

WOULD GIVE WORK TO MILLION MEN

Building of Roads Would Supply Jobs to Many—States and Municipalities Have Ambitious Programs of Construction.

Washington, Oct. 22.—That the federal government, in cooperation with the states, can promote the establishment of a great and necessary public utility and at the same time give employment to more than 1,000,000 men is a fact conservatively and logically pointed out in a statement issued here today by the good roads board of the American Automobile association.

In its statement the "A. A. A." says: "Expenditures for public roads and bridges outside of incorporated cities will amount to approximately \$600,000,000 during the current calendar year. This vast expenditure is applied to the payment of labor, materials, machinery and profits. Of this sum, approximately \$500,000,000 by the end of December, will have gone for the employment of labor. On the basis of \$3 per day, this means that during the current year there is being applied to public highways of the country about 166,000,000 labor d.ys. Thus, on the basis of 200 working days, employment will have been given to about 830,000 laborers. Hence, if the pending federal aid, providing an additional \$75,000,000 of federal money to be matched by \$75,000,000 of state money during the calendar year 1922, becomes a law, there will probably be expended during the year on public roads in the United States approximately \$800,000,000, of which about \$640,000,000 will be applied to the employment of labor. On the basis of \$3 per day, and giving 200 working days to each individual, this means that very likely during 1922 more than 1,000,000 workmen will be employed in the building of roads and bridges and in the manufacture of road machinery therefor throughout the United States.

BEEF CATTLE BENEFIT FARM; TURN ROUGHAGE TO PROFIT

The use of beef cattle in connection with general farming throughout the Corn Belt, says the United States Department of Agriculture, offers the following advantages:

It is possible to make greater use of dry roughage produced on the farm as beef cattle consume larger quantities of these feeds than any other class of live stock.

Beef cattle can be used profitably on rough land unsuitable for crop production; also on low, wet land unsuitable for either crops or for other classes of stock.

Beef cattle use the total production of grain and roughage on the average farm, without the purchase of other feeds, more efficiently than any other class of live stock.

Beef cattle on the farm favor a well-balanced distribution of labor throughout the year. They require very little attention during the summer and fall, when crops need attention, and during winter and early spring, when there is little field work to be done, farmers can utilize their time to advantage by caring for the breeding herd, wintering the stockers and feeders, or fattening some steers.

GOOD PUREBRED BULLS IMPROVE HERDS QUICKLY

With purebred bulls a breeder achieves more in the improvement of his herd in two generations than he can in five with grade bulls, says the United States Department of Agriculture. Department workers have thoroughly studied the subject of building up herds to better milk, butter, and beef production. Better sires may be obtained either by individual purchase or by becoming a member of a bull association. Literature on the latter method can be obtained by writing to the department, and will furnish useful reading during the winter. Full information can also be obtained by consulting your county agent or State agricultural college.

Woodward, then Julia E. Mellette, by Julia E. Mellette and R. B. Mellette Jr., by deed dated October 6, 1914, and recorded in the office of the Clerk of Court for Clarendon County in Book Q-3 at page 32.

Purchasers to pay for papers. J. E. Gamble, Sheriff of Clarendon County.

PREPARE NOW for Baby's Coming

THE expectant mother owes it not only to herself to prepare for an easier delivery, but to her child who should be stronger, healthier and more robust thru her care and intelligence.

What is one of the most important things a mother-to-be should do?

The universal answer from thousands of experienced mothers is this: The mother-to-be should massage the muscles and nerves involved in the function of child-bearing, daily, with an application of Mother's Friend. *Because—*

Three generations of mothers record the virtue of Mother's Friend for not only allaying distress in advance, but for assisting nature in assuring a speedy recovery for the mother.

So thoroughly has Mother's Friend proven its wonderful efficiency in thousands of cases, that any expectant mother who does not employ its use as directed deprives herself of a powerful agent for her relief and well-being, during the period of pending maternity, and of her prospects for an easier delivery when the eventful hour arrives.

The women who appreciate Mother's Friend the most, and who are

loudest in their praise of it, are those who unfortunately did not use it with their first baby and who, thru its use with the second one, were able to fully realize the almost unbelievable relief it gave.

Mrs. Olive Vanden, 10 Grape St., Gallipolis, Ohio, says:

"Before using Mother's Friend I suffered from Wednesday 'till Sunday. With my next child I used Mother's Friend and was sick only about three hours."

Many doctors and nurses recommend Mother's Friend. For external use—is perfectly harmless. Begin its use at once. Sold by all druggists.

WARNING: Avoid using pain oils, greases and substitutes—they act only on the skin and may cause harm without doing good.

MOTHER'S FRIEND

Used by Expectant Mothers for Three Generations

BRADFIELD REGULATOR CO. Dept. 40, Atlanta, Ga.

The Best Gasoline Costs no More

DURING our many years' experience in producing gasoline we have discovered that the proper blending of basic crudes is necessary for a well-balanced fuel. And our access to practically every developed oil field has insured full utilization of the various types and grades of crude in exactly the proportions needed.

The improved "Standard" Motor Gasoline is produced through the efforts of our Development Department experts. These men have devoted their lives to the study of oil refining and the relation between the properties of oils and the uses to which they are adapted. "Standard" Motor Gasoline represents the fruit of their years of painstaking experimentation. It is uniform in quality, quick-firing, clean-burning. It is the best gasoline obtainable, and costs no more than any other.

The consistent use of "Standard" Motor Gasoline will go far towards correcting many of the more common difficulties of motoring. If your engine overheats or gives off vile exhaust gases, if your cylinders miss or carbonize quickly, if the oil in your crankcase becomes diluted, it is probable that you have been using the wrong gasoline.

Fill up with the improved "Standard". On sale wherever you see the familiar "S.O." sign. Remember—it costs no more.

STANDARD OIL COMPANY (NEW JERSEY)
