

TELLS FARMERS TO ADJUST PRODUCTION TO DEMAND

Bureau of Agricultural Economics Also Advocates Avoiding Increasing Production of Products Now In Abundance. Quality Products and Legumes Are Emphasized.

Washington, Jan. 27.—American farmers were urged today to continue their efforts to adjust production to demand by the bureau of agricultural economics in its outlook report for 1929. The bureau also advocated that the farmer avoid increasing production of those products which are in ample supply if the present level of gross agricultural income is to be maintained.

"The agricultural outlook for 1929 is for some improvement in the Midwest and East," the bureau's survey declared, "offset by conditions in other regions possibly not quite so good as in 1928. For agriculture as a whole total gross income will probably be maintained near its present level of

around \$12,000,000,000 to \$12,500,000,000.

The domestic demand for farm products, the bureau said, is expected to be maintained during the early part of the year, with foreign demand continuing about the same as last year. Some expansion in beef cattle may be warranted, the report said, but farmers were cautioned against too rapid expansion of sheep, dairy cattle, hogs and fruits. Some reduction was recommended for potatoes and feed crops.

The higher interest rates affecting the farmers in some sections of the country may result in a less favorable agricultural credit situation, the report declared, but little change is expected in the price of farm machin-

(Continued from Page One)

stances. The institution is badly in need of a full time, experienced farmer. The various attendants have assisted in this work, but as we feel that our first duty is the proper care of the children, the farming is neglected occasionally at critical times. Our oats suffered from the severe cold last winter and yield was cut considerably. From our spring garden, we gathered a rather large variety of vegetables.

Dairy and Live Stock

The dairy herd is about as large as it should be but we are greatly in need of better grade cattle. It costs no more to care for a purebred herd than for grade stock, and of course, there is no comparison in the yield of dairy products.

We have killed and cured more than 12,000 pounds of pork, and in addition, will have enough to supply the institution with fresh pork for the next ninety days.

Because of an unusually wet spring, we were able to raise only 100 turkeys this year. Part of these were served to the children at Christmas. The advantage of an extra large range has made the feed cost very little.

F. L. WEBB, M. D.,
Assistant Superintendent.

The official staff of the institution

appears in the report as follows:

B. O. Whitten, M. D., superintendent.

F. L. Webb, M. D., assistant superintendent.

Miss Lois Blakely, secretary-book-keeper.

Miss Norma Hallett, school principal and psychometrist.

Miss Ida Turner, Miss Martha Young, vocation teachers.

Miss Louise Cox, Mrs. C. E. Holson, primary and kindergarten teachers.

Miss Alene Eden, music teacher.

Miss Georgia Brooker, supervisor.

Miss Allie Greene, R. N., assistant supervisor and nurse.

F. D. Jones, B. A., D. D., head of devotional activities.

S. C. Hays, A. B., M. D., visiting and consulting surgeon.

ROGERS Store Managers SALE

In recognition and appreciation of the faithful, loyal services of our nearly 400 store managers, we are presenting to THEIR customers this week a sale of unusual values—a sale named for and in honor of them. We have selected a number of items—food products of high quality—and placed prices upon them that will not only mean a GREAT SAVING TO YOU, but will afford our managers pleasure in offering them to you.

These Prices Effective All Week
FEBRUARY 1 THRU 7, 1929

- Palmolive** Toilet Soap 4 Bars **29^c**
- ASPIRIN** Genuine Bayers Box of 12 **14^c**
- Peaches** California Evaporated 2 Lbs. **25^c**
- PRUNES** Medium Size Lb. **10^c**
- Scottissue** Soft & White 3 Rolls **29^c**
- BLUEING** Cobbs Best Box **9^c**
- Starch** Argo Gloss 3 Pkgs. **11^c**
- GRAPELADE** Welch's 4-Oz. Jar **9^c**
- Fruits** Libby or Del Monte Pineapple—Peaches 3 Buffet Fins **27^c**
- JELL-O** All Flavors Pkgs. **9^c**
- Walnuts** No. 1 English Lb. **25^c**
- Chewing Gum** 3 Pkgs. **10^c**
- Almond Bars** Hershey's 3 For **10^c**
- COFFEE** Gold Label Lb. Can **49^c**
- Coffee** Rogers "Hot-Cup" Lb. **29^c**
- BRILL-O** Steel Wool 3 Pkg. **25^c**
- Beans** Heinz Baked 3 Cans **27^c**
- OYSTERS** Fancy Pack Can **15^c**
- Blades** For Gillette Razor One Blade FREE Pkg. of 5 **35^c**
- Macaroni** Skinners 3 Pkgs. **25^c**
- Matches** Diamond Crescent 3 Pkgs. **10^c**
- HOMINY** Rogers Lye 3 Cans **27^c**
- Asparagus** Hillsdale No. 1 Can **27^c**
- RAISINS** Sun Maid Pkg. **10^c**
- Syrup** Bonita Cane Flavor No. 5 Can **45^c**
- Powders** Star Naphtha Washing 3 Pkg. **11^c**
- Grape Juice** WELCHS Pint Bottle **29^c**
- GRAPE JUICE** Welch's Quart **59^c**

ery, fertilizers, and building materials. Farm wages are expected to be lower at harvest times, it added.

In its summary of recommendations on leading crops and livestock, the bureau said that it was probable that the world supply and demand for wheat in 1929-30 will be somewhat more favorable for marketing the wheat crop of the United States than they were last season.

With lower feeding requirements and probably a lower European demand corn prices may be lower than they were in 1927 and 1928, the bureau continued.

The outlook for the cattle industry "continues favorable," with prices about at the peak of the cycle, the report declared, and the present does not appear to be a favorable time for new producers to enter this industry.

Although increased number of sheep in this country have not as yet affected the markets, the bureau said cautions should enter into production plans as present lamb prices cannot be maintained if expansion is continued too rapidly. The lamb crop this year, however, it added, may show some increase above last year. Active business conditions in the opinion of the bureau will continue to help support the lamb and wool market well through 1929 with possible slackening in late 1929 or in 1930.

Since a provision of the recently enacted appropriation act for the agriculture department "prohibited the making of any statement regarding the future prices of cotton or the trend of same," the bureau said it had prepared no report on the outlook for cotton.

The 1929 outlook for citrus fruits indicates a considerable increase in the bearing acreage of grapefruit and oranges. Commercial production of apples will continue at a high level with a consequent low price scale.

Prospective commercial requirements of flax and broom corn leads the bureau to believe that acreage in both fields could be increased. A moderate increase in sweet potatoes is expected but not enough to affect the market prices.

The report said that probably not more than a 25 per cent increase in Virginia type peanuts can be absorbed by the market without lowering the present average price to the farmer.

The outlook for cigar type tobacco in 1929 appears favorable, the bureau said. The present outlook for flue-cured tobacco indicates the need for a reduction of acreage. A moderate increase of burley acreage might safely be made, but the bureau warns that there is grave danger that burley growers will respond to present burley prices by overplanting in 1929. The outlook for fire-cured and dark air-cured tobacco does not justify an increase in acreage in the opinion of the bureau.

Acreage of strawberries in the early and the late shipping states, where there is only a limited season, does not appear to be excessive, the bureau said, and market prospects in those areas are fairly good. The cantaloupe acreage for the United States as a whole last year, with a few sharp local adjustments, was expected by the bureau to give satisfactory results this season, assuming average growing and marketing conditions.

Unless the watermelon acreage is reduced from 10 to 20 per cent below that of 1928, the bureau said, an average yield of 1929 is likely to result in unsatisfactory prices. An average cut of about 15 per cent would limit the producing area close to the more moderate acreage of 1927, and still yield an average crop in an average season, it was pointed out.

The outlook for rice was reported better than it was last year. Although the present low prices of rice in the world markets may discourage production next year in some foreign countries, the bureau said, it appears that over a longer period American rice producers can expect no material decline in foreign competition.

For the southeastern section the following forecast was issued:

"The outlook for producers throughout the Southeast region warrants confidence in a production program in which improvements in quality and in distribution of products, such as the greater use of legume hays, is emphasized rather than material increases in total quantities produced. In the Appalachian region and rougher sections of the Piedmont and in certain other localities, where conditions are definitely favorable, development of the dairy enterprise offers good prospects for an increased income. Increasing competition from other states in those special fruit and vegetable crops generally grown throughout the country, in which the advantage of the South is largely that of early season, suggests caution in expanding production of those commodities and varieties which do not have virtually clear fields in consuming centers. Available resources left over after providing for acreage not in excess of last year for the major staple products may well be applied to production of home-grown food and feed and to better pastures."

Meyers—Arnold Company

February White Sale

Begins Monday the Fourth—and Continues Through Thursday the Fourteenth

Ten Days of Saving's New Merchandise For Spring

To win a place in this annual event every item offered represents a buying opportunity that is exceptional—although we call this a White Sale, the trend of the mode is for color, and color predominates. It also means that department managers, eager to win recognition for their offerings, have not only reduced prices very radically, but have made advantageous purchases of new merchandise. The result is a greater February shopping opportunity for you at this store.

New! Under Wear

This annual lingerie selling presents an opportunity for you to secure not only unusual values but complete assortments of the newest styles—Cotton, Rayon and Silk models are included.

New! Wash Frocks

Here is an opportunity for every one in the entire family to benefit by extraordinary values. Boys' Wash Suits for every day and Sunday; best Girl's Wash Dresses for playtime and school; Women's Porch and House Frocks.

New! Tub Fabrics

A collection of enchanting variety. A little sewing now in your odd moments will enable you to face spring with nothing to do but enjoy the weather. Sturdy weaves for house frocks or children's clothes, sheer fabrics in a blend of tints for intimate garments. Gay prints in a different manner; linens in exquisite tones and patterns; crepes in silk and cotton mixtures.

New! For The Home

Lovely linens for the table—Luncheon sets, hand-made fancy linen pieces. Standard quality Wamsutta, Utica and Mohawk bed sheets; pillow cases, bed quilts, towels. Red Star diapers—a veritable storm of white, with some times a dash of color to make it interesting and prices are far below the usual cost.
