Here is a hard luck story apropos of efforts to make a little sum in Wall street: A young man started with \$100 ease. and ran it up to \$9,960, or \$40 less than an even \$10,000. The desire to round out the \$10,000 goaded him on. He said to his broker, "If I can make that additional \$40 on a quick turn I will draw out my \$10,000 and invest it in real estate." It was a strong bull market, but things appeared sky high, and he picked out an active stock to sell short. I think he landed on T. C. and I., which had a phenomenal rise and was due to drop anywhere from 10 to 50 points. He sold 100 shares at par, intending to close it out at 99. But instead of going down the blamed thing soared to 126. At every three points' gain he sold another 100 until he was carrying all he could tote.
