THE PRESBYTERIANS OF THE NORTH.

Some days ago we had a brief an

## An Important Movement.

EMIGRATION OF FACTORY OPERATIVES FROM ENGLAND.

The London Times says:

Ever since the cotton famine caused by the American war, emigration has been more or less generally advocated by the factory operatives of Lancashire as the grand panacea for the evils of short time and low wages, but until recently no definite system was propounded nor any general effort made to try the experiment. The idea slumbered until the recent successful effort of Preston millowners and manufacturers to reduce wages again evoked it. Gradually the scheme was brought to the surface once morefirst in Preston, then in Blackburn, and it is nursed, by nearly every factory operative in North and East Lan-

Nearly one hundred spinners and minders with their wives and families. have left Preston, chiefly for the United States, since the recent unhappy dispute began, and eight more families will leave Preston for Liverpool, to depart for the same destination in the steamer Mauhattan. Mr. Henro Davis, a gentleman now in London as the agent of certain firms in New York for the engagement of operatives here in various branches of industry, has been invited to Preston by the committee of the Spinners' Association, to consider a plan for a more numerous deportation of the members, and he has replied that he will visit Preston for that purpose in a short

cashire.

In Blackburn still more energetic measures are on foot with the same object. Subscriptions are largely collected among the power-loom weavers. and their executives are preparing to send off as possible, and as soon may be, upwards of one thousand having already expressed their desire to leave for America. About twenty of these operatives will depart from Blackburn during the present month. The Spinners' Association in that town have voted five hundred pounds sterling from the union funds for the same purpose, and the ordinary weekly levy per member has been doubled for the sole purpose of augmenting the Emigration Fund. The increased levy will take effect immediately after the Whitsuntide holidays. Arrangements have already been made to send off between sixty and seventy members of the society, and more will fol- has existed in England will soon subfamilies must, before this, have reached America, and on Tuesday last another batch of emigrants took their departure for the United States.

In Darwen, also the idea prevails that "it would be far better to send people to a country where work is plentiful, and where they are abundantly paid for their labor." The notion is general among the operatives there that the manufacturing trade is leaving this country altogether; and it is a fact that this is one of the reasons given and accepted why the operatives should not strike against the recent reduction of wages there, which it was urged, was only enforced in order to "kill the strike in Pres. ton," by disabling them from contributing to the support of the operatives there. In Darwen there are 13,665 looms, and it has been agreed to raise an emigration fund by a levy of 1d. per loom per week, to raise £56 18s. 9d., which will be sufficient, it is estimated, to send five persons per week to America, "giving them £10 each to start them across the Atlantic."

The present and projected drain of ufacturing districts of Lancashire is of the employers, who, if it be not rasment.

THE VALUE OF WOODASHES AB o common in our day as they were In the days of our fathers, when fireplaces and back-logs were fashionable. and for this very reason we ought to be more careful in saving them. Many farmers who have not yet wholly dis-carded the practice of burning wood are in the habit of selling their wood. seles, to seb-peddlers, for a few cents
per bushel, regarding them of too
little value to warrant the trouble of
storing them for fertilizing purposes.
They make a great metake in this, as
sakes are the kind of fertilizer which

Our Relations with England—The Policy of the President-He Determines to Manage the Matter Himself.

A Washington telegram of the 26th to the New York Evening Post says : The rumors current here in regard o our relations with England-to the in framing a more energetic foreign home to dwell among strangers! policy-are considered by the best in- Home! how the heart thrills with formed persons as merely sensational. pleasure when approaching home It is true that General Butler ad- after a long absence! vises a war policy, and that Mr. Sum-

ner is in favor of reopening negotiations with England, but President Grant, notwithstanding all the obstacles which are thrown in his way by intriguing politicians, as well as by threats of senatorial interference and and that his course will be approved by them.

It is ascertained from the most trustworthy sources that the President considers that England established a precedent during the late war which cannot be regarded otherwise than exceedingly favorable to the United States. It is therefore useless to ask England to retrace her steps the United States in case she should go to war with any other power.

The President believes that these are matters which concern England rather than the United States, but that on the other hand, if England sees that she was wrong, and that the same neutrality principles she applied to the United States would prove very disastrous if applied to herself in for new negotiations.

for pursuing a more energetic foreign policy in reference to England.

In connection with this subject it has become known that several cable dispatches were recently sent to leading officials in England by Englishmen the angry feelings which at first existed after the receipt of Mr. Sumner's speech, is beginning to disappear, and it is anticipated here in official circles that the violent excitement which

We do not advocate placed in a position of great embar. deep tillage during the growing season, but we would have the ground deeply and thoroughly stirred early in the season whether it were an old MARURE Wood ashes are not quite or new plantation. Once, however, that vigorous growth of top and root has commenced, all deep tillage should coase, because, by pursuing it, constant and continued checks are given, and a truly healthy growth prevented by a repeated breaking and tearing asunder of the roots and fibres, the supplying pipes of elongation, expansion and evaporation of the branches and leaves. By the repeated surface

THE IMPORTANCE OF HOME

BY REV. T. L. SHIPMAN.

Home! how sweet and sacred the associations which cluster around the charmed spot! Home! what longing and lingering looks effect that President Grant is engaged we cast back when grst leaving

The importance of home appears from the fact that it is identified with the family constitution. That constitution dates from home. Marriage, which lays the foundation, is an ordinance of God. It was indictation, has taken the management stituted in Eden. The first home of this difficult question into his own created by marriage was in Parahands. In doing so he feels that he dise: "Therefore shall a man leave is carrying out the will of the people, his father and his mother and shall impulse and caprice we might herd together like the brutes, and become, for this reason, independently of any other right, fit to herd with brutes.

The importance of home appears, from the relation in which it stands so long as she considers herself in the to the forming period of life. The right, and with nothing to fear from plastic, moulding period of life includes infancy, childhood, and early youth, and this is ordinarily passed under the parental roof. The imitativeness of childhood is a universal law which, like habit, proves a blessing or a curse, according as it is well or ill directed. If the parents are frivolous or vicious, the child will, by the power some future emergency, then it is for of example, be educated to frivolity her to open again the so-called Ala- or profligacy independently of any bama matter and make propositions other training, and, I may add, as general fact, despite and other In this condition the question stands training. If the parents possess a for the present, and the President substantial, and especially a consissees no necessity whatever just now tent religious character, the character of the child will be formed on solid foundation. The child will the blessing of God, to piety.

Home takes the supervision of here, and the answers thereto say that the character precisely at the pe-A good deal of importance is also and presence" from home influenand this country were becoming very | that the grace of God can not counfort themselves in their negligencies and mistakes, with the confidonce that grace will by and by supply their omissions, and rectify their errors.
