER may be found at the above Re

with promptness and strict fidelity. North Carolina Bacon. SUPERIOR article, for sale low for each. E. W. EONNEY. From the New York Express, October 26, 1852. Medical Liquors.

In common, 1 presume, with many others of the profession, 1 received, some few months since, a circuar addressed "To Physicians throughout the United States," by Mr. Udolpho Wolfe, the importer of Beaver street, inviting a medical and chemical examination of a new article of Holland Gin, manufactured tion of a new article of Holland, Gin, inadulactured by bimself, at Schiedam, in Holland, by 'a peculiar process, and put up for nedleal use, under the some-what butch title of "Schiedam Aromatic Schnapps." The circular claims for this article an eminently superior degree of purity, aroma, flavor, "and medicinal efficacy : and offers, moreover, a cratuitous supply of it to any physician who may feel disposed to test these

claims in a scientific and professional manner. Being familiar with three facts ir relation to the use of Holland Gin, as a medicine, namely : first, that when pure, it absolutely invaluable and not to be exchanged for any other remedy known to the pro-fession, in many complaints, both acute and chronic; secondly, that amid the multitude of ill-made or adulterated liquors with which this country abounds, a pure Holiand Gin is scarcely to be obtained at any price ; and thirdly, that the radical impurities of a nferior or spurious Gin consist, first, of the hydra ed oxide of Amyl, a poisonous oil, or more commonly known as Potato Spirit, Fousel Oil, or Amilie Alcohol; and secondly, of the heavier of the two essential eils of Juniper, instead of the lighter-which impurities usually result from the nercenary system of an excessive distillation of the materials employed-1 re solved to accept of Mr. Udolpho Wolfe's challenge, and put his "Schiedam Aromatic Schnapps" to the test of rigid analysis. And I was induced to do this (not withstanding the proprietor's long standing and reputed respectability as an importer) because the purity of Gin, above that of every other spiritness liquor earloy. ed in medical practice, is of the most vital consequence to the containaity, increased as it is embled to two distinct the community, incremela as it is collect to two distinct cates of periodicians inquirity (namely ) the inferior oil of Juniter, as well as the Forcel oil : I found more ver, the "Aromatic Schmapps" strongly recommended by a physi-cian and writer of no less influence than D. M. Recer, of the Ne v York Medical Gaussier, and by many of the mo-t eminent members of the profession, who I had no reason no suppose had obtained any other than empiracel evidence of its pharme central purity and values. I therefore re-solved to inform mecheal men at lenst, for the sake of the olved to inform medical men at least, for the sake of the suble at large, of the result of ray investigation; wheth-

solved to inform method here it issue, for the state of the result, of any new state of any investigation; which exists a state of the proprietor. These results are as follows: Scareling first for the oil of Janiser by distillation. I obtained an oil, from two querts of the liquid, whose specific gravity was 0.852 and whose boiling point was 0.83 degrees, nor did successive realistifiation yield an oil of gravity gravity, or of any other hand where exceeding point was 0.83 degrees, nor did successive realistifiation yield an oil of gravity gravity, or of any other hand where exceeding point and the event of the boling point was 0.83 degrees, nor did successive realistifiation yield an oil of gravity gravity, or of any other hand the realistifiation of a state of the super ority of Mr. Wolfe's Gin in relation to the oil of Janiger, upon which the aroman, they are distribute as to the super ority of Mr. Wolfe's Gin in relation to the oil of Janiger, upon which the aroman, they are distribute and diversionally depend. As to the force oils with which all inferior spiritness liquids of the event ratio in which they are instituted which the arows in the event ratio in which they are instituted which the inferior spiritness is the event ratio in which they are instituted which the rational solutions are more of the super and a statistic experiments, and which there of the super and the statistic appeties of the state which the rational solutions are more and philanthropy so in the state of the state of the model in the state of the ratio and state in the state of the s

of which the triends of temperature and philambropy si-justly completia, instead of that satisfy and fostalionsness justry comparing unseen of that satisfy and fostidiousness of tasts, for which the drinkers of pure liquois are dis-tingui had—of this fetid, nerid asthmatical Fousiel off, 1 found no trace in Mr. Wolfe's medicinal Gin, although Lapper edity tested various quantities of it with the chloride of calcium, by the usual process, which so readily detects and obtains it in the ordinary spiritnens liquors. Accordingly, I feel bound to say that I regard this Gin.

Saddler's and Goach Maker's Goeds, OF EVERY DESCRIPTION.
