Heavy Expense,

It costs England a considerable sum to keep envious neighbors quiet while the bulk of her land forces are in the Transvaal., English naval estimates for 1900-1901 amount to \$137,613,000, in which an increase of \$4,640,500 provides for 220 additional officers and 4,020 men. In 1900 there will be under construction seventeen battleships, twenty armored cruisers, one first-class protected cruiser, two second-class protected cruisers, one third-class cruiser, eight sloops, two gunboats, four torpedo boats and twenty-one destroyers.

The Part She Didn't Like.

The other day a wee little woman who lives in a suburb saw and heard a donkey for the first time, says the Cincinnati Enquirer. She talked about it continually after getting home.

It was a "good donkey," it was also a "beautiful donkey." In fact, the child went completely through her small store of adjectives. And when her father came home at night he heard the adjectives all over again.

"And so you liked the donkey, darling, did you?" he asked, taking the tiny lass on his knee

'Oh, yes, papa, I liked him. That is, I liked him pretty well, but I didn't like to hear him donk."

Social Memory.

Henry Fawcett, says Sir Edward Russell, had an extraordinary memory for persons. One night Sir Edward was in the House of Commons, to hear a debate, under the gallery.

A friend introduced him to Mr. Fawcett, who, learning why he was there, said:

"Oh, then you can look after my old father, and tell him who the people are. He is going under the gallery, too." Three or four years later, Sir Edward was presented to Mr. Fawcett, who was then chief guest at a political dinner, and said to him, in "the usual conventional mumble:"

"I once had the pleasure of being introduced to you, Mr. Fawcett, but it's a long time ago."

"I remember," said he, "you very kindly looked after my father under the gallery at the House."

And this was the memory of a man totally blind.

We Are Nearer Aerial Flight.

Notwithstanding the pessimistic opinions of some scientists there is at least one sound reason for now believ ing that man will eventually navigate the air. This proceeds from the fact that within the past ten years artiti cial motors have been produced which approach closely in relative lightness the proportions which obtain in the motor muscles of birds. The weight of the latter is about in the ratio of six to twenty pounds per horse power developed, while the most powerful locomotives weigh some 200 pounds per horse power. Since 1890 steam engines of special design have been produced which weigh less than ten pounds per horse power .- Octave Chanute, in the Independent.

rose rapidly during fifteen minutes and in one or two hours reached its maximum. After bread is given the temperature will rise more slowly than in the case of sugar, owing to the greater difficulty the animal has in assimilating the food. Prof. Masso says that with sugar he has succeeded in retoring the vitality of dogs in ; serious state of hypothermia, while the administration of albumen to others failed to save their lives.

To Prohibit Scandalous Publications,

It has been proposed in New York to prohibit by law the publication of scandalous matter found on the persons or in the possession of suicides or of those who have attempted suicide. This would be a good thing to do. Persons who take their own lives are often insane. If not actually deranged, their minds are in so morbid a condition as to unfit them for calm and accurate statement. It often happens that, with the intention of explaining their act, they leave a letter or scrap of paper which reflects cruelly upon the character of one or more living persons. The newspapers print the letter under prominent head-lines, and the injured person has no redress. A mere denial counts for little, and there is no defence against the calumnies of the dead.
