TATIONERY

AND POOR

6.40

\$2323.54 umbered 3952 to 4087 inclusive Daniel J. Martin. County Supervisor

John Willcox Clerk of Board

May 14, 1909.

An English inventor has produced an instrument which he calls a sexaphone, and which, he declares is an infallible discoverer of sex. It consists of a pith ball suspended at the end of a piece of magnetized steel and copper wire with a wooden handle at the opposite end. If it is a male creature 3.50 the pith ball rotates steadily, but 56.96 if held above a female the ball swings backward and forward like a pendulum. The instrument, according to report, has been tested successfully on rabbits, mice and 15.35 other animals, and the inventor claims, that it will tell the sex of eggs. The English opponents of woman suffrage argue with laughter that the sexaphone furnishes 38.00 the most complete scientific proof of the incapacity of woman for the ballot. It shows, say they, that the man is an all around creature

MASTER'S SALE.

while the female merely vacillates.

By virtue of a decretal order to me directed in case of F. S. Jackson, plain-tiff, against Flora Wagstaff and others, detiff, against Flora Wagstaff and others, defendants, in the Court of common Pleas for Marion County, the undersigned will sell at public auction, for cash, on sales day in June 1909 within the usual hours of sale, before the Court House door at Marion, S. C. All that certain piece, parcel or lot of land, situate and being in the Town of Dillon, in the County of Marion and State, aforesaid being in the Town of Dillon, in the County of Marion and State aforesaid, bounded and described as follows, to wit: On the North Seventy Five (75) Feet by Calhoun Street; East One Hundred and Fifty (150) Feet by Fifth Avenue; South and West by lands of F.

The examination for the award of va-cant Scholarships in Winthrop College and for the admission of new students will be held at the County Court House

Harvetting From Polluted Soure

The purity and wholes the ice supply have heretofore seem to be a matter of much less concern to both sanitary engineers and consumers than the quality of the water supply. Yet, in view of the increasing uses of ice, its purity is rapidly becoming a matter of but slightly less importance than that of water. While the chemical composition and the factors which affect the purity of water have received a large amount of attention by the agricultural experiment stations, little study has been made of ice supplies in station laboratories.

From Shallow Ponds The consensus of opinion is that natural ice formed to a reasonable depth is comparatively pure under usual circumstances, but that it is very likely to be contaminated if it freezes to the full depth of a shallow pond or stream or if it is flooded, particularly with surface water. The Vermont experiment station found that of a small number of samples of pond ice exam-

ined all were unfit for household use. The following extracts from a recent publication of the New York state department of health regarding ice and ice supplies bear directly upon this

In general there are a great many conceivable ways that ice and ice supplies may become infected. The danger from many of these causes of infection may, however, be so remote or so infrequent as to hardly merit notice. There are, however, a few dannatural ice and the harvesting of the ice supplies as now generally practiced which do merit consideration

Insanitary Conditions. The first of these dangers is the one due to the harvesting of ice from polluted sources. This ice may be taken from ponds or rivers which have been polluted by sewage and may contain the germs of typhold fever and other

Oval Shapes.

FRUIT FUNDEL

Picture

inted during the period and operations of harvesting by filth which may have come from infected sources. The hands ind feet of laborers or the hoofs of herses may be the channels by which infection may be transmitted to the ice even after it has been taken from the water and notwithstanding the purity

of the water. Third. - Ice may become infected from surface drainage from the adjacent lands during thaws. The water which has thus flowed over infected fields that may have been fertilized or otherwise infected may be carried on to the ice and settle and be frozen

A Feed Hopper. When dry feed is scattered on the ground where it is wet or muddy there

is often more or less waste of grain, and feed saving hoppers are therefore used in poultry yards. The illustration. from American Agriculturist. suggests a style which can be easily made from wood at small cost. When the upper hopper is empty

CROSS SECTION OF

may be tilted to remove what feed has dropped into it and this feed, being clean, may be used again. This hopper is easy to construct and will pay for itself many times

A Self Feeder.

A self feeder in the poultry house is a convenience on stormy days; but, then, it is a standing invitation to rate

ingular Denmark institution. It is confined to the nobility, and the noble-

man, as soon as a female child is born to him, enrolls her name on the company's books and pays in a certain sum and thereafter a fixed annual amount to the treasury. When the young girl has reached the age of twenty-one she is entitled to a fixed income and to an elegant suit of apartments, and this income and this residence, both almost princely, are hers until she either marries or dies. The society has existed for generations. It has always prospered. Thanks to it, poverty stricken old maids are unknown among the Denmark nobility, but every maiden lady is rich and

The First Rose. cording to a very ancient leger

the first rose appeared upon the earth at Gulistan. The lotus had long reigned alone, but the flowers became dis satisfied because their drowsy queen could only keep awake by day. They wished for one who would be as fair in revels under the moon as in the garish day. It was then the rose appeared and was chosen the queen of flowers. She sprang into being at the song of the nightingale and was purest white until colored with the blood from the nightingale's breast. As earth's sweetest slugers are those who have felt the thorn, so, it is said, the nightingale sings his exquisite music to the rose with his breast upon sthorn.—Circle.

YOU TRY Bloodine

We Know -BLOODINE. Will Help You To Regain Your Strength

Report of the Head Physician in a Leading New York Hospital on the Cure of Catarrh.

and Energy.

"A few years ago we considered that we were doing well if we cured ten per cent. of the cases of catarrh brought to us, but since the introduction of "Bloodine" into our hospital we cure more than 90 per cent. of all the cases of Catarrh in its various forms brought to us. Catarrh of the Head, Catarrh of the Eyes, Catarrh of the Bladder and Uretha, Catarrh of the Larynx, Pelvic Catarrh, Catarrh of the Larynx, Pelvic Catarrh, Catarrh of the Throat,, and Catarrh of the Stomach are quickly cured with "Bloodine." It builds new tissues, gives new energy, new life, new blood and strength to any part of the body attacked by the Catarrhal germs."

Bloodine is a powerful tonic, nourishing food medicine, composed of valuable tonic stimulants obtained from vegetable drugs. "Bloodine" contains no narcotics or other danger contains no marcotics or other danger which meanly deaden pain contains no narcotics or other danger-ous drugs which merely deaden pain temporarily, but give no permanent relief or cure the cause of your disease. "Bloodine is a powerful body builder and blood maker; it is the best remedy known to the medical profession to enrich thin, watery blood and supply new, rich red blood to the whole body.

FREE - To prove the wonderful merits of BLOODINE we will mail a large sample bottle for 10 cents in silver or stamps for postage.

Address, THE BLOODINE CORPORATION, Boston, Mass.

BIG LINE JUST RECEIVED.

BIGGEST BARGAINS EVER OFFERED.

10c up to \$2.50

While They Last.

Herald Book Store.

Gilt or Black. All sizes.

Cheapest Because Best ERE, at last, is the ideal kitchen and cooking utensil-"THE WARE THAT WEARS"-

made from Pure Spun Aluminum, and guaranteed by the makers to last 25 years with average usage. "Spun" Aluminum, mend you, not cast Aluminum, which will sometimes crack and scale. Spun Aluminum Ware will never crack, peel, scale or break.

Costs a trifle more than ordinary enamel ware, but is many times cheaper in the long run, because of its wonderful durability and fuel saving. Enamel ware is iron coated with colored glass. Iron expands with heat. Colored glass does not, but chips off into the food with dangerous results to those who eat it.

That the use of enamel kitchen ware causes cancer is a view held by some eminent medical authorities. Dr. William H. Diefanbach of New York, in a paper entitled "Observations on the Etiology of Cancer," read before the Bureau of Sanitary Science and Public Health during the session of the International Homeopathic Congress at Atlantic City, discussed this

According to a special dispatch to the Philadelphia North American, Dr. Diefanbach advanced the argument that chipping Will Last a Lifetime

of the hard-coated dishes used in preparation of meals allowed minute but dangerous particles of foreign matter to become mixed with the

food, these being taken into the stomach, where the cancerous growth is caused by abrasions which they make in the walls of the organ.

"1892" Pure Aluminum Ware saves doctors' bills. It enables you to bake bread, pies, pan cakes, etc., without grease, which is the great cause of dyspepsia and indigestion. Aluminum griddles require no grease; hence are smokeless and odorless.

"1892" Pure Aluminum Ware will not scorch or burn, is easily cleaned, will not rust, or corrode. Handsome in appearance. Looks like silver, but weighs only about one-fourth as much, and is light and convenient to handle.

The original and only genuine Spun Aluminum Ware is made by the Illinois Pure Aluminum Co. at Lemont, Ill. Every piece bearing their trade-mark, the manual piece bearing their trade-mark, the manual Cross, and marked "1892" Pure Aluminum Cross, and

See that you get the right goods and accept no substitute.

Only a few of the "1892" Pure Aluminum Cooking Utensils are shown here. Complete line will be found at Wheeler Hardware Company.
