This is an ideal spot for a dam, and the flow of water is sufficent all the year round for the needs of a small town like this. During the far greater part of the year twice as much power could be secured as is indeed. Of course, the dam would be only a part of the initial expense, but the opportunity is there, and some day it will be eagerly seized.

The New Catechism

A well-known doctor of Savannah has two children-a little daughter, age six, and a small son, aged four. One day he overheard the little girl putting her brother through an examination in Bible history.

"Do you know who the first man and the first woman were?" "Yeth, I do," lisped the boy.

"I'll bet you don't know their names," pressed the sister.

"I bet I do!" replied the little

"Well, what were their names then, Mr. Smarty?"

"Edem and Ab!" answered the little boy.
