

## CAROLINA TEAMS DO SPLENDID WORK

South Carolina football followers were treated to some mighty close play during the past week, as all of the teams did well. Probably the biggest surprise was the defeat of the Citadel at the hands of Wofford and the close score to which the Carolina machine held the fast Davidson squad, being nosed out in the final minute of play.

Wofford, held to a tie by Guilford College, and nosed out by a goal from touchdown by Furman, came back strong on a muddy field and shoved across two touchdowns against the military lads. The Citadel was crippled by the absence of Captain Crouch, Ende and one or two other regulars, and according to the reports put up a game struggle.

Carolina was an unknown quantity in a way, but the Game Coeks continued their improvement, and it was only at the last minute that Davidson managed to score. It will be remembered that Davidson was defeated by Clemson and Washington and Lee by but one touchdown, losing both contests 7 to 0. As a result of this contest the University stock has gone up several points.

Clemson battled the strong Auburn eleven Friday, and was nosed out by a single touchdown. The Tigers are keeping up the fast pace set early in the month. As a result they are being recognized as one of the strongest aggregations in the South.

Furman managed to get away with the Presbyterians, but it was only the speed of Speers that kept the Presbyterians from winning in the last few minutes of play. Woodson recovered a blocked kick and with a clear field in front of him was overtaken by Speer, the final whistle sounding a few minutes later.

Newberry and Erskine had a battle royal at Newberry Friday, and the Due West team emerged victorious by a touchdown. The Lutherans were unable to stop the powerful rushes of Phillips.

### Scores of Teams to Date.

Following are the scores of the South Carolina teams to date:

The Citadel.	
0 University of Georgia	28
0 Wofford College	12
0 Totals	40
Clemson College.	
52 Erskine College	0

6 Newberry College	0
6 Totals	58

### NEW STEAMSHIP

#### LINE FOR THE SOUTH

New Orleans to be Principal Port for Line to be Established Next Month.

Philadelphia, Oct. 17.—New Orleans is to have a new steamship line which will begin operations early next month and handle shipments from and for the entire south, according to a published announcement here today. The vessels of the new line will operate from Philadelphia and New Orleans through the Panama canal to Los Angeles, San Francisco and Honolulu. The new line is reported to have the financial backing of the steel interests of Philadelphia and is made possible by the present rail rate on steel products from the Atlantic to the Pacific coast, which is \$1.37-1.2 per hundred pounds. The water route, it is declared, will cut this rate almost in half. The names of the steamships which will be placed on the route will be announced soon.

On the eastward run from the Pacific coast the ships will bring sugar from Honolulu and canned goods, dried fruits and other products of the western coast. The ships will stop at New Orleans and discharge part of their cargoes of merchandise destined for places in the south, then take on rice, cotton and other products of the south for Philadelphia. On the westward run the steamships will take out cargo for New Orleans and other southern points, and iron, steel and manufactured goods for the Pacific coast.

Capt. George L. Craig, of the Shipbuilding company, Lorain, Ohio, and who also conducts a shipbuilding plant at Los Angeles, is the senior member of the firm establishing the new line.

## CENTURY OF THOUGHT AIDS WOMEN WORKERS

National Women's Trade Union League Will Present Its Purposes at International Congress at Washington.

The National Women's Trade Union League of America has had nearly one hundred years' preparation for the part which it will play both on the floor and as hostess to the first International Congress of Working Women which is being called by that organization in Washington on October 23.

Women in the United States were first organized to secure better working conditions in 1821. This organization continued to grow until the time of the Civil war, when all labor organizations broke down. Sometime after the war women again organized, and in 1903 the National Women's Trade Union League, as it now operates, became a living thing.

The present organization has a membership of 600,000 women and an estimated membership of over a million, which includes men who are backing the program of the league and are in industries where women are employed. It is affiliated with the American Federation of Labor.

The National Women's Trade Union League tries, through its organization, to teach women to help themselves to get better working conditions. Its purpose is "to protect the women workers of America from inadequate wage and extreme working hours through the organization of the workers, and through such legislation as the minimum wage and the eight-hour day; to increase co-operative action among them; to create a public opinion that really understands the labor movement; to secure definite and accurate information concerning conditions among women and child wage earners leading to legislative action; to supply at all times to all wage earners assistance in working out their industrial difficulties."

Mrs. Raymond Robins is president of the league and chairman of its committee on international relationships, which is in charge of arrangements for the International Congress of Working Women. Miss Mary Anderson, chief of the women's bureau of the United States department of labor, is secretary to this committee.

The congress is being called at the official request of the standing committee on Women's Industrial Organizations of Great Britain and at the informal request of women's labor organizations in France and Italy. Problems and conditions affecting the work of women and children will be discussed and remedies for these ills considered so that practical suggestions can be taken back by the delegates to their own countries.

### WOMEN POOL PROBLEMS

Meet for First International Industrial Congress in History.

Chief of Women's Bureau, United States Department of Labor, Says Women Must Consider Own Problems.

Washington, Oct. 17.—"The International Congress of Working Women, to be held in Washington on October 23d at the call of the National Women's Trade Union League of America, affords the first opportunity in the history of the world for working women to get together to discuss their common problems and different phases of employment to the end that they may inaugurate higher industrial standards the world over," says Mary Anderson, chief of the Women's Bureau of the United States Department of Labor.

Miss Anderson is secretary to the committee on International Relationships of the Trade Union League and in charge of arrangements for the conference.

Miss Anderson continued to say: "The United States can no longer be isolated as a nation. We have taken our place in the family of nations and stand in danger of either going up or down with the rest of the world in regard to industrial standards. To this end we must never forget that by raising standards of employment for the 12,000,000 women in gainful occupations in the United States, by guarding against child labor and giving proper protection and care to women and babies, we are helping to raise the standards, and that just as soon as we fail to make our standards as high as they should be we will cause suffering and hardship among women and children either in our own country or in some distant, unthought-of part of the world."

"The Trade Union principle recognizes the fact that working women shall participate in the conditions governing their employment, that they shall use their own initiative to the end that they may have control over conditions under which they work. They all agree that because of this women must have their own part in the organizations that consider the conditions of women's work, whether these be local, national or international."

Thirty-four countries have been asked to send women delegates from accredited labor organizations to attend the Congress. Each country will have ten votes on the floor of the Congress, and is entitled to ten delegates.

### AUSTRALIANS ARE NEAR REVOLUTION

People of Northern Australia Cry "Taxation Without Representation." Melbourne, Australia, Oct. 18.—Citizens of the northern territory of Australia, complaining as did the American colonists of "taxation without representation," have determined to eject the territorial government established in that part of the commonwealth. They demand the institution of a representative government and the right to vote.

These decisions were taken at a citizens' meeting held at Port Darwin, the principal harbor of the territory, at which a resolution was adopted, declaring that the system of administration of the territory by an advisory council had proved valueless. The citizens demanded the resignation of Judge Bevan and of the secretary director of the territory, R. J. Evans. A second resolution requested those officials to leave the territory by the first steamer in order "to avoid a revolution."

The citizens of the northern territory complain that, although paying taxes, they possess no votes and now

demand a provisional government. The northern territory, a sparsely settled region in northern Australia with an area of 523,620 square miles, and a population excluding aboriginal tribes or less than 5,000, was formerly a corporate part of the state of South Australia, but was surrendered by the South Australian government to the commonwealth January 1, 1911, and has since been governed under an appointive territorial administration.

The coastal regions of the territory have a tropical climate, but in the interior is a table land, rising gradually from the coast to a height of about 1,700 feet. Parts of this table land are excellently adaptable to grazing and the white inhabitants and about one-half of the 5,000 non-aboriginal population are principally engaged in cattle raising.

### COTTON VARIETIES FOR BOLL WEEVIL CONDITIONS

Clemson College Extension Department Gives Advice on Seed Selection in Fighting Boll Weevil.

Clemson College, Oct. 16.—To help lessen the damage from the boll weevil, now advancing so rapidly in South

Carolina, the Extension Service of Clemson College has tested during the last three years about twenty of the best varieties of cotton with reference to early fruiting and early maturing. The experiments were conducted in Edgefield, Aiken, Barnwell, Hampton, Beaufort, and Charleston counties to determine the varieties best suited to beat the boll weevil.

From the results so far obtained and from observations as to fruiting and growth, says E. E. Hall, expert in cotton breeding, the short staple varieties to be recommended for South Carolina conditions are Cleveland, Cook, Dixie Triumph, and Dixie.

On land free from wilt Cleveland Big Boll has given the best average results, and this is considered one of the best varieties for South Carolina, if land is entirely free of wilt.

Cook ranks among the highest yielding varieties in the state, but is not as generally grown, because anthracnose or boll rot is worse in this variety than in any other.

Dixie Triumph is the earliest and highest yielding wilt-resistant variety tested, and can be recommended for wilt-infested land. Dixie has also

made good yields on wilt-infested land, but it is not as early as Dixie Triumph. Among long staple varieties Webber 49 and Webber 82 are the earliest tested. Webber 49 fruits and matures a little earlier than Webber 82. Both are well adapted to the state where wilt does not occur, as they fruit practically as early as the short staple and frequently yield as much seed cotton per acre.

Seed of any of the above varieties can be obtained from breeders in the state, who, for several years, have been selecting and breeding for earliness. The Extension Service of Clemson College will furnish farmers with a list of the best sources of seed in the state upon application.
