Bryan can get along without the Democratic party much better than the party can get along without him.

Bryan has been read out of the Democratic party again, but he is still the greatest Democrat in the world.

The New York World is getting ready to bolt the Democratic ticket next year as Mr. Bryan predicted it would do.

The fault with many a man who makes mistakes lies not so much in the making of them as in refusing to profit by them that his future may be wiser and more successful.

Apparently one of the chief uses of our great national holidays affording a suitable time for boxers to bruise one another for the enjoyment of the people with depraved tastes.

The people of Mississippi have chosen Vardaman to represent them in the United States Senate over two competitors by a large majority.

Some people want to live according to a set of rules that somebody may frame for them. The true way is to let life be controlled by principle.

No Democrats who is acceptable to newspapers like the New York World could be elected President. Such a Democrat would be so much like a Republican that you could not tell which from the other.

Without the support of Bryan the Democratic party would not stand no more chance of electing the next president than a Hearst's Independence League did in the last election.

With affairs in eastern Europe more than usually unsettled, with Germany insisting on putting her finger in the Moroccan pie...

Bryan's answer to Underwood is complete and conclusive. He says his criticism was based on a report from Washington published in an Omaha newspaper...

The Columbia Record hits the nail squarely on the head when it says "The New York World is a splendid Democrat's fighter—except during a presidential campaign..."

Br'er Taft seems to be between the devil and the deep blue sea, as the old saying goes. If he signs the tariff reform bills being passed by the Democrats...

The doctrine that government land belongs to the people and should be retained for their benefit and not speculators and trusts is that of justice and common sense.

There seems to be a scarcity of international marriages just now at which good American gold is exchanged for empty titles.

Probably the man was suffering from acute indigestion caused by poor cooking who said that, "God sends food, and the devil sends cooks."

If it is true that the dreadnaughts are to give way to a smaller, cheaper and more effective fighting ship it ought to bring relief to the weary taxpayers already staggering under their burden.

When the first news leaked out at the McKeehearing, sensational developments heaped upon one another, forging a chain of evidence that names an astonishing number of prominent and respected male citizens of the smoky city.

Push the County Fair.

In many counties of this and other States people are getting ready for their annual fairs. Pigs are being fattened; big squashes are being carefully fed; housewives are planning to make prize butter or prize cake...

County Fairs are great educators, and the one that will be held in this county will learn us many new things. County fairs bring to the farmer the latest ideas in labor saving farm machinery...

To that and let us all put our shoulders to the wheel and push the Fair along. It is possible to overcome local patriotism, but it seldom occurs as a rule people are too indifferent to the place in which they live.

Few towns will grow without being pushed by its people. The town that grows without being pushed has greater natural advantages than Orangeburg, so if we want our town to expand and become the commercial, educational and social centre of this section...

What It Means.

In speaking of the Farmers' Free List bill, which has passed both Houses of Congress and now awaits the action of President Taft...

The News and Courier goes on to say that "President Taft has it in his power through approval of this bill to reduce the operating expenses of every farm in the United States..."

With all his pretensions to the contrary, President Taft is a strong friend of the predatory interests in this country that have for years been preying on the people...

Poor Innocent Men.

News comes from Pittsburg, Pa., that detective saw working there on what is believed to be the most gigantic case of blackmailing by organized gangs of pretty girls in the history of the country.

These pretty young blackmailers are said to have made a practice of getting the names of men of prominence, prospective victims and then by some means scrape acquaintance with them.

They Have Come, Again. Sometime ago it was heralded abroad that a sea serpent had been seen near some Northern watering place. Then followed a report that a mermaid had been seen combing her hair near some Southern watering place.
