DANIEL REED'S PATENT Pleasant Spinner.

A NEW and useful improvement for Spinning wool, worsted, cotton, &c. to be seen at

WILLIAM D. PARKER'S

in King-street, CAMDEN. This improvement has been in use ever since the first of October 1811, by a great number of Spinners who state that they can spin at least one third faster, and perform with more ease than on the common wheel. This wheel is peculiarly calculated for ease, and is put in motion by drawing a band, and may be lowered or raised as best suits the spinner, and is so constructed as to twist thread with great facility without crossing the band; and the most slender and delicate constitutions are not injured by performing a day's work or more, in a day. It may be used by young girls without any injury to their health. It is allowed by physicians to be a very healthy exercise for weakly persons. It is less liable to get out of repair, and occupies less room than a common wheel; and new beginners learn to spin upon it much easier, and quicker, and make better thread than on the common wheel.

The Pleasant Spinner may be had as above on very moderate terms. The Patent Right is only two dollars. It is well worthy of the attention of every family in which spinning is carried on.

DR. DYOTT'S

Vegetable Nervous Cordial,

OR NATURE'S GRAND RESTORATIVE.

(Price one dollar and fifty cents.)

It is confidently recommended as the most efficacious medicine, for the speedy relief and cure of all nervous complaints attended with inward weakness, depression of spirits, head ache, tremor, faintness, hysterical fits, debility, general weakness, and various complaints, resulting from secret impropriety of youth and dissipated habits, residence in warm climates, the immoderate use of tea, the unskilful or excessive use of mercury, so often destructive to the human frame, disease peculiar to females at a certain period of life.

Under the denomination of nervous disorders, are included several diseases of the most dangerous kind, and are so various, that a volume would hardly suffice to complete a description of them. It pervades, with baneful influence, the whole nervous system, writhing the heart with inexpressible anguish, and exciting the most dreadful suggestions of horror and despair. To this demon have thousands fallen a sacrifice, in the direful transports of its rage.

The most common symptoms at its commencement, are weakness, flatulence, palpitations, watchfulness, drowsiness, cramp, giddiness; pain in the head, back and loins; hiccup, difficulty of respiration and neglitation, dry cough, &c. &c.

great measure, from similar causes—have nearly the same symptoms, and require the same method of treatment as those already mentioned.

Though numberless medicines are extolled for expelling and killing Worms, none are equal in efficacy to Dr. Dyott's *Worm Destroying Lozenges*: they are mild in their operation, and may be given to the youngest infant with safety.

DR. DYOTT'S

Anti-Bilious Pills.

For the prevention and cure of bilious and malignant fevers.

These Pills, if timely administered, will remove the causes which commonly produce yellow fever, bilious fever, ague and fever, cholera pains, flatulencies indigestion, costiveness, hypochondriac and hysterical complaints.

They are particularly serviceable in Female disorders and especially in the removal of these obstructions which are the great source of their complaints at certain periods, they possess this eminent advantage over most other purgatives, while they operate gently, they produce neither costiveness, debility nor too great excitement. When ever there is a predisposition to a disease arising from marsh effluvia, a too copious use of ardent spirits or a vitiated state of the bile, they are sure to relieve.

They are highly recommended to travellers by sea and land, as they may be made use of with the utmost safety, without change of diet or exercise. They will be found peculiarly beneficial to the prevention of disorders incidental to hot climates, they deluge and cleanse viscid humors, open obstructions and promote the secretion of good bile, operating as an easy cathartic, as a powerful diuretic and diaphoretic.
