

Presbyterian College Issues Interesting Bulletin

HIGH SCHOOL GRADUATES

Do you expect to attend college this Fall?
Of course, you are going to college.

LESSONS FROM THE WAR

The recent war has taught us that the greatest investment a young man can make is the securing of a college education. It was the college young man who went to the officers' training camp and returned with a commission; it was the college young man who was rapidly promoted and filled the difficult and responsible places in the conduct of the war; it was the college man who was called to organize the great benevolent war movements, such as the Red Cross and the Y. M. C. A. It was the college young man who, even though he entered the army as a private, was soon singled out and made corporal, then sergeant, then placed in some responsible position held by a non-commissioned officer and finally received a commission.

LESSONS FROM THE BUSINESS WORLD

Education pays not only during war, but it pays just as handsomely in times of peace. Here are some facts taken from a little pamphlet entitled "The Value of An Education," by Dr. Carl Van Winkle: "Salaries in the New York Bridge Department: In positions demanding only reading, writing and arithmetic, \$982.00; in positions demanding high school and commercial courses, \$1,729.00; in positions demanding high school and two or three years of college or technical education, \$2,400.00."

Here are some of the results obtained by the Western Electric Co. during a period of ten years: "Men who made good without a college education, 10 per cent.; men who failed without a college education 90 per cent.; men who made good with a college education, 90 per cent; men who failed with a college education 10 per cent."

Mr. Carnegie says: "The business men of America have at last come to realize that a college education has a commercial value." Mr. Chauncey M. Depew says: "Hundreds of college men have begun in these last years at the bottom in railroad work and have soon distanced the uneducated boy and man."

LESSONS FROM THE PROFESSIONAL WORLD

If education pays in war and business, it becomes absolutely necessary in the professional world. Our great lawyers, doctors, preachers, inventors, discoverers, writers are practically all college men. It used to be thought by many that politics was left for men of but moderate education, but by studying the lives of our public men at the present time we find that even the field of politics has been closed to the uneducated,

and is being dominated by the college man. At the present time the President, Vice-President, Speaker of the House, all but two of the Cabinet Members, 69 out of 96 Senators, 305 out of 435 Representatives and all of the Justices of the Supreme Court are college trained men.

In studying the distinguished men of America and their education we find the following facts: Of 5,000,000 with no schooling only 31 attained distinction; of 33,000,000 with elementary schooling 808 attained distinction. Of 2,000,000 with high school education 1,245 attained distinction. Of 1,000,000 with college education 5,768 attained distinction.

WHAT COLLEGE SHALL I ATTEND?

Having decided definitely to attend college, the next important question to decide is, "What college shall I attend?" In settling this question there are several things about a college you will naturally want to know. Some of them are as follows: 1. Location; 2. Standard; 3. Faculty; 4. Equipment; 5. How the diploma is recognized by our best universities; 6. Athletics; 7. Expenses; 8. Military Training.

Let us answer these questions in behalf of the

PRESBYTERIAN COLLEGE OF SOUTH CAROLINA

1. **Location:** The Presbyterian College of South Carolina is located in Clinton, a progressive town in the Piedmont section of the State, with 4,000 inhabitants. Clinton has all modern improvements, such as electric lights, water works, sewerage and cement walks. The town has an elevation of 800 feet. The climate is invigorating and free from malaria. The general healthfulness of the place is excellent, the moral and religious standing equal to the best in the State. It is easily accessible to all parts of the State, being reached by both the Seaboard Air Line and the Atlantic Coast Line.

2. **Standard:** When inquiring into the standard of a college, there are two things we want to know: First, entrance requirements; and second, the class of work done by the college. The entrance requirements of the Presbyterian College of South Carolina are 14 units for unconditional entrance. Two conditional units are allowed at the present time. The entrance requirements will probably be raised to 15 units next year. The College courses have been thoroughly organized in every department and brought up to the requirements of our best institutions. Students will find in the broad and varied curriculum courses which will prepare them for any field of activity they may choose to enter. Those preparing for medicine or scientific work will find strong courses in Chemistry, Biology and Physics. Those expecting to study Law or take up business will find the very work they need in Political Science, Political Economy and History. Those desiring to study Engineering will find this field provided for in Mathematics, Physics and Chemistry. Candidates for the Ministry will find in the departments of Greek, Literature and Philosophy excellent preparation for the theological seminary. Those expecting to teach will find courses given in Pedagogy.

The Courses Offered by the College are as Follows:

English	Chemistry	Bible	Mathematics
Latin	Physics	Philosophy	History
Greek	Biology	Psychology	Political Science
French	Geology	Ethics	Political Economy
German	Astronomy	Pedagogy	Sociology
Spanish	Physical Training	Military Science	Personal Hygiene

3. **Faculty:** The College has nine professors in its faculty, exclusive of the President. These men have all been trained in our best colleges and universities and are specialists in their departments. They have been carefully selected not only with reference to their scholarship and teaching ability, but also with reference to their standing as Christian gentlemen.

4. **Equipment:** One of the most attractive features about the College is its excellent equipment. Fortunately, the College has no old buildings, unfit for college use, but too good to be torn down. All the buildings on the Campus are practically new. The dormitories are modern and well arranged, equipped with all modern conveniences, such as steam heat, toilets, hot and cold water, etc. The College buildings are heated from a central heating plant. The College has a campus of 35 acres, and has on it now over \$200,000 worth of buildings.

5. **Diplomas:** Our diplomas are accepted by the leading universities of America. Our students have not only been accepted in these universities, but have shown their excellent preparation after entering them. One of our students entered the post-graduate department in Chemistry in Chicago University and made A, which is the highest mark given by the University. Another entered Johns Hopkins Medical College; his professor in excusing him from the examination said he was so well prepared and showed such excellent training that an examination would be unnecessary. One of our students entered the Banking School of the New York City Bank; his promotion was unusually rapid, and he was soon put in charge of a department. No student need enter our college with the fear that after he graduates his diploma will not receive proper recognition.

6. **Athletics:** Anyone who has kept up with college athletics during the past four or five years has been impressed with the wonderful record P. C. has made in this line of college activities. Strong teams in foot-ball, basket-ball and base-ball are put out every year. Last fall only two games of foot-ball were played and P. C. won both. The year before that, the College won from every college in the State with the exception of Clemson, and the record for the previous years has been practically as good. A base-ball team was not put out last spring on account of the war, but the year before, out of twelve games the College lost only two. The basket-ball team has always made a fine record. Mr. Walter A. Johnson has been our coach and physical director for the past three years. He is now in the army, but hopes to be discharged soon and will be back with the College next year. This assures the College of a fine
