To the Physicians of the State of

Gin in many diseases of drop-scal tendency, I respectfully invite your examination to a very superior artimanufactured by myself exclusively, at Schiedam, in Ho. and, by a process peculiar to my own factory. It is flavored and medicated, not by the common harsh berry, but by the choice botanical variety of the aromatic Ital an Juniper Berry, whose more vinous extract is distilled and rectified with its spirituous solvent, and they have been solvent. vent, and thus becomes a concentrated inclure of exquisite flavor and aroma, altogether transcendent, in its cordial and medicinal properties, to any Holland

Gin heretofore known. Amid the influx of inferior distillations with which the market is now flooded, physicians find no little difficulty in procuring a good and pure G.n., which they can prescribe with confidence in its beneficial effects. As an importer of twenty year's standing, in the city of New Yak, and possessing a matured experience in the manufacture of HOLLAND GIN, espeeially I beg to submit to your attention my AROMA TIC SCHIEDAM SCHNAPPS, as one which canno fail to realize your utmost expectations, and I shall be happy to forward you a little of it, free of charges, in answer to a letter intimating your readiness to ac-

It is now scarcely one year since I have prepared 9 00 and distributed my Schiedam Gia exclusively for medical purposes; yet within that brief period, I have 3 75 received numerous letters, both from physicians and 2 00 patients, testifying to its really extraordinary efficacy in Gravel, Incipient Dropsy, and affections of the Kid neys and Bladder generally; also in Dyspeptic Maladies, when taken in proper quantities as a Diet Drink, 2 00 and especially at dinner, is found, by uniform expe-3 50 rience, to be emineutly efficacious in the most obsti nate cases, when even the best of the usual remedi s have failed to afford more than temporary relief, and I have no doubt that it would yield similar results with precision and certainty in your own professional

experience. The Aromatic Schiedam Schnapps is put up in strong bottles, pints and quarts, neatly covered and labelled with my name embossed on the bottle; also a fac simile of my signature on the label, and my scal on the

Im orter, 22 Beaver street New York. Extracts from the New York Medical Gazette and Journal of Health, edited by D. M. Reese M. D,

LLD., 775 Broadway, October 1, 1852:

Holland Gin as a Medicine. In our last number, we accompanied the publication of a circular on this subject, from our fellow citizen. Udolpho Wolfe, Esq., with a brief commentary, expressive of our own views. Since then we have been aploying this agent, and thus far with favorable results. But we are in the receipt of several commu nications on the subject from medical men, which serve to show that Mr. Wolfe's Aromatic Schiedam Schnapps is very extensively in use, and in the hands of physicians, is proving itself, as a stimulating ciuretic, to be eminently successful, after other medica tion with this intent had seen tried in vain. In one of the cases thus reported, abdominal dropsy has been entirely removed by the passage of a calculous of considerable size which is ascribed to the use of only

two bottles of this article. We know not the object of Mr. Wolfe in designa ting his preparation by the singularly uneuphoneous name of "Schnapps," nor of his denominating it in his advertisements the "concentrated Tincture of Juniper," instead of perpetuating its ancient title of Holland Gin. It is true that he admits it to be nothing else than the latter article in its pure state, unadulterated by noxious drugs; and hence he contradistinguishes it from the Gin of commerce, nearly all of which, as is well known, is manufactured here and elsewhere from inferior whiskey and refuse drugs. The name he has given it, however, may serve the purpose of designating his article as prepared exclusively for medical purposes, and thus commend it to physicians, for whose convenience it is on sale only

reputable druggists and apothecaries. As respects its medicinal and curative effects, we understand him to claim only that it is a pure and reliable article of Holiand Gin, and as such, worthy of the confidenc of Physicians, to those diseases for which they are strained by finding it impractible to obtain the arti le in a pure state. Nor should any prejudice against alcohort, mentione deprive the afflicted of the benefit of this article, which from time immemorial has held its place among the remedial agencies of the Materia Medien, if it be found worthy of

At all events, those who persist in the employment and tolerat on of other alcoholic medicines, as tinetures, bitters, &c., and especially those who prescribe safety and efficiency of his Holland Gin, when used under medical advice, and pledges his own character in business that the article will not disappoint any

> From the New York Express, October 26, 1852. Medical Liquors.

In common, I presume, with many others of the profession, I received, some few months since, a circular addressed "To Physicians throughout the United States," by Mr. Udolpho Wolfe, the importer of Beaver street, inviting a medical and chemical examination of a new article of Holland Gin, manufactured by bimself, at Schiedam, in Holland, by a peculiar process, and put up for medical use, under the somewhat Dutch title of "Schiedam Aromatic Schnapps. The circular claims for this article an eminently superior degree of purity, aroma, flavor, and medicinal efficacy: and offers, moreover, a gratuitous supply of it to any physician who may feel disposed to test these

claims in a scientific and professional manner.

Being familiar with three facts is relation to the use of Holland Gin, as a medicine, namely : first, that when pure, it absolutely invaluable and not to be exchanged for any other remedy known to the profession, in many complaints, both acute and chronic; secondly, that amid the multitude of ill-made or adul-terated liquors with which this country abounds, a pure Holland Gin is scarcely to be obtained at any price; and thirdly, that the radical impurities of any inferior or spurious Gin consist, first, of the hydra ed oxide of Amyl, a poisonous oil, or more commonly known as Potato Spirit, Fousel Oil, or Amilie Alcohol; and secondly, of the heavier of the two essential oils of Juniper, instead of the lighter-which impurities usually result from the mercenary system of an ex-cessive distillation of the materials employed—1 re-solved to accept of Mr. Udolpho Wolfe's challenge, and put his "Schiedam Aromatic Schnapps" to the test of rigid analysis. And I was induced to do this (notwithstanding the proprietor's long standing and reputed respectability as an importer) because the putty of Gir, above that of every other spirituous liquor emply-ed in medical practice, is of the most vital consequence of the community, inacmuch as it is subject to two distinct causes of permicious impurity, namely; the inferior oil of Junior, as well as the Forsel oil; I found moreover, the "Aromatic Schmapps" strongly recommended by a physi-cian and writer of no less influence than D. M. Reese, of the Ne v York Medical Gazette, and by many of the most the New York Steateral Gazette, and to many of the most eminent members of the profession, who I had no reason to suppose had obtained any other than empiracial evidence of its pharms centrical purity and value. I therefore re-solved to inform medical onen at least, for the sake of the public at large, of the results of my investigation; whether they proved favorable or otherwise to the character of the stick and to the inter-staff the proprietor.

er they proved favorable or otherwise to the character of tharticle and to the interest of the proprietor.

Those results are as follows: Scarching first for the oil of Juniper by distillation, I obtained an oil, from two quarts of the liquid, whose specific gravity was 0.832 and whose boiling point was 313 degrees, nor did successive re-distillation yield an oil of greater gravity, or of any other knel whatever. The same quantity of common Holland Gin, so called, yielded an excessive amount, by re-distillation, of oil weighing 0.871 with the boiling poin 42 degrees; the lighter oil having previously passed over. 42 degrees; the lighter oil having previously passed over. This was conclusive as to the super ority of Mr. Wolfe's Gin in relation to the oil of Juniper, upon which the aroma, flavor, and diuretic and other medicinal properties of overy kind of Gin essentially depend.

As to the Fousel oir, with which all inferior spirituous liquors are more or less impregnated, and which render-them poisonous in the exact ratio in which they are im-

bibed—which causes such liquors to intoxicate when offi-ers do n t, and creates that morbid, insatiable appetite for onane indulgence, with all its deplorable consequences, of which the friends of temperance and philauthropy so justly complain, instead of that satiety and fastidiousness of tasts, for which the drinkers of pure liquors are dis-tinguished—of this fend, aerid asthmatical Fousel oil, I found no trace in Mr. Wolfe's medicinal Gin, although Trepeatedly tested various quantities of it with the chlorid-of calcium, by the usual process, which so readily detect and obtains it in the ordinary spirituous liquors. Accordingly, Heel bound to say that I regard this Gin

as being in every respect prereminently pure, and deserving WOLFES CELEBRATED SCHIEDAM AROMAtiarly moderate method of distiffation which mayor and
tiarly moderate method of distiffation which mayor and
tiarly moderate method of distiffation which mayor and

tiarly mode but in regard to the special qualities of the finding Juniper berry, of which the manufacturer speaks in his circular. I have no chemical knowledge, nor wherein its lighter oit differs from that of the Juniperis communis. I find that the pure oil of both polarizes to the left and yields, with hydrochloric acid, a liquid complete. This acid being in the stomach as a principal component of the gastric joice, probably creates this material from the oil, and tenders it the valuable diffusive ethnicalment for which it was formerly and to the set.

the valuable diffusive combinat for which it was formerly and will, probably, again be renowned.

I consequently regard Mr. Wolfe's "Schiedom Aromatic Schnappe" as a valuable accession to our pharmal arite agents: to say nothing of its comparative innocatous into those who use distilled liquors as a Leverage. To persons tray lling in the Southwest, where the best water frequently undiffuse distressing and securious feet formerly undiffuse distressing and securious feet form. sons traviling in the Southwest, where the best water frequently produces distressing and sometimes even Cangerous effects upon persons unaccustomed to them. Feboul, think it would be a good precautionary provinion, as a counteractive or preventive of those effects, when taixed in moderate quantities. At all events, it is the purest possible article of Holland Gin, heretofore unobtainable, and as such, may be safely prescribed by physicians.
