

Mr. L. Showem

He Meets a Pair of Rainy Daisies

By Ryan Walker.

If it's a surface to be painted, enameled, stained, varnished or finished in any way, there's an Acme Quality Kind to fit the purpose.

5 Strong Reasons for Fall Painting

1. The wood is thoroughly dry. *Summer's sun has removed all moisture.*
2. Paint penetrates deeper into dry wood. *The deeper it goes the better it holds.*
3. Fall weather is warm, dry and dependable. *Little danger of cold, damp, rainy days, which endanger the durability of the paint.*
4. Wet weather decays and destroys unprotected surfaces. *Lack of paint means unsightly and less valuable property.*
5. Fall painting keeps out winter moisture. *The greatest enemy to the life and beauty of all structures.*

Ask us about ACME QUALITY HOUSE PAINT. It insures the greatest protection and beauty, at the least cost per year of service. Questions cheerfully answered.

R. N. OWEN, Agent for Kershaw Oil Mill.

Key, But No Door. An artist has a key which belongs to a door in Paris. Which one? He doesn't know, but starts on a quest for the door. Read the splendid mystery story, "The Key to Yesterday," by Charles Neville Buck. Formerly published at \$1.50; now FIFTY CENTS, at Sims' Book Store.

TAFT'S BOARD

(Continued on 3rd page.) proprietor of the Breeder's Gazette, was president of the International Stock Exporters Association and Chairman of the American Reciprocity and Tariff League when appointed a member of the board. He has been prominent in Republican politics in the Middle West and is a protectionist. He was secretary of the National Cattle Growers' Association from 1882 to 1885 and United States Commissioner to the Paris Exhibition of 1900. The author of a "Standard History of Short-Horned Cattle," he has always advocated a duty on hides in his paper. He started life as a newspaper reporter and has made a fortune in the publishing business. He is fifty-one years old. James Burton Reynolds is the former Assistant Secretary of the Treasury who was accused by Special Agent Parr of having tried to stop the investigation of the sugar-weighting frauds. Just before these charges were made public, Mr. Reynolds ceased to be Assistant Secretary and was made a member of the tariff board. He is a great friend and admirer of ex-President Roosevelt, a staunch Republican and a high protectionist. He was Secretary of the Republican State Committee of Massachusetts from 1896 to 1905 and Assistant Secretary of the Treasury from 1905 to 1909. Roosevelt appointed him chairman of the government commission which visited France, Germany, Austria and Great Britain to consider trade relations. He was formerly Washington correspondent of the Boston Advertiser and Record and editorial writer on the New York Press. He was born in 1870. William Marcellus Howard is one of the two new members appointed on March 4, 1911. He served seven terms in the House of Representatives as Congressman from Georgia, but was retired by his constituents at the last election because he joined the Tammany Democrats in preventing the overthrow of ex-Speaker Cannon.

Thomas Walker Page, the other Democratic member, was formerly Dean of the College of Commerce and professor of history and economics at the University of California. He was professor of political economy in the University of Virginia when appointed by President Taft. He is an educator whose whole life has been spent in the class-room. He studied at the Universities of Virginia (A. M.), Leipzig (Ph. D.), Oxford and La Sorbonne, and is member of the American Economists' Association and of the American Historical Association, but is virtually unknown except as a contributor to economic, historical and scientific journals.

Administrator's Notice.

Notice is hereby given that on Tuesday the third day of October, 1911, the undersigned will file with the Judge of Probate in and for the County of Orangeburg, South Carolina, their final account as administrators of the estate of Emanuel E. Bull, deceased, and will thereupon apply to the Probate Court for their final discharge as such administrators.

All persons holding claims against the estate of the said Emanuel E. Bull, deceased, must present their claims duly proven to the undersigned, or to Glaze & Herbert, Attorneys, Orangeburg, S. C., on or before Monday the second day of October 1911, or be barred by payment; and all persons indebted to said estate must make payment to the undersigned on or before the last mentioned date. (Mrs.) Harriet E. Bull, David G. Dantzier, Administrators Estate Emanuel E. Bull, deceased, Vance, S. C. 9-1-41-S

Document Discovered.

A paper telling of a large sum of money which the adherents of Napoleon had hidden in Corsica, is discovered, and an expedition is fitted out to capture the prize. Read Harold MacGrath's "A Splendid Hazard." Formerly published at \$1.50; now FIFTY CENTS at Sims' Book Store.

Without advertising your store and this paper could not get along—so let's stick together.

KILLED MANY

(Continued from 1st Page.) the effects of food adulteration last year, Mr. Rutherford replied: "I think a conservative estimate would be 550,000." Three million persons were needlessly ill in the United States last year, he asserts, and chemicals are charged with being mainly responsible. He names several diseases that are often the results of chemicals. Kidney disease may result from saccharin in foods he declares, as is shown by the government's own report. Appendicitis frequently results from consuming boracic acid. Ptomaine poison is nearly always the result of eating partially decomposed foods, especially milk and milk products, fish and meat, when the signs of decomposition have been concealed by benzoate of soda, formaldehyde, sulphites or other chemical. Dyspepsia and other forms of indigestion are the inevitable consequences of consuming saccharin in excessive quantities, saccharin being 550 times sweeter than sugar. Typhoid fever is a disease most frequently caused by drinking milk or eating ice cream and other milk products in which chemicals are employed to cover up the evidence of decay. Bright's disease is a kidney trouble which often comes from taking too much saccharin. Headache, drowsiness, nausea, and other ailments are caused by consuming salicylic acid and benzoate of soda.

Including a discussion of the effects of chemicals the author says: "In addition to their own harmful effects, chemicals are sources of greater danger in hiding from our senses the impurities in the foods which otherwise we might detect in the ill taste and odor. Milk, eggs and fish are three foods especially which become dangerous when decomposition sets in.

"The vilest, most malodorous factory refuse may be made pleasant to the sight, taste and smell through the magical effects of benzoate of soda, saccharin and coal tar dye. The coal tar dye gives a clear, translucent appearance to the product, the saccharin sweetens it, and the benzoate of soda embalms it so it will keep for a decade without spoiling. These disguised putrid foods are additionally dangerous in hot weather.

We adults who have survived the growing use of chemical foods for the last twenty years have become somewhat immune to them perhaps, as they say a person can continue taking poison in small doses until he is either killed or becomes so he is not affected by poison. But with little children the conditions are different and I doubt not that these chemicals eaten by the child or its mother have very much to do with the infantile mortality.

Valuable Plantation for Sale.

I am offering to sell as a whole until October the fifteenth, 1911, one of the best cotton plantations in Calhoun County. If not sold as a whole by then I shall cut into small tracts and sell.

This plantation is located within one mile of Lone Star, S. C., and the A. C. L. R. R. runs through place, making it an easy matter to arrange a plantation siding at almost any point. There are 1264 acres in the tract, 430 of which are in swamp and pasture land, 600 acres now in cultivation, and about two hundred that can be cultivated very easily.

The land is a dark soil, practically level and free of stumps; there are twenty good settlements on the plantation, and the average rent for the past twelve years has been 2,500 pounds of lint cotton per annum. I am asking \$30,000 for the place, and left as it is entirely to tenants it yields a magnificent return on that amount, but this could be very much increased by push and personal attention, as the character of this land is the very best and responds quickly to work and fertilizer.

For full particulars apply to F. D. Bates, Orangeburg, S. C. 8-31-11

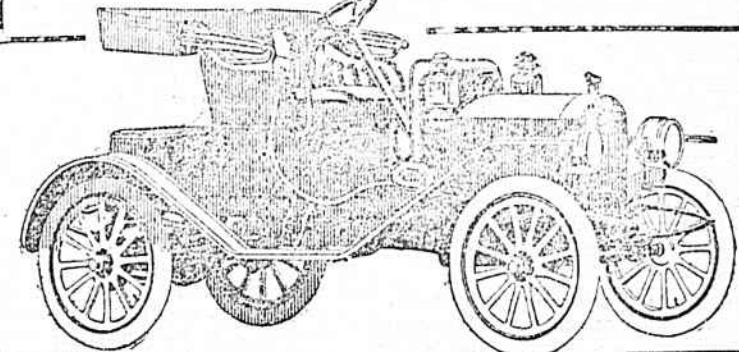

Notice.

All persons are hereby forbidden to hunt or trespass in any way on my land. H. A. Gleaton. Aug. 22, 1911. 9-5-41\*

Help the Farmer.

Every one should assist the farmers in breaking up the conspiracy formed against them to get their Cotton from them for less than it is worth.

Come, take a ride in the New Maxwell Messenger?

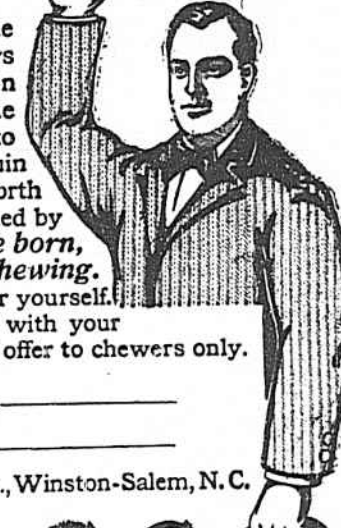

WE'RE ready to show you the new Maxwell Messenger—the 1912 successor to the famous Model A B Runabout that's made a name for itself everywhere as the Great Economy Car. You can ask any owner—there are 21,000 of them—about its qualities. Every one of them is enthusiastic about the service it has rendered them. Not a weakness developed—not a mechanical change needed in five years since it was first introduced. It's so reliable because it's simple and dependable; mer- cifully because it's quick and economical; women, because it's simple and easy to drive. Anyone can learn to drive it in fifteen minutes. It doesn't take fifteen minutes a day to care for it. It holds non-stop and endurance records, as well as economy records by the score. See it in the new dress with improved finish and optional color scheme—either dark-blue body with light-blue wheels or blue body and cream-colored running gear. It's sold equipped with top, three oil lamps, two gas lamps, generator and mag- neto—all for \$600. It is here now. Come in and we'll demonstrate it for you—glad to have you ride in it.
