THE "CAROLINA FERTILIZER" is made from the Phosphates of South Carolina, and is pronounced by various chemists, one of the best Manures known, only inferior to Peruvian Guano in its fertilizing properties. These Phosphates are the remains of extinct land and sea animals, and possess qualities of the greatest value to the Agriculturist. We annex the analysis of Professor Shepard:

Tofessor Shepard:

LABORATORY OF THE MEDICAL COLLEGE OF SOUTH CAROLINA.

Analysis of CAROLINA FERTILIZER, personally selected: Moisture expelled at 212° F., Organic Matter, with some water of combination expelled at a low red heat, Fixed Ingredients, Ammonia, Phosphoric Acid—Soluble, Insoluble, Equivalent to 11 27 Soluble Phosphate of Lime. Equivalent to 13 43 Insoluble (bone.) 24 75 Phosphate of Lime. Equivalent to 23 65 Sulphate of Lime. 13 13 11 01 Sulphuric Acid, Sulphate of Potash, Sulphate of Soda, On the strength of these results, I am glad to certify to the superiority of the CAROLINA FERTILIZER, examined.

NDER the direction of Dr. N. A. PRATT, Chemist for the Sulphurie Acid and Super-Phosphate Company.

SOLUBLE PHOSPHORIC ACID. in the form of SCLUBLE PHOSPHATE OF LIME, or DISSOLVED BONE PHOSPHATE, is the basis of all good Fertilizers, and these are valuable in the ratio of Soluble Phosphoric Acid which is in them.

The immense deposits of Phosphatic Guanos which were discovered in 1867 in South Carolina, by Dr. PRATT, consists mainly of Insoluble Phosphate of Lime, which is made available as a Fertilizer by being ground to powder, and reduced by Sulphuric Acid to such a condition as to make its insoluble phosphate soluble in water, and thus made capable of being taken up by growing plants. The insoluble Phosphate found in any commercial Fertilizer is of no more value to the plant that the original Phosphate rock. The greater the proportion of this Soluble Phosphate which any Fertilizer contains, the less the quantity required per acre, and consequently the cheapest Fertilizer is that containing the highest per centage of Soluble Phosphate.

Impressed with these truths, the SULPHURIC ACID AND SUPER-PHOSPHATE COM-

Soluble Phosphate.

Impressed with these truths, the SULPHURIC ACID AND SUPER-PHOSPHATE COMPANY have erected at Charleston the first extensive Acid Chambers south of Baltimore, and
are able to effer to planters the Highest per centage of Soluble Phosphate of Lime known in any market.

Their Fertilizers are offered under two forms:

1. ETIWAN NO. 1 .- Pure Soluble Phosphate, guaranteed to contain 24 per me Phosphate of Lime, \$60 per ton, 10 per cent. discount for cash. 2. ETIWAN NO. 2.-Peruvian Super-Phosphate, guaranteed to contain 20 per cent. of Dissolved Bone Phosphate, and 11 to 3 per cent. of Antimonia, with a sufficient addition of Peruvian Guano to adapt it to all Crops, \$70 per ton, 10 per cent. discount for

WE ALSO OFFER DISSOLVED BONE, of high grade, for planters or manufacturers, who may desire to mix into any other compost, and we suggest that this is the best and cheapest method for manufacturers to transport the Sulphuric Acid contained in the mixture. Will be sold at a fixed rate for each per centage.
