Eyes of Today

EYESIGHT

Seventy people out of every one hundred have defective eyesight. And this is not because eyes are being made "poorer" than they were in grandfather's day either.

Our present mode of living, with confining work, insufficient exercise and too many hours spent with artificial lights throws a load on the eyes which they were never intended to carry. As a result, more and more people need the comforting help of glasses for eyes which have been overworked.

Do not put off giving your eyes the attention they deserve. It is more than likely they need it NOW.

DRS. SMITH AND SMITH
