A prominent farmer in the upper part of the county is telling a good story of how a party of automobilists who were returning from the races last week came to grief at a point near the D. McK. Braddy place Tuesday night. The gentleman was driving along the road in a surry when the party came up behind him yelling like Comanches for the right-of-way. The road being narrow the gentleman could give only half of it to the automobile. On came the big machine roaring like a young cyclone until it was within a few feet of the surry when the driver gave the steering wheel a

ditch of some considerable depth into which the machine plunged with a roar and a snort and then came to a dead standstill. The gentleman drove on to his house a short distance away and ere long he was summoned to the front door where he found the party in a most dilapidated plight. He went down to the scene of the wreck and helped them pull the auto out of the ditch but it was minus the windshield which had been smashed into smithereens and the radiator was leaking at several broken places. No one was hurt but as the gentleman toiled with the party in the effort to drag the machine back into the road he smiled serenely at the maledictions heaped upon the head of the "man in the surry" whose down-right "cussedness" had brought about all the trouble.
