

**MAY SHIP BUTTER IN WARM WEATHER BY PARCEL POST**

Thoroughly Practical if Proper Conditions Are Maintained—Cleanliness, Suitable Temperatures, Good Packages, and Plenty of Wrappings About the Butter Are Important.

Parcel post shipments of butter are likely to be subjected to condi-

tions, especially during the summer, which may cause deterioration and injure the quality of the butter. It is highly desirable, say specialists of the United States Department of Agriculture, that every possible precaution be taken before shipment. Particularly in this time of farm-made butter, because conditions affecting its quality and condition usually can not be controlled as easily as in creameries. Farm-made butter, however, should be marketed just as satisfactorily as creamery-made butter when it is properly made and prepared for

shipment.

**Cleanliness is Most Important**

It is necessary to maintain proper conditions in the care of the milk and cream and the making of butter if a marketable product is to be produced. Too much importance, it is said, can not be given to maintaining clean conditions in the stable and in other places where the milk, cream, or butter are produced or kept, for they absorb odors and spoil very quickly. It is important, too, that these products be kept in a cool place. High temperatures should always be avoided, as they produce a soft, oily condition of the butter which is undesirable.

In manufacturing butter on the farm or in a factory the buttermilk must be removed and washed out, and the proper amount of salt must be incorporated evenly. Frequently parcel post shipments of farm butter are unsatisfactory to customers because proper methods were not used in making it, and the quality and condition of the butter thereby injured before it was shipped. For the satisfaction of customers it is important that a uniform quality of butter be produced.

Methods used in preparing butter for parcel post shipping depend largely upon the local conditions and style of package used. To insure delivery in the best possible state, butter, after being packed or printed and placed in cartons, should be chilled or hardened thoroughly before it is shipped.

One of the most satisfactory ways of preparing butter for shipment is in regular 1-pound prints, the standard print measuring 2 1/2 by 2 1/2 inches. Every pound print should be neatly wrapped in regular butter parchment or paper. A second thickness of such paper has been found to add materially to the carrying possibility of the butter. Waxed paper may be used for the second wrapping. As a further protection to the print, it should be placed in heavy manila paraffin cartons, which may be obtained from folding paper-box companies, either plain or printed as a stock carton or with a special private brand.

**Packages That Protect Against Heat**  
Corrugated fiber-board shipping containers of various sizes may be obtained for shipping 1-pound prints of butter. These boxes or containers practically insulate the butter and furnish much protection against heat. Further protection may be obtained by wrapping the container in stout wrapping paper. The whole should be tied securely with a strong cord. In tying the twine it should be drawn tightly around the package so as to insure its proper carriage. Not infrequently packages are broken open or otherwise damaged because they are insecurely tied. The corrugated containers are also useful for carrying shipments of butter put up in other styles.

Some persons ship butter by parcel post in improvised or homemade containers. Clean, discarded, corrugated paper-board cartons are obtained from the grocer or other merchant at small cost or frequently without any cost at all. It is possible to cut a piece of paper board in such shape and size that when it is folded it will form a satisfactory carton.

Butter shipped in an improvised container should be wrapped in parchment paper and several thicknesses of newspaper and then should be securely tied with string. The package should then be inclosed in a piece of corrugated paper board with the projections so folded as to form a container. The container should then be tied with twine, wrapped in heavy paper, and again securely tied with a strong cord.

If butter that is prepared for shipment in this manner is thoroughly chilled before being mailed, it should carry safely even in warm weather if it is not in transit more than 24 to 36 hours.

We are proud of the confidence doctors, druggists and the public have in 666 Chill and Fever Tonic.

**NOTICE**

Notice is hereby given that lands in Santee swamp, Clarendon County, between the Sumter-Clarendon county line on the north and Jack's Creek and Stave Island on the south, formerly owned by the Santee River Cypress Lumber Company is now leased to the Brooklyn Cooperaige Company of Georgetown, S. C. Hunting, fishing, and grazing rights on the above area have been leased to J. J. Broughton, etc., of Pinewood, S. C. Brooklyn Cooperaige Co. By Woods Superintendent.

**NOTICE OF DISCHARGE**

I will apply to the Judge of Probate for Clarendon County, S. C., on the 20th day of June, 1921 at 11 o'clock a. m. for Letters of Discharge as Administrator of the Estate of Peter L. Holliday, deceased. Young A. Holliday, Administrator. Manninf, S. C., May 17, 1921 pd.

LOOK FOR THE YELLOW FRONT.

*The finest Tire for Small Cars*

**Goodrich 30x3 1/2**

*Anti-Skid Safety Tread*  
at the 20% Price Reduction

Here is a 30x3 1/2 tire, with snappy black tread and creamy white sides—clean, trim, splendidly finished—generously large and full in size, with the Goodrich anti-skid safety tread.

This tire will give you much longer mileage, the greatest of durability, the utmost riding comfort and the fullest satisfaction.

Like all other Goodrich tires the "30x3 1/2" is made only in one quality. It is so thoroughly and unusually good that its makers frankly declare it the best tire ever made for small cars.

THE B. E. GOODRICH RUBBER COMPANY  
Akron, Ohio

Dealers everywhere are selling Goodrich Silver-town Cords, Goodrich Fabric Tires and Goodrich Red or Gray Tubes—all one quality—at the 20% reduction in prices which Goodrich made effective May 2nd, 1921.

Goodrich 30x3 1/2 anti-skid safety tread fabric tire now available at the 20% Price Reduction which goes into effect May 2nd

**DANGER SIGNALS**

Headache, colds, nausea, blues, mental depression—these are not only painful and annoying, but they are danger signals.

A great majority of these passing illnesses are due to self-poisoning resulting from constipation. Unless you keep your system free from decaying food waste, you start continuous poisoning inside. Ultimately Bright's disease, rheumatism, gout, diabetes, pernicious anemia, and the like, may result.

Pills, castor oil, laxative waters and salts only force and irritate the bowels, and make constipation a habit. Nujol works on an entirely new principle.

Instead of forcing or irritating the system, it simply softens the food waste. This enables the many tiny muscles in the walls of the intestines, contracting and expanding in their normal way, to squeeze the food waste along so that it passes naturally out of the system.

Nujol thus prevents constipation because it helps Nature maintain easy, thorough bowel evacuation at regular intervals—the healthiest habit in the world.

Nujol is absolutely harmless and pleasant to take. Try it

Nujol is sold by all druggists in sealed bottles only, bearing Nujol Trade Mark. Write Nujol Laboratories, Standard Oil Co. (New Jersey), 50 Broadway, New York, for booklet "Thirty Feet of Danger".
