

right, because in him alone are found all the treasures of love, of science and of wisdom; that is to say, God our divine Saviour Jesus Christ the word of the Most High, the word of life. Their Majesties therefore recommend, with the most tender solicitude to their people, as the only means of enjoying that peace which springs from a good conscience and which alone is durable, to fortify themselves every day more and more in the principles and exercise of the duties which the divine Saviour has pointed out to us.

**ART. III.** All powers which wish solemnly to profess the sacred principles which have dictated this act, and who shall acknowledge how important it is to the happiness of nations, too long disturbed, that these truths shall henceforth exercise upon human destinies, all the influence which belongs to them, shall be received with as much readiness as affection, into this holy alliance.

ALEXANDER.  
St. Petersburg, the day of the birth of our Saviour, the 25th of December, 1815.

Extract of a letter from *Marseille*, dated February 8, 1816, received in *Baltimore*.

Lord Wellington gave a dinner at Paris a short time since, in commemoration of the burning of Washington. In consequence, the American gentlemen gave a dinner in commemoration of the famous victory at New-Orleans. They carried their toasts to the printer to publish. He said he would with pleasure, but the police would not permit him—Some few were published in French, but so mutilated they were no longer the same. Lord Wellington rules France—nothing is done in Paris without his consent and approbation.

Translated from French papers, for the *Baltimore Patriot*.

It was reported in Paris, under the date of the 15th Feb. that Charles IV. would leave Rome, and return into Spain to live near his son Ferdinand VII. The English troops, it was also said, were continuing to fortify Genoa, of which they intended to make a naval military post. Prince Leopold of Luxemburg, the future husband of her Royal Highness the Princess Charlotte, left Berlin the 1st Feb. on his way to England. The marriage of the Prince Royal of Wurtemberg her Imperial Highness the Grand Duchess Catherine of Russia, was celebrated the 24th Jan. in St. Petersburg.

**FROM HAYTI.**

By the schooner *Tantamount*, from Cape Henry, we received a pamphlet and newspapers, from which it appears that an agent of ex-colonists, or French Government, named CATINEAU LAROCHE, had addressed three letters to CHRISTOPHE, from New-Orleans, with apparently the most friendly views. They were not regarded, in this light, however, and being submitted by CHRISTOPHE to his Legislative Body, were received with much indignation. It is supposed at the Cape, that the author of these letters is leagued with PERION to deliver up Hayti to the French Government. M. DUPLESSIS, the supercargo of the vessel from New-Orleans, by which these letters were sent, has been imprisoned, and is charged with being also an ex-colonist of St. Domingo, and with having visited that island as a spy. The above letters, which are dated at New-Orleans, the 25th and 28th January last, with the remarks of the Count De Limonade, Secretary of State to Christophe, upon them, may be seen at our office. The remarks are drawn up in a very eloquent and masterly style.

**Reported destruction of Sierra Leone.**

Capt. Young, of the ship *Charlotte* who arrived at Providence (R. I.) on Saturday last in 44 days from the Bolam Shore (opposite Sierra Leone) and was informed, that two days previous a large party of blacks from the country had attacked Sierra Leone, and having been joined by the black troops stationed there had succeeded in destroying the place, and had murdered nearly all the white inhabitants, together with several British officers.

*Silver Mine.*—It is reported that a Silver Mine has been lately discovered in Poughtown, Pennsylvania, that yields one ounce of pure silver to a pound of ore; that it is easily obtained, and appears to be inexhaustible.

THURSDAY, APRIL 25, 1816.

The communication signed "*Horatio*," was received too late for this weeks paper.

Congress have passed a law establishing a "Bank of the United States of America," with a capital of \$50,000,000 of dollars, divided into 500,000 shares of 100 dollars each. 70,000 shares are to belong to the U. S. and 280,000 shares are to be subscribed for by individuals or corporations; for which purpose subscriptions are to be opened at one principal commercial town in each state, on the first Monday of July next, under the direction of commissioners to be appointed by the President of the United States. Of the 28,000,000 to be subscribed 8,000,000 are to be paid in gold and silver, and 20,000,000 may be paid in funded debt of the United States,—6 pr. cent stock at par, 3 per cent, at 65 dollars on the nominal hundred, and 7 per cent, at a premium of 6 and an half per cent. Five dollars in coin and twenty-five dollars in public stock on each share to be paid at the time of subscribing; 10 dollars in coin and 25 dollars in stock to be paid on each share, six months from the time of subscribing; and a like sum of cash and stock to be paid one year from the time of subscribing. The Bank to be governed by 25 Directors, including the President, five of whom to be appointed by and removable at the pleasure of the President of the United States, and 20 to be elected annually by such of the stock holders as are citizens of the United States, at the Banking-house in the city of Philadelphia. The Bank to commence its operations as soon as 8,000,000 of dollars, exclusive of the 7,000,000 to be owned by government, are subscribed and paid in. The President and directors may establish a Branch Office of discount and deposit at any place in the United States, and on application of the Legislature of any state wherein 2,000 shares shall have been subscribed or may be held, Congress may require such an office to be established. No bills to be emitted for a less sum than five dollars. The notes to be receivable in all payments to the U. States. In case of the Bank refusing to pay its bills in specie, they will immediately bear interest at the rate of 12 pr. cent per annum. Provided that the Bank is not put in operation by the first Monday in April next, Congress may repeal the law at any time within twelve months thereafter.

The following sums have been appropriated by act of Congress, for the expenses of Ordnance and Ordnance stores, including arsenals, magazines, and armories for the present year, viz for armories, 337,848 dollars; for arsenals, 383,000 dollars; for timber for mounting cannon, 75,000 dollars; for gun powder, 93,000 dollars; and for cannon, shot, and shell 111,000 dollars.

It is understood that the Indiana Territory as well as the Mississippi Territory, will this year be admitted into the union of the states, possessing like all the other states the character of independent sovereignties. The federal compact will then comprise twenty states. May the territories of Missouri, Illinois and Michigan soon attain to the same rank.

It appears by an expose of the actual state of the British Navy, on the 1st of January 1813, addressed to the Lords of the Admiralty, by Capt. William Layton of the British Navy, that the "Thousand Ships of Old England" so often held up as a bugbear to frighten the United States into compliance with British policy, exist in a great measure only on paper. The actual number of all ships carrying 74 guns and upwards, was 209; of which there were irreparable, unfit for service, unfit for sea, defective, ineffective, hulks, decayed, or undergoing repairs 103; and of which there were building and incomplete 27; leaving effective ships of the line fit for service, or in ordinary, 77 of 74 guns and upwards. The actual number of ships mounting 22 guns and up to 64 inclusive was 295; of which there were unfit for service, decayed, hulks, troop ships, store ships, hospital ships, condemned, repairing, worn out, and inefficient 101; and of which there were building and incomplete 29; leaving 165 effective ships of 22 guns and upwards to 64 inclusive, fit for service or in ordinary. Of those in ordinary it is presumed that a considerable proportion were not precisely in the condition in which Capt. DACKES would have wished the Guerriere when he fell in with Capt. HULL. As to the increase of the Royal Navy by the ships that were building, have since been captured, &c. it is a question whether it is greater than the losses it has sustained by the casualties of the late American war, and other unfortunate circumstances. If the Royal Navy has not diminished since January 1813, it must now consist of 242 ships

carrying from 22 to 120 guns, in service and in ordinary.

WASHINGTON, April 16.

"Yesterday the bill passed the Senate of the U. S. making further provision for military services during the late war"—[It has now passed both Houses, and only waits the signature of the President to become a law of the land] The principle provision in the law alluded to, is, in substance, that the women and children, if the latter are under sixteen years of age, or if there be no child, then the widow of every *militia-man*, who was killed or who died in the service of the United States, or while returning home, shall receive half pay for five years.—This act is justified by policy as well as dictated by justice.—It will give relief to the survivors of the victims of the war.—It is in acts of this kind, that a government manifests its beneficence, and realizes the hopes of its friends.—It looks with an equal eye to the condition of all; and the poorest citizen is cherished with parental affection.—Congress will rise in this month.

The Tariff bill yesterday principally occupied the attention of the Senate. Considerable progress was made in it. The amendment reported by the financial committee, and several others, to the details of the bill, were agreed to, none of them affecting or touching the material articles of cotton or woollen fabrics. Among other amendments, the duty on clayed sugars was reduced by the Senate from 6 to 4 cents per pound, and that on other brown sugar raised from 2 1/2 to 3 cents per pound. Until the bill is finally acted on, no decision can be called conclusive. When it is finished, we shall immediately put our readers in possession of it. *Nat. Int.*

Memorials are circulating in Baltimore and other cities, for signature, remonstrating, in strong terms, against the bill reported in the House of Representatives "For the more effectual collection of the public revenue in the lawful money of the United States;" which imposes heavy penalties on such banking institutions as shall not redeem their notes in specie from and after the 31st December next. This bill, having been recommitted to the committee who reported it, has been modified by expunging the objectionable feature. *Ibid.*

NEW-ORLEANS, February 23.

Extract of a letter from Col. Flaisher, dated Mount Aetna, (near Fort Claiborne, on the Alabama, Feb. 14

"Nothing new here but the recommencement of hostilities with the Greeks; on the 8th inst. they killed 3 white men, about 30 miles above fort Claiborne, and took 3 negroes and 10 horses. A party of men are in pursuit of the murderers. No doubt we shall have to take up arms immediately. The President's proclamation (against squatters) has given them great confidence that their lands will be restored to them, which they surrendered by Jackson's treaty."

The holy league we this day publish, between Russia, Austria and Prussia, was executed at St. Petersburg, and doubtless is the production of the Russian cabinet. England is entirely left out of sight in this new alliance. The other powers of the continent are only incidentally invited to join them.—The views of Russia are gradually unfolding themselves. They do not carry the most friendly aspect to the interests of England—and we should not be surprised, if the Emperor ALEXANDER should shortly become the Autocrat of the European continent. He is taking the most effectual way of strengthening his arms and enlightening his councils.—He invites the talents, the acquisitions and the honors of France, to repose in his own dominions. *Southern Patriot.*

**Poetry.**

BY LORD BYRON.

"All is Vanity saith the Preacher."

FAME, wisdom, love, and power were mine,  
And health and youth possess'd me;  
My goblets blush'd from every vine,  
And lovely forms caress'd me;

I sunn'd my heart in beauty's eyes,  
And felt my soul grow tender;  
All earth can give, or mortal prize,  
Was mine of regal splendour.

I strive to number o'er what days  
Remembrance can discover,  
Which all that life or earth displays  
Would lure me to live over.

There rose no day, there roll'd no hour  
Of pleasure unembittered;  
And not a trapping deck'd my power  
That gall'd not while it glittered.

The serpent of the field, by art  
And spells, is won from harming;  
But that which coils around the heart,  
Oh! who hath power of charming?

It will not list to wisdom's lore,  
Nor music's voice can lure it;  
But there it stings for evermore  
The soul that must endure it.
