Phat some persons in Canada begin to look upon the influx of fugitive slaves into that country as an evil, may be inferred from a motion made in the Canadian Legislature, that the same expitation tax now imposed on all strangers entering the Province, be exact-ed in future from black immigrants.

A letter writer in Washington had former-

IMPORTANT TO THE HEIRS OF THOSE WHO FELL AT THE ALMO, TEXAS,—It is stated that there is due the heirs of those men who fell with Travis, at the Alamo, and with fauning, at the massacre of Goliad, the following of land, viz: To married men, 4,605 acres as a headright, 1,920 acres bounty, 640 acres as a donation—total, 7,165 acres. Unmarried total, 7,165 acres. Unmarried men, 1,476 acres headright, 1,920 bounty, and 640 donation—total, 4,036.—Mobile

SINGULAR PUBLIC DEMONSTRATION.—Young Christian, tried at Lexington, Va., for killing cadet Blackburn and acquitted, was borne from the court room by crowds of his friends. The town was illuminated, music played, and bonfires blazed in honor of the event, Col. Smith, of the Military Institute, was burned in effigy. The accused was defended by nine lawyers, among them several of the most eminent members of the Virginia bar pagamenta and a militar

AN APPLE TREE IN THE MOUTH .- About eighteen months ago a young man eating an apple got one of the "pips" fixed in a de-cayed tooth, which occasioned him great pain, but was totally unable to be extracted. At length the pip, by dint of pushing, was slriven down below the tooth into the gum, and no more pain was felt. Six weeks ago, however, a swelling was seen in the gum, and ultimately an abscess formed, medical men examined it, and found the pippin had begun to germinate! It was a habit of the young man to keep cotton in his tooth, and this is supposed to have hastened the vegetation.

WONDERFUL GEOLOGICAL DISCOSERY .-A fossil frog has been discovered in the Wahash bottom, several feet below the surface, with half a dozen strata above him, to the formation of which, according to well established geological principles a period of six thousand vears each may be attributed.— When this astoutding ante-Adamate fossil was brought to light all the live frogs gathered round it and evelaimed, "Pentateuch Og! Enoch! Abimelech! Balak! Amelek Amelek !" thus expressing their atter disbe h we to disprove this new fact in science be-tore they can go along,"—Teere Haute Ex

ANIMAL AND VEGETABLE PHYSIOLOGY,— Dr. Salisbury, of Albany, has communicated to the American Scientific Association some experiments on plants, which illustrate the analogy existing between animal and veget able physiology. He extracted the poisor of a dead rattlesnake, a small portion of which he inserted in the plants by moistening with it the blade of a knife, with which he wound ed a lilac, a horse chesnut, a corn plant, and a sunflower. In sixty hours after the inflic tion of the wound, they began to manifest aymptoms of poisoning, and in a few days all their leaves above the wound were dead. In about fifteen days they manifested convalescence, and nearly all recovered from in Jury.

THE INSCRIPTIONS OF EGYPT .- The Paris correspondent of the New York Courier and Enquirer says:

"That a long series of Egyptian photographic impressions has been presented to the French Institute by a young American, Mr. John Green, who has within the past year or two explored the interior of Egypt as far as the second cataracts of the Nile. The plates are remarkably interesting in a scientific point of view presenting as they do not tific point of view, presenting as they do nu merons inscriptions and has reliefs taken from the dark recesses of ancient temples where hitherto protography has been unable to operate. But Mr. Green's ingenuity was sufficient to overcome all obstacles. He took thier impression by the application of pastesufficient to overcome all obstacles. He took thier impression by the application of pasteboard, which had been softened by soaking in water, to the sculpfured surface of the stone, which, when dried in the sun, presented its exact counterpart, and thus he was enabled to reproduce by protography the inscriptions and has reliefs faithfully incrusted in the flexible pulp. Triumphs, processions, ware, sacrifices, are all re-produced with perfect fidelity and in exact order. It is understood that Messrs. Goupil & Co. will shortly stood that Messrs. Goupil & Co. will shortly publish about sixty of Mr. G.'s views, representing the most remarkable sites, land-scapes and monuments in Upper Egypt."

Industrious, one must improve the minute particles of time known as "apare minutes." Of all portions of our life, these spare minutes." Of all portions of our life, these spare minutes." Of all portions of our life, these spare minutes are the most fruitful for good or evil, and are literally the gaps through which temptation finds access to the soul. "Spare minutes are gold dust of time," said Young; sand makes the mountains, moments make the year! Idleness wastes a man an insensibly as industry improves him; evil deeds and svil thoughts never creap upon him who is assiduously employed upon good ones. The mind and body both require activity to keep them in pure and healthy action. Like water, if it runs free it is pure and wholesome; but what is there more noisome and pestilential than a stagment pool! Diligence of itself alone is a fair fortune, and industry is a good estate to have and to held.

PREMIUM CHURN. THE SUBSCRIBER respectfully informs his friends and the public generally that he has purchased the right to Manufacture the above Churn, and is now prepared to execute all orders for the same. Its simplicity is such as to be understood by every intelligent child, and its construction is on truly and strictly philosophical principles, and produces the desired result in an

principles, and produces the desired result in an almost incredible short time.

The superior qualities of this Churn are as follows: First, the quick and easy process of making butter when sitting in a chair. Secondly, In overcoming the difficulty which produces a swell-ing to overflow; and, Thirdly, the gathering process, in separating the butter from the milk, and preparing for salting. Persons wishing a Churn can find them at the subscriber's work-shop, near the corner of Main and Buncombe streets.

Greenville, June 9, 1854.

J. R. MERRILL.

## Mechanics, Manufacturers, and INVENTORS.

A new volume of the SCIENTIFIC AMERI-A AN commences about the middle of September in each year. It is a journal of Scientific, Mechanical, and other improvements; the advocate of industry in all its various branches. It is published weekly in a form suitable for binding, and constitutes at the end of each year, index, and from five to six hundred original engravings, together with a great amount of practi-

cal information concerning the progress of inven-tion and discovery throughout the world.

The Scientific American is the most widely-circulated and popular journal of the kind now published. Its Editors, Contributors, and Corespondents are among the ablest practical scientific men in the world.

The Patent Claims are published weekly, and we particularly warn the public against paying money to travelling agents, as we are not in the habit of furnishing certificates of agency to

Letters should be directed, (post paid) to MUNN & CO., 128 Fulton street, N. Y.
