

GAME WARDEN WARNS AGAINST TROTLINE

Game Warden Joe M. Caughman has requested The Dispatch-News to print the law prohibiting the use of trotlines in clear water streams, and ponds, and to state that the law will be strictly enforced against violators.

The act follows: The catching of game fish shall be with hook and line only in all clear water streams and waters of the state. Gill nets (not to extend more than half way across a stream, lake or pond), traps, seines, trotlines or other device which does not block the passage of fish in streams may be used in the muddy streams of the state: Provided, They be not used within 100 yards of the mouth of clear water streams emptying into the same: Provided, further, That a seine or net may be used in fishing between the first day of September and the first day of May. No traps, nets or other devices shall be used at the mouths or inside of any rice field ditches. The tickling, pegging or catching of game fish by any means, except rod and line, or hand line, or single set line outside of beds, is strictly forbidden.

The penalty for the violation of this law is not less than \$10 and no more than \$100, or prison sentence of ten to thirty days.

MORE LEGAL TITLS IN SWYBERT CASE

The Job C. Swygert case took a new turn yesterday when his attorneys presented a writ from two justices of the supreme court, faking jurisdiction to the extent of hearing arguments to determine if the defendant shall be tried in Richland or Lexington county. Swygert is being held for the killing of Dr. J. C. Nicholson in Lexington county, who died in Richland county, and he was brought before Judge Townsend in Richland county to be arraigned. Commonwealth attorneys directed attention to the lack of one name on the writ, but offered no objection. Judge Townsend said he would continue the case as a mark of respect to the writ issued by Justices Watts and Cothran. The defendant was ordered to give bond in the sum of \$6,000 to the supreme court.

Solicitor Spigner called for Job C. Swygert yesterday in the criminal court and his attorneys took action immediately to prevent his arraignment on a charge of murder. The writ was read to the court, and it directed the sheriff of Richland county and the defendant to appear at Greenville today, June 27, for the hearing to determine if Richland county has jurisdiction over the defendant. As soon as the notice was served on Judge Townsend he continued the case until the supreme court renders its decision.

The defendant is contesting every point in an effort to have the case tried in Lexington county, where the alleged shooting occurred. Swygert was indicted by the grand jury of Richland county after Judge Townsend informed the body that a crime had been committed in both counties and that the case was triable in either county.

Howard Martin, Ed Martin and Hilton Modlin, white men, were convicted of larceny yesterday and were sentenced to serve 30 days. The defendants were tried on charges of housebreaking and larceny.

The jury in the case of Dave Broyles will bring in a sealed verdict this morning. Broyles was prosecuted by another negro named Frank Land, who testified that Broyles fired a shotgun and his body was hit by a small shot. Land has been in jail 14 days owing to the disappearance from the court room. Land appeared and then disappeared and when he was located he was kept confined in jail until the case was called. THE NEWS OF BATESBURG.

Batesburg, June 14.—The revival meeting which has been going on for the past three weeks at the Middleburg Baptist church under the direction of Rev. Mr. Haggard, pastor of the Brookland Baptist church, has increased in interest to such an extent that the people hastily erected during the past week a large tabernacle 50 by 90 feet on a vacant lot near the power house, in order to accommodate the large crowds attending the services. These meetings will likely continue two or three weeks longer. All the denominations in this town are assisting the minister in his efforts to bring about a religious revival among our people. A trained chorister from Atlanta has charge of the music, assisted by a strong local choir. Mr. Haggard is a preacher of much force and a successful evangelist. He is a native of Tennessee, but has been engaged in pastoral work in this State for a number of years, being pastor of the Brookland congregation for the past two years. Students from this town attending the various schools and colleges in this state are returning home for vacation.

Several farmers in and near Batesburg report the prevalence of the boll weevil already on their cotton. Some of them are using a spray with seeming success. The continued dry weather is an advantage in fighting the weevil as it has been discovered that it does not make as much headway during periods of dry weather as it does in wet weather. Fortunately for our people, however, the acreage in cotton has been materially cut this year and the land planted in other crops.

METHODIST REVIVAL SERVICES.

Probably the largest congregation ever gathered for divine worship in Lexington greeted the pastor-evangelist, Rev. A. E. Driggers, at the Methodist church last Sunday evening. It was given up by all to be the largest congregation ever assembled for any occasion at this church.

Those who fail to hear Rev. Driggers miss a great privilege when it comes to plain Biblical heart-searching messages. If you have not heard this man of God do so at the next service.

The services for men only on last Sunday afternoon proved to an innovation for this town. However the evangelist was greeted by a well filled house. We are glad to know a like service will be conducted next Sunday at the same hour.

The singing, led by Mr. W. J. Smith of Gilbert, is of a high order and proves to be a real preparation for the service.

We are glad to know the services will continue through next Sunday evening. Two services each day at 10 a. m. and 8 p. m. with three services Sunday. If you fail to attend these services you miss much that will prove a real blessing to any one.

FIRST PHONOGRAPH DISK

The first phonographic disc is still in existence, in the Smithsonian Institution at Washington. It was made in 1887 by Emil Berliner and the first song sung on a phonographic disc was 'The Sweetest Story Ever Told.'

The Berliner disc, which Berliner experimented with is of glass. A coat of soot was rubbed over the surface. The revolution of the machine caused the needle to scratch the sound into the glass and thus make lines. Thus the voice of a person singing into the horn was recorded. From it a zinc disc was then made, and a copper matrix was the next step. From the matrix all records were cast. Thirty-four years ago all finished records were of rubber. Today the finished record is made of various chemical compositions, with a good proportion of rubber.

There were five steps in casting the first discs, whereas today only three steps are necessary. First, there is the wax disc, which records the voice. Then the matrix is cast, and finally the complete record.—Detroit News.

VALUE OF ACCURACY

What time was it when the castle clock struck 12?

Ten thousand pounds, normally about \$50,000, hangs on the answer to this question, explains the London Express correspondent in Denmark, which has been the subject of lively argument in the Eastern Civil Court, Copenhagen.

The clock in question is in the tower of Lystrup castle, the seat of one of Denmark's greatest landlords, the late Count Moltke, a life member of the ancient House of Lords.

Count Moltke died on the night of December 19-20, 1918, a few seconds after the castle clock struck 12. The Danish Parliament recently approved a new and increased scale of death duties, applicable to the estate of all persons who died after midnight on December 19-20.

It is contended by the Count's heirs that the castle clock was fast and struck a minute too soon. The Count, they say, died December 19, and therefore his estate is exempt from the increase in the death duties.
