WAR TIME RULES PLACED ON FUEL

Critical Situation Brought on by Strike of Coal Miners Calls for Drastic Measures by the Government. Fuel and Lights Curtailed After 4 P. M.

Atlanta, Ga., Nov. 29.—Far reaching restrictions of coal consumption throughout the southern region of the United States Railroad Administration were issued here tonight by the Regional Coal Committee. The orders, effective at noon Monday, December 1, provide chiefly that:

Stores and office buildings may use heat, light and power only between 9 a. m. and 4 p. m. Drug stores for selling drugs only, are excepted.

Theatres, moving picture shows and other public amusement places may use heat, light or power only between 1 p. m. and 10:30 p. m.

Industries, except public utilities and plants engaged in continuous processes that cannot be interrupted, may be operated only 48 hours a week.

No ornamental lights, white way, or other unnecessary street lights, outline lighting, electric signs or illuminated billboards are to be operated.

The committee is acting under the wartime powers of the United States Fuel Administration and it announced that "in cases of refusal to comply with these regulations coal supplies or electric current will be cut off and where it appears that a violation of law is involved federal district attorneys will be asked to act."

All territory east of the Mississippi and south of the Ohio and Potomac Rivers, except Virginia and West Virginia, is affected by the order which committee members said was made imperative because of the continued strike of soft coal miners. The announcement to the public, which shows certain other exceptions in addition to those for drug stores follows in part:

"Immediate and sharp curtailment of the use of fuel by consumers in the first five classes of the Fuel Administration's preference list has become necessary. This programme becomes effective at noon Monday, December 1st, 1919, throughout the territory under the jurisdiction of this committee (except the state of Virginia, where the fuel situation is administered largely by the Pochahontas regional coal committee). In this territory are the states of North Carolina, South Carolina, Tennessee, Kentucky, Georgia, Florida, Alabama, Mississippi and Louisiana east of the Mississippi river.

"The regulations, which apply alike to consumers now receiving coal from the railroads and to those who have stocks on hand, or who are using electric power, heat or light furnished by public or private plants, are as follows:

"1. No ornamental lights, white way other than necessary street lights, outline lighting, electric signs or illuminated billboards are to be operated. This does not affect street lighting necessary for the safety of the public.

"2. Stores, manufacturing plants and warehouses must not use electric or gas lights (except safety lights) except between the hours of 9 a. m. and 4 p. m.

"Exception (A). Drug stores (for the sale of drugs only, except between the hours of 9 a. m. and 4 p. m.) and restaurants may remain open according to present schedule, but must curtail number of lights 50 per cent.

"Exception (B). Railroad stations, hotels, hospitals, telephone, telegraph and newspaper offices are not included in so far as necessary lighting is concerned.

"Exception (C). Lights may be used in offices of manufacturing plants for necessary accounting purposes at any time.

"Exception (D). General and office lights must be cut off at 4 p. m. in office buildings except where office operation of vital industries is involved.

"Exception (E). Moving picture houses and theatres and other public places of amusement may burn lights only between 1 p. m. and 10:30 p. m.

"Exception (F). Barber shops may remain open from 8 a. m. to 6 p. m.

"Exception (G). Dairies, ice and refrigerator plants, bakeries, plants for the manufacture of necessary medicinal products, waterworks, sewerage plants, gas manufacturing plants, plants operating continuous processes (such as acid manufacture, blast furnaces, etc.), printing plants for the printing of newspapers, periodicals, battery charging outfits and plants producing light or power for telephone, telegraph or public utility companies are exempted.

"Exception (H). On Saturday nights time of closing mentioned under paragraph 2 will be extended until 9 p. m. for stores selling food and wearing apparel.

"1. Between the hours of 7 a. m. and 4 p. m. only enough heat (ob-

tained from coal, gas or steam) may be used in offices, stores, warehouses and manufacturing plants as to keep the average temperature at 70 degrees F. This temperature may be maintained in theatres, moving picture houses and other places of public amusement between the hours of 1 p. m. and 10:30 p. m.

"Exception, on Saturdays the temperature may be maintained at 70 degrees between 7 a. m. and 9 p. m. in case of stores handling food and wearing apparel.

"2. After the closing hours on Saturdays and after four p. m. on the remaining week days only enough heat is to be used to prevent freezing of water pipes or sprinkler systems, on week days and on Sundays. Where exceptions are made in certain classes for lighting, heat will be allowed only during allowable light period.

"3. Manufacturing plants or plants coming under power curtailment rules heat (to 70 degrees) will be allowed only during that time allowed for use of power.

"4. No curtailment on use of coal, steam or gas for producing hot water for hotels, restaurants or barbershops.

"1. No manufacturing plant or factory shall operate in excess of 48 hours per week.

"Exception (A). Dairies, ice and refrigerator plants, bakeries, plants for the manufacture of necessary medicinal products, waterworks, sewerage plants, gas manufacturing plants, plants operating continuous processes (such as acid manufacture, blast furnaces, etc.), printing plants for the printing of newspapers, periodicals, battery charging outfits and plants producing light or power for telephone, telegraph or public utility companies are exempted.

"Exception (B). Elevator service must be curtailed as much as possible."

National Restrictions Ordered.

Washington, Dec. 1.—Wartime restrictions on the nation's use of coal more stringent even than those applied during the war, were ordered into effect today to stave off fuel famine.

Moved by reports of diminishing coal stocks and growing danger of distress in numerous sections, the government sought to compromise with striking mine workers whose walkout forced the emergency, but asked for national determination to endure privation and discomfort until coal mining was resumed on its terms.

Fuel Administrator Garfield, acting in conjunction with the Railroad Administration, gave notice that hereafter only the essential consumers included in the first five classes of the war priorities list would be supplied with coal and asked the help of all state and municipal authorities to make rationing effective.

The order, which made national those restrictions already put into local effect by regional coal committees where the pinch of fuel shortage has been felt, cuts off supplies from all but transportation agencies, which include international and coastwise shipping as well as railroads; federal and local government institutions and establishments, including concerns working on government contracts; public utilities, including newspapers, and retail dealers. Railroad Administration officials conceded that it meant wide-spread cessation of industrial operations, only justified by the gravity of the situation.

Electric Power Included.

Atlanta, Ga., Dec. 1.—The regulations effective today shortening hours of stores and industries in order to prevent a coal famine "apply alike to industries, stores and business houses actually burning coal, oil or other fuel in their plants and those using electric power, whether hydro-electric or steam," the regional coal committee of the southern region announced here late today.

The committee stated that hydro-electric power already is being diverted to distant communities dependent ordinarily on steam produced electricity.

The committee relaxed its regulations, however, to permit grocery and meat stores and mill depots to remain open until 6 p. m. daily except Saturday when their closing hour is 9 p. m. It refused requests of other merchants coming under the classes closing at 4 p. m., that they be permitted to remain open after that hour provided they used only candles or kerosene for light and no heat.
